CADY REPORTING SERVICES, INC. - 216.861.9270  
www.cadyreporting.com

1 APPEARANCES:

2 ON BEHALF OF THE PLAINTIFFS:

3 LARRY SILVER, Esq.  
4 Langsam Stevens Silver &  
5 Hollaender LLP  
6 1616 Walnut Street, Suite 1700  
7 Philadelphia, Pennsylvania 19103-5319

8 ON BEHALF OF PLAINTIFF NCR:

9 J. WRAY BLATTNER, Esq.  
10 Thompson Hine LLP  
11 Austin Landing I  
12 10050 Innovation Drive, Suite 400  
13 Dayton, Ohio 45342-4934  
14 and  
15 E. CAMILLE YANCEY, Esq.  
16 Thompson Hine LLP  
17 312 Walnut Street, 14th Floor  
18 Cincinnati, Ohio 45202-4089

19 ON BEHALF OF DEFENDANT CARGILL:

20 JACK A. VAN KLEY, Esq.  
21 Van Kley & Walker, LLC  
22 132 Northwoods Blvd., Suite C-1  
23 Columbus, Ohio 43235

24 ON BEHALF OF DEFENDANT DAYTON TIRE &  
25 RUBBER:

DAVID T. MOSS, Esq.  
Hanna, Campbell & Powell, LLP  
3737 Embassy Parkway  
P.O. Box 5521  
Akron, Ohio 44334

ON BEHALF OF DEFENDANT PHARMACIA CORP.  
f/k/a MONSANTO COMPANY:

VICKI J. WRIGHT, Esq.  
Krieg Devault  
One Indiana Square, Suite 2800  
Indianapolis, Indiana 46204-2079

1 ON BEHALF OF DEFENDANT WASTE MANAGEMENT:

2 WILLIAM H. HARBECK, Esq.

Quarles & Brady

3 411 East Wisconsin Avenue, Suite 2040

Milwaukee, Wisconsin 53202

4  
5 ON BEHALF OF DEFENDANT DP&L:

6 FRANK L. MERRILL, Esq.

Bricker & Eckler LLP

100 South Third Street

7 Columbus, Ohio 43215

8 ON BEHALF OF THE EPA:

9 THOMAS C. NASH, Esq.

U.S. Environmental Protection Agency

10 Office of Regional Council

Mail Code C-14J

11 77 West Jackson Blvd.

Chicago, Illinois 60604-3590

12  
13 ON BEHALF OF DEFENDANT VALLEY ASPHALT:

MARTIN H. LEWIS, Esq.

14 (Via Telephone)

Tucker Ellis & West LLP

15 1150 Huntington Building

925 Euclid Avenue

16 Cleveland, Ohio 44115

17 ALSO PRESENT:

18 Ken A. Brown, ITW

Scott Arentsen, DP&L

19 Kaitlyn Harantschuk, Legal Assistant

1                   EDWARD GRILLOT,  
2   a witness being of lawful age, having been duly  
3   cautioned and sworn, did testify upon her oath as  
4   follows:

5                   DIRECT EXAMINATION

6   BY MR. SILVER:

7                 Q     Good morning, Ed. Can you state your  
8   full name for the record, please?

9                 A     Edward Rene, R-E-N-E, Grillo,  
10   G-R-I-L-L-O-T.

11                Q     How are you doing this morning, Ed?

12                A     Good.

13                Q     I represent a number of parties in a  
14   litigation involving a Superfund. I represent  
15   three parties. One of them is NCR Corporation, a  
16   second one is Hobart, and a third one is  
17   Kelsey-Hayes. Other ladies and gentlemen in the  
18   room represent our -- what you might call our  
19   opponents in the litigation, defendants in the  
20   litigation. They will also get a chance to ask you  
21   questions if they so choose.

22                A     Okay.

23                Q     I just want to start off with a few  
24   instructions for you. First, we are taking this  
25   deposition pursuant to the Federal Rules of Civil

1 Procedure, and I have requested reading and signing  
2 by the witness.

3 As far as instructions, Ed, I think the  
4 first thing I want you to remember is that all your  
5 answers should be audible, out loud.

6 A Okay.

7 Q Try to avoid nods and shaking your  
8 head. The court reporter, Susan, will pick those  
9 up, but she probably doesn't want too many of  
10 those. It's best if you speak out loud. Also,  
11 Marty on the phone is more likely to hear you if  
12 you talk out loud. Go ahead.

13 A I have a hard time hearing, so I might  
14 have --

15 Q I'll speak up.

16 A Somebody might have to repeat. I'll  
17 ask to repeat the question. Is that okay?

18 Q Yeah. In fact, I was going to say  
19 that if you can't hear me, or even if you hear me  
20 but don't understand my question because I'm  
21 fracturing the language, please just tell me that.

22 A Okay.

23 Q And I'll rephrase it or repeat it.

24 A Okay.

25 Q So far so good? You can hear me

1 pretty well?

2 A Yes.

3 Q You want me to pick it up a little  
4 bit?

5 A Doing good.

6 Q All right. So what I'm going to do is  
7 ask you a series of questions. Another important  
8 instruction is we don't want to act like we're  
9 school girls on the school bus and talk over each  
10 other. I'm going to ask my question and try to get  
11 to the question mark, and then even though you know  
12 where it's going, wait till I finish it, and this  
13 is also for the court reporter --

14 A Sure.

15 Q -- so we don't run over each other.  
16 And I'll try to do the same for your answers. I'll  
17 try not to jump on the back of your answers.

18 Of course, you're going to answer every  
19 question honestly and to the best of your recall.  
20 I point out that a lot of these questions will deal  
21 with events 30, 40, even 50 years ago. But let me  
22 ask you, how's your memory for -- long-term memory  
23 for events that far back?

24 A That's good. But it's sharpened, I  
25 think. I can think more better the past than I can

1 the future or the present.

2 Q If you can think of the future, I'm  
3 going to ask you a few questions, too. Yeah, we'll  
4 focus a little bit on the future, but mostly on the  
5 past.

6 Also, if you need a break for any reason or  
7 just getting tired, we'll take a lunch break, but  
8 if you need --

9 A Okay.

10 Q -- a comfort break or anything else,  
11 please speak up.

12 You also may hear some objections and  
13 banter between the attorneys during the course of  
14 the questioning. Think of that more like a hockey  
15 game that breaks out into a little scuffle.

16 A Okay.

17 Q We'll get back to the hockey game  
18 pretty quickly, and I'll let you know that.

19 A Okay.

20 Q All right. So those are the basic  
21 questions. Let's start with your date of birth.

22 A 11-9-52.

23 Q And that would make you how old?

24 A Fifty-nine.

25 Q And let me ask you about your place of

1 residence. It may be a good way to start it. Are  
2 you registered to vote anywhere?

3 A No.

4 Q Do you own any residence or rent any  
5 residence?

6 A No.

7 Q What would you consider to be your  
8 place of residence?

9 A Right now it would be in North  
10 Carolina.

11 Q And you traveled up here for this  
12 deposition?

13 A Yes, I did.

14 Q Were you provided some expenses for  
15 your travel from North Carolina?

16 A Yes.

17 Q Now, let me ask you about your  
18 parents. Are either of your parents still alive?

19 A No.

20 Q And who was your father?

21 A Cyril John Grillot last name.

22 Q Would Cyril be C-Y-R-I-L?

23 A Correct.

24 Q And when did Cyril pass away?

25 A It would have been in September of

1 1994.

2 Q And your mother's name?

3 A Ruby M., for Marie, Grillot.

4 Q And when did she pass away?

5 A April of 2010.

6 Q Just a couple years ago?

7 A Yeah.

8 Q Now, let me know about where you grew  
9 up.

10 A I started in -- how far back do you  
11 want me to go on my memory?

12 Q All the way back.

13 A Our first residence that I remember  
14 was on Patterson Boulevard in Kettering, and then  
15 we moved to out in Washington Township, and then we  
16 moved to Oakwood.

17 Q Do you remember how old you were when  
18 you moved to -- and what was the name of the  
19 Township with a W? I didn't catch that.

20 A Washington Township.

21 Q Oh, Washington Township.

22 A That would be today considered  
23 Centerville.

24 Q And how old were you when you moved  
25 out to Washington Township?

1           A     I think I was right around seven or  
2 eight, something like that.

3           Q     And then the next move was to?

4           A     Oakwood.

5           Q     Oh, yeah. And how old were you when  
6 you moved to Oakwood?

7           A     Right around ten.

8           Q     And then after that? You stayed in  
9 Oakwood for a while?

10          A     I stayed in Oakwood till I was about  
11 22 years old.

12          Q     And where did you go from there?

13          A     I got married, then moved back there.

14          Q     Back to Oakwood?

15          A     Yeah. So I stayed -- I lived with my  
16 folks, me and my wife.

17          Q     Now, I'm going to talk a little bit  
18 about your family's business. What did your dad  
19 Cyril do for a living?

20          A     He was mostly -- I would call him an  
21 investor, entrepreneur. He had various dealings  
22 going on, mostly with real estate, commercial real  
23 estate. And then he got into coins, and that's  
24 about it. But mostly it was commercial real  
25 estate.

1           Q     Did he have any involvement in  
2     commercial real estate in a dump or landfill  
3     business?

4           A     Yes.

5           Q     And describe that for us.

6           A     Well, he had taken and let his  
7     brothers -- younger brothers start a landfill on it  
8     would have been Broadway Road in Moraine Township  
9     at that time.

10          Q     What were his brothers' names that he  
11     started the business with?

12          A     Cecil would be the youngest -- or  
13     Alcine Grillot would be the youngest. Then there  
14     was Cecil Grillot and then -- or, no. Yeah,  
15     Kenneth. Kenneth would have been the oldest of  
16     those three brothers.

17          Q     And Alcine is A-L-C-I-N-E?

18          A     Yes.

19          Q     And Cecil is C-E-C-I-L?

20          A     Yes.

21          Q     How did the business get started to  
22     your knowledge?

23          A     To my knowledge, when Dad had bought  
24     -- with a gentleman named Fink went in and bought  
25     that area out because it was swamp land. They had

1 a person named Jones -- I think his name was Casey  
2 Jones that started Broadway Sand and Gravel, and  
3 they took sand and gravel out of the pit in that  
4 area. First they sold off the topsoil, and it was  
5 kind of swampy in that area. They sold that off  
6 and made a pit, which made a hole, so they decided  
7 it had to be filled up, and landfill was the  
8 obvious solution at that time.

9 Q And to your knowledge, when did this  
10 sand and gravel operation get started in this area?

11 A From Dad telling me, I think in the  
12 forties somewhere, I think.

13 (WHEREUPON, Grillot  
14 Deposition Exhibit Number 1  
15 was marked for purposes of  
16 identification.)

17 Q Let me put Exhibit 1 in front of you.  
18 Now, Ed, I'm going to represent to you that this  
19 Exhibit 1 is an aerial photograph that was used in  
20 a document involving a remediation, a cleanup. and  
21 I just want to ask you if you have any familiarity  
22 at all about what's depicted in this aerial  
23 photograph?

24 A Yes.

25 Q What's your understanding of what

1     you're looking at?

2             A     Well, I see the layout of -- the  
3     formation of the different operations, you know,  
4     and sites that we started -- or my father's  
5     siblings their operations. I see different areas  
6     and points of interest I guess you could say.

7             Q     We'll get into those in a little bit.  
8     You mentioned the name Broadway as a location of  
9     this --

10            A     Right.

11            Q     -- landfill operation that your father  
12     had. Do you see Broadway on this aerial  
13     photograph?

14            A     The road?

15            Q     Yes.

16            A     Yes, I do. There's a yellow and  
17     orange and then there's a road that goes up and  
18     down north and south from there.

19            Q     We'll look at another diagram in a  
20     minute, but I just wanted to focus you on what  
21     we're looking at.

22            A     Okay.

23            Q     Did the landfill or dump operation  
24     that you're referencing have a name that your  
25     father used for it?

1 A The landfill?

2 Q Yeah.

3 A Yes. My mind just went blank. South  
4 Dayton Dump.

5 Q That's fine. And let me just ask you,  
6 are you familiar -- do you have any past  
7 familiarity with aerial photographs of the South  
8 Dayton Dump?

9 A I don't understand the question.

10 Q Have you seen any other aerial  
11 photographs of the South Dayton Dump?

12 A Yeah, I have one.

13 Q You have one?

14 A Yes, I do.

15 Q What do you have?

16 A My dad's attorney that was handling my  
17 dad's estate had an aerial shot taken, and we all  
18 -- my brothers and sisters asked for a copy. So we  
19 got a big probably 24-by-36 aerial shot. And I  
20 believe that was taken around '95, a little bit  
21 after Dad had passed away in '94.

22 Q And where is that aerial photograph  
23 that you were given? Where is that today?

24 A North Carolina hanging on my wall.

25 Q North Carolina?

1 A Yeah.

2 Q You have it hanging on your wall at  
3 your place in North Carolina?

4 A Yeah.

5 Q Now, let me show you another. I think  
6 we only have a few of those. I'm placing in front  
7 of the witness what we're going to mark as Exhibit  
8 Number 2.

9 (WHEREUPON, Grillot  
10 Deposition Exhibit Number 2  
11 was marked for purposes of  
12 identification.)

13 Q And I'd like you to -- as long as  
14 nobody minds me standing here, this is also a  
15 figure from some remediation documents, and I would  
16 just like you after having looked at the aerial  
17 photograph to let me know if this diagram -- if you  
18 recognize the area depicted on this diagram?

19 A Yes, I -- very familiar.

20 Q And what is it?

21 A Well, on the frontage of Broadway Road  
22 was built several buildings, real estate -- or  
23 commercial buildings that Dad had a contractor come  
24 in that him and Mr. Horace Boesch, who was my dad's  
25 attorney, had built alongside this road frontage.

1 And then behind that was the pit -- we called it  
2 the pit that the gravel pit was there and then  
3 around where it says 5177. And then a gentleman by  
4 the name of Doyle Roberson started -- Dad had  
5 allowed him to put a car -- a car junk yard in this  
6 vicinity right here.

7 Q Before we got too far into that, I was  
8 going to start with sort of a more general  
9 question.

10 A Okay.

11 Q Generally what are you looking at on  
12 this figure, the entire thing? Let me ask it this  
13 way --

14 A It was a dump.

15 Q Which dump?

16 A Dayton -- I mean South Dayton Dump.

17 Q And is this figure something you would  
18 work with to locate various features of the dump?

19 A Correct. Yeah.

20 Q You believe so?

21 A Mm-hmm.

22 Q Well, let's start with some simple  
23 ones. Do you have a pen with you?

24 A Yes.

25 Q Can you mark on there on the figure

1 where Broadway Road is and maybe put it flat if you  
2 can. Maybe just write in "Broadway Road" where you  
3 believe Roadway Road is.

4 A (So complies.)

5 Q Let the record reflect that the  
6 witness is writing the word "Broadway Road" on  
7 figure 2 -- I'm sorry -- on Exhibit 2.

8 MR. LEWIS: What is Exhibit 2, Larry?

9 MR. SILVER: Exhibit 2, Marty, is a figure  
10 from the Streamlined RI/FS OU1. It's Figure 1.7.  
11 It's a parcel map of the site, and it's got some  
12 roads on it, and it has some buildings shown and  
13 various areas of remediation activity at the site.  
14 So if you can pull that up, you'll see it.

15 BY MR. SILVER (Continuing):

16 Q All right. So far you've marked where  
17 Broadway Road is. Is that road to your knowledge  
18 still called Broadway Road?

19 A Pardon me?

20 Q Is that road to your knowledge still  
21 referred to as Broadway Road?

22 A No, it changed.

23 Q And what is it now?

24 A Dryden Road.

25 Q Do you know if it had any other names

1 in the past?

2 A It was Springboro Pike at one time,  
3 and I believe there was another name, but I can't  
4 think of it. It changed from Broadway, I think, to  
5 Springboro Pike to something else and then Dryden.

6 Q And do you have any idea why the names  
7 changed?

8 A Huh?

9 Q Do you have any idea why they kept  
10 changing the name of that road?

11 A I think when the highway came through  
12 they had to reroute some roads, and then -- but  
13 Dryden Road I don't know why that changed.

14 Q And do you see a river depicted on the  
15 Exhibit 2, the figure?

16 A Yes. Correct.

17 Q What river is that?

18 A The Great Miami River.

19 Q Can you write that in for me?

20 A (So complies.) Okay.

21 Q And you see sort of a big pond or lake  
22 in kind of the left bottom -- towards the left  
23 bottom corner of the figure in Exhibit 2?

24 A The quarry or the --

25 Q Where it says Quarry Pond Parcels.

1           A     Right.  Mm-hmm.

2           Q     Do you know anything about that body  
3 of water?

4           A     That was another gravel pit that was  
5 -- after Broadway Sand and Gravel had made the pit  
6 where the landfill is, they started digging over  
7 here.  And that was going to be a future site.  Dad  
8 said that once they moved the operation down that  
9 way that would be part of the dump also.

10          Q     Can you mark in where the Broadway  
11 Sand and Gravel pit was that you referenced?

12          A     (So complies.)

13          Q     Let the record reflect that the  
14 witness is marking Broadway Sand and Gravel on  
15 Exhibit 2.

16               And then you mentioned that that area was  
17 dug out --

18          A     Yes.

19          Q     -- as a gravel pit?

20          A     Mm-hmm.

21          Q     And what happened then?  It became a  
22 landfill?

23          A     Well, just became a pit and was  
24 waiting to be filled in.

25          Q     Was that the first area filled in by

1 your father's business? Not your father's business

2 --

3 A It would be my uncle's business.

4 Q I apologize. It was your uncle's  
5 business?

6 A Right.

7 Q Which uncle was that?

8 A Alcine.

9 Q Alcine Grillot?

10 A Right.

11 Q And your father owned the property; is  
12 that right?

13 A Him and Horace Boesch owned the  
14 property.

15 Q And how is it that your uncle operated  
16 a business on the property that was owned by your  
17 father and Horace Boesch?

18 A Dad allowed his brothers to run that  
19 as a business. I believe, if I'm not mistaken,  
20 they paid Dad a rental fee or, you know, per month  
21 for the use of the land.

22 Q So your Uncle Alcine ran the landfill  
23 business?

24 A Right. And then Kenneth and Cecil  
25 sort of ran it for Alcine.

1 Q Kenneth --

2 A Alcine had another title or another  
3 job that took most of his time, so he was more or  
4 less the owner.

5 Q Of the business?

6 A Right.

7 Q And his brothers, Kenneth and Cecil,  
8 essentially worked for him?

9 A Right.

10 Q Is that it?

11 A Mm-hmm.

12 Q Now, you mentioned an auto salvage  
13 yard. Have you ever heard the name Doyle Roberson?

14 A Mm-hmm.

15 Q Who is Doyle Roberson?

16 A He came up from the South and started  
17 the business of Doyle's Auto Parts.

18 Q And where was Doyle's Auto Parts  
19 located? Tell me verbally, and then I'll ask you  
20 to mark it on the exhibit.

21 A The northern portion of the -- the  
22 beginning of the landfill.

23 Q And do you know when Doyle Roberson  
24 came up and started to begin operating the auto  
25 salvage yard?

1           A     It was late fifties or early sixties.

2           Q     Can you mark on Exhibit 2 where Doyle  
3 Roberson's salvage yard was?

4           A     (So complies.)

5           Q     Let the record reflect he's writing  
6 "Doyle's Auto Parts."

7           All right. Tell me about that operation.  
8 What do you know about that operation?

9           A     I spent a summer working for Doyle,  
10 and he would take in automobiles from the City of  
11 Dayton and general cities in that area, and they  
12 would bring them and put them in his salvage yard,  
13 and then they would take and sell the parts till  
14 they got too old, and then they would discard them  
15 and send them off to be recycled.

16          Q     Now, can you remember what year you  
17 worked for Doyle or how old you were when you  
18 worked for Doyle? That would be a better question.

19          A     He gave me a work permit. I quit  
20 school, and I was 16, and that would have been  
21 right around 1970, '71, somewhere in that area.

22          Q     And tell me -- you mentioned that he  
23 received automobiles from the City of Dayton?

24          A     Right.

25          Q     I assume they didn't give him new

1 automobiles?

2 A No, no, no.

3 Q What was he getting from the City of  
4 Dayton?

5 A He would get the automobiles. That  
6 was my job. I would take the registration or the  
7 title that they could find or get, and we had  
8 little cards that we would send back to the City  
9 and somehow he would get -- release the titles or  
10 whatever.

11 Q Were these automobiles that were  
12 abandoned or what?

13 A Right. You know, things that they  
14 would tow off the road and things of that nature,  
15 you know. Abandoned, yeah.

16 Q And you mentioned other cities, too,  
17 supplied the automobiles?

18 A I think Kettering, I believe, and West  
19 Carrollton I think was the two others.

20 Q And then tell me what Doyle would do  
21 with the automobiles once they came to his yard.

22 A Well, like I said, they would -- the  
23 public would come and pick out what parts they  
24 wanted, and once they were parted out then they  
25 would take and strip the gas tank and empty the oil

1 out of the casing of the motor and then set the car  
2 on fire.

3 Q What about the oil? Where would that  
4 go after it was emptied out of the casing?

5 A In the ground. That and the gas was  
6 in the ground.

7 Q The oil and gas from these automobiles  
8 that came to Doyle's yard were put on the ground?

9 A Right.

10 Q Did you observe that personally?

11 A Oh, yeah.

12 Q That was his regular practice from  
13 what you saw?

14 A Right.

15 Q Now, let me ask you about have you  
16 ever heard the expression "burning dump," a  
17 "burning dump"?

18 A That was what mostly was done to the  
19 dump. It was a burning dump. We destroyed  
20 burnable materials, and then what was left over was  
21 salvaged out of what was burned and they pushed the  
22 ashes over.

23 Q To your knowledge from what you  
24 experienced with the South Dayton Dump, was the  
25 South Dayton Dump a burning dump?

1 A Yes.

2 Q Do you know whether -- to your  
3 knowledge or the information you received from your  
4 family do you know when it started as a burning  
5 dump?

6 A I think it was right -- I remember in  
7 the early days -- I was very young, but they would  
8 take garbage, and it didn't work out. It didn't  
9 burn very well. So they quit taking that, and they  
10 went into more perishable household goods and stuff  
11 that came from different clients. So I would say  
12 probably in the late fifties.

13 Q It started as a burning dump?

14 A Yeah.

15 Q It wasn't a burning dump in the  
16 forties?

17 A It could have been, but I don't  
18 remember. But, you know --

19 Q You don't remember personally?

20 A Being young I remember seeing, you  
21 know, food products, you know, brought in. And  
22 that would -- that would be very early in the  
23 stage.

24 Q You mentioned other clients. What  
25 sort of stuff was coming in that was burnable?

1           A     Volunteers of America the furniture  
2     and stuff would come from them. And Goodwill -- it  
3     wasn't Goodwill, but there was three like Salvation  
4     Army companies. Volunteers of America was the  
5     other. And they would bring most of the stuff that  
6     burned real well like furniture and clothing and  
7     stuff, you know.

8           Q     Now, just talking a little bit more  
9     about the burning, where did the burning take place  
10    that you observed at the South Dayton Dump? Why  
11    don't you describe it orally, and then we'll see if  
12    you can find it on the figure in front of you,  
13    Exhibit 2.

14          A     We had two tiers. We had -- close to  
15    the bottom of the pit we had one tier, and then the  
16    top tier we corded it off and they would alternate  
17    burns and allow one to cool off while maybe  
18    one-quarter down on the bottom tier would burn.  
19    And that would allow for me and whoever might be  
20    helping to pick out copper and brass and products  
21    out of the cool pile. So then they'd alternate,  
22    you know. There was always a burn maybe every week  
23    or every couple weeks.

24          Q     Now, two tiers and you mentioned a  
25    pit?

1 A (Nodding in the affirmative.)

2 Q How is the pit related to the tiers?

3 A Well, the pit was the lowest area of  
4 the dump. That was the bottom of the gravel pit.  
5 And it pretty much contained rain water, you know,  
6 and whatever would seep up, I think, from the  
7 ground. And that was mainly used for emptying the  
8 drums out, and then fly ash from DP&L and the  
9 different products from DP&L would be put down  
10 there.

11 Q Down in the pit?

12 A Down in the pit area.

13 Q We're covering a lot of ground here,  
14 so I'm going to try to take it one piece at a time.

15 A Pardon?

16 Q We're covering a lot of ground here,  
17 so I'm going to try to ask you one question at a  
18 time here so we can get it all down. Let me start  
19 with the burn area that you referenced in the  
20 tiers. Can you show me on the Exhibit 2 in front  
21 of you where these two tiers were? And maybe draw  
22 them in for us if you can. A nice selection of  
23 pens there.

24 A Yeah.

25 Q Okay. He's drawing with a green pen

1 now.

2 A It was right -- let me get a reference  
3 to where -- one tier would be about there and then  
4 the other tier.

5 Q Can you write in "tiers" so we know  
6 what you're talking about?

7 A (So complies.)

8 Q Let the record reflect on Exhibit 2  
9 the witness has put two green lines and wrote the  
10 words "Tier 1" and "Tier 2."

11 And you mentioned the pit. Where was the  
12 pit?

13 A The pit would be in this area right  
14 here. Then we had --

15 Q Slow down. Slow down.

16 A Okay.

17 Q Can you write in the word "pit"?

18 A (So complies.)

19 Q Let the record reflect on Exhibit 2  
20 the witness with a green pen has drawn a circular  
21 area and wrote the word "pit" in the middle.

22 Now, then you were about to say something  
23 else?

24 A Yeah. We had another tier that came  
25 this way, and this is where most -- okay. This is

1 Tier 3.

2 Q All right. On Exhibit 2 the witness  
3 has written -- drawn in another tier and called it  
4 Tier 3. You were about to say something about  
5 that, about Tier 3?

6 A It was mostly -- liquids would come  
7 down in here. The fly ash that came from DP&L,  
8 there was like a fine substance and then the  
9 heavier fly ash that we took the dozer and pushed,  
10 and that's what -- we were trying to make a solid  
11 base in this area here. Then the rest of the dump  
12 would have come that way.

13 Q I'm having a little trouble with your  
14 directions here. Can you try to describe sort of  
15 more in -- without pointing to the figure what you  
16 were just telling us about?

17 A Well, Tier 3 would be heading east to  
18 west in the bottom of the pit. Tier 1 and 2 would  
19 come from the north. Does that help?

20 Q That helps. Now, as to Tier 3, let me  
21 know what you were talking about with the fly ash  
22 coming did you say from DP&L; is that right?

23 A Yeah.

24 Q And how was that used and where was  
25 that put?

1           A     It was the very softer -- it was  
2     almost like flour I would say, but it was black,  
3     and that was -- it didn't make very good footing.  
4     So then when the harder stuff it looked like --  
5     looked like metals, and it was bigger. It was  
6     almost like gravel I would say. And that was put  
7     on the top sort of where the dozer and the trucks  
8     could drive over it.

9           Q     And how was the -- did the ash, either  
10    the softer or the harder stuff, have a particular  
11    function in the operation?

12          A     Pardon me?

13          Q     Did the ash you referred to or the  
14    gravel that you just referred to have a particular  
15    function in the operation of the landfill?

16          A     It was more to cover things up, if  
17    that's what you're referring to.

18          Q     Now, you mentioned DP&L being the  
19    source of the finer ash.

20          A     Right.

21          Q     And what's your basis of knowledge  
22    that it was coming from DP&L?

23          A     There was an electrical facility right  
24    down the road called the Tait Station, I believe,  
25    and it came from -- it was a coal-burning thing,

1 and that's where that stuff came from.

2 Q Did you observe it coming from Tait?

3 A Yeah, mm-hmm.

4 Q You saw it yourself?

5 A Yeah.

6 Q In DP&L trucks?

7 A Yeah.

8 Q How did you know they were DP&L  
9 trucks?

10 A Well, it's been 40, 50 years ago, but  
11 I remember the trucks would come in various sizes.  
12 The fly ash and stuff like that would come in like  
13 dump trucks, but I remember the logo at that time  
14 pretty -- it's almost like it was yesterday.  
15 That's pretty much --

16 Q This was a logo -- a DP&L logo?

17 A Right.

18 Q Can you describe it for us?

19 A It had DP&L -- or Dayton Power and  
20 Light, and then it had a man. There was a light  
21 bulb, and it had an arm come out, and it had a bolt  
22 of lightening on it.

23 Q And the light bulb had like a face of  
24 a man on it?

25 A Yeah, mm-hmm.

1 Q Is that right?

2 A Yeah.

3 Q Had you ever seen that logo other than  
4 on these trucks?

5 A When I was younger I remember it being  
6 on TV on channel 7.

7 Q Seeing the same logo?

8 A Like they would sponsor something on  
9 TV. And then I'm not positive. I thought they  
10 were on some of the transformers, too. These  
11 things that they brought in had something to do  
12 with electrical devices. We called them  
13 transformers.

14 Q Just to clarify, did you observe DP&L  
15 bringing electrical devices you called transformers  
16 into the South Dayton Dump?

17 A Right.

18 Q The answer is?

19 A Yes.

20 Q Remember to wait till I get to my  
21 question mark before you answer because we're  
22 running over a little bit.

23 A Okay.

24 Q And what kind of vehicles did the  
25 things you called transformers come in?

1           A     Various trucks, but mostly they had  
2 either like a boom to take 'em off or they came  
3 where a tailgate would go down, and Kenny would  
4 have 'em put 'em all in one particular area of the  
5 dump.

6           Q     What particular area of the dump did  
7 Kenny have the drivers put the things you called  
8 the transformers? And he's pulling out a light  
9 blue pen and looking at Exhibit 2 and marking an  
10 area.

11          A     (So complies.)

12          Q     T-R-A-N-S?

13          A     Mm-hmm.

14          Q     You want to finish that off?

15          A     (So complies.)

16          Q     F-O-R-M-E-R-S. And tell me about the  
17 area you just marked "transformers."

18          A     The transformers were put to the very  
19 west rim of the dump. There was a dropoff down to  
20 the river, and they were put along that side there.

21          Q     Was that on a ridge or on a slope or  
22 what?

23          A     Yes, on a ridge.

24          Q     And were they buried?

25          A     No, no. They sat up.

1           Q     And what about did these -- to your  
2     knowledge, did these transformers have oil in them?  
3     And, if so, what happened to the oil?

4           A     There was a liquid in it, but we never  
5     touched 'em. We weren't -- they just was put there  
6     to my knowledge.

7           Q     Are you aware -- had you observed the  
8     liquids yourself in these transformers?

9           A     Me and my cousin opened one up just to  
10    see, yeah. We kind of played on that dump, so, you  
11    know.

12          Q     This is when you were a kid?

13          A     Yeah.

14          Q     How old more or less?

15          A     Between ten and 13 maybe, something  
16    like that.

17          Q     Do you know whether anyone at the dump  
18    attempted to extract any materials from the  
19    transformers for resale?

20          A     I don't know.

21          Q     Do you know whether Alcine had any  
22    involvement in trying to pull out salvageable  
23    materials from the transformers?

24          A     If there was something there worth  
25    money, Alcine would have gotten it out. Trust me.

1           Q     I believe you. So then my question  
2 is, did you observe any activity by Alcine with the  
3 transformers?

4           A     Not personally.

5           Q     Now, a lot of things to talk about. I  
6 just wanted to catch up with one more thing you  
7 mentioned. You mentioned something about drums  
8 coming into the site and the liquids going into did  
9 you say a pit?

10          A     Right. The pit that we discussed and  
11 I put down in the green --

12          Q     You marked in the pit?

13          A     Right.

14          Q     In green on Exhibit 2.

15          A     So it would be the very west part of  
16 the landfill.

17          Q     And it looks like it's right above  
18 something called the Large Pond. Do you see that?

19          A     Yes.

20          Q     So let me know -- tell me about --  
21 well, let me ask this question. Do the drums go  
22 whole into the pit with the container?

23          A     Well, unfortunately, when they'd dump  
24 it whatever -- if they didn't have the lids on them  
25 and stuff, they would empty out right away. But we

1 had to go down and bring 'em up, and so some of 'em  
2 would go down there. If they were real heavy and I  
3 couldn't get 'em out, then that's where we'd empty  
4 'em out right there.

5 Q Okay. So just so I have it, it sounds  
6 like you're telling me that the drums were emptied  
7 -- the content of the drums were emptied into the  
8 pit? Did I hear that?

9 A No. The ones that did not have lids  
10 they still had liquid in 'em, but they would spill  
11 -- as they dumped the load, they would slide down  
12 and then they would spill into the pit area.

13 Q Okay.

14 A And then some that did have lids on it  
15 they had the cap on it, they would either go  
16 directly into the fly ash or some would roll down  
17 in the pit. We had to go down there. It was a  
18 mess.

19 Q Why did you go down there? To pull  
20 the drums out?

21 A Yeah, to -- yeah.

22 Q I'm trying to get this straight. When  
23 the drums were -- or the drums and their contents  
24 went into the pit, you would try to salvage the  
25 drums?

1 A Right.

2 Q Ah. So the drums themselves, the  
3 containers were generally salvaged and taken --

4 A Yeah, yeah.

5 Q And their contents went into the pit?

6 A Yeah.

7 Q And then what happened to the drums?  
8 What did you do with those?

9 A We'd drag 'em up. We'd get like 40,  
10 50 at a time, put 'em in the back of a truck and  
11 then pick 'em up and I would have to take the lids  
12 off or beat -- some of 'em were just formed solid.  
13 They didn't have a lid that I could take off.  
14 They'd have a cap on 'em. So I'd have to take a  
15 hammer and chisel and break the rim, cut and make  
16 it a usable drum, and then -- that's what.

17 Q So basically it sounds like the goal  
18 was to get the drum in a condition without a top?

19 A Right.

20 Q Okay. And then what did the operation  
21 do with the drums that were --

22 A They were --

23 Q -- taken the head off of?

24 A I'm sorry.

25 Q Yeah. Just tell me what happened to

1 those drums after that.

2 A They were sold.

3 Q Who were they sold -- who sold them  
4 and who were they sold to?

5 A Alcine would sell 'em to the Highway  
6 Department or a city, you know. And they would  
7 take 'em and then paint 'em. Those were the drums  
8 like today they have the plastic barrels.

9 Q So Alcine's operation didn't paint  
10 them --

11 A No.

12 Q -- himself?

13 A No.

14 Q So he'd sell the drums with basically  
15 the tops taken off?

16 A Right.

17 Q And the liquids were already poured  
18 out into the pit; is that right?

19 A Mm-hmm.

20 Q And you observed -- you participated  
21 in this process?

22 A Yeah. That was part of my job was to  
23 take and beat the drum open so it could be used.

24 Q I want to get a little background on  
25 your personal involvement. We talked a lot about

1    what you were involved in and observed.  Let's get  
2    a little bit of history on your personal  
3    involvement with the South Dayton Dump.  When did  
4    you personally -- I think it's best to talk about  
5    your age -- start going to the dump?

6           A     When did I start going?

7           Q     Yeah, visiting the dump.  At what age?

8           A     As far as I can remember, I would  
9    always go with Dad in the car, and he would  
10   observe, drive me around the landfill.  And then  
11   when I got old enough to --

12          Q     We'll get to that.  You say as far as  
13   you can remember.  How far back can you remember?  
14   What age would you say?

15          A     Five to seven maybe.

16          Q     And then you were going to say and you  
17   got old enough.  What happened when you got old  
18   enough?

19          A     They let myself and my cousins work on  
20   the dump.

21          Q     And about age -- what age was that?

22          A     From about eight until -- I started  
23   out at eight.

24          Q     Okay.  And what was the first work you  
25   did at the dump?

1           A     I would take apart motors, fans.

2     First they had us go down into the tiers and grab  
3     whatever could be taken to use -- get the metals  
4     out of 'em, fans, motors.

5           Q     How about nails out of pallets? Ever  
6     do that?

7           A     No.

8           Q     Okay. So you pulled fan motors out.  
9     Other metal?

10          A     Mm-hmm.

11          Q     Mechanical devices?

12          A     Mm-hmm. TVs. A lot of radios would  
13     come in. We'd get the tubes out of 'em and wire,  
14     whatever was salvageable. Speakers had cones of --  
15     coil of copper, and we'd take them apart and strip  
16     'em.

17          Q     And this is stuff that came out of the  
18     burn piles?

19          A     Yes, mm-hmm.

20          Q     You waited till the burn piles cooled  
21     and then pulled out the metal and other --

22          A     The first part we -- 'cause if you  
23     burned them it was hard to get the nuts and bolts  
24     off of 'em. So we dragged most of that out before  
25     you burned the pile. Then if they had -- if they

1     were bigger where they had a plastic coating on it,  
2     then we'd leave 'em in the burn pile and wait for  
3     'em to burn.

4             Q     Now, you said you were doing that, and  
5     you mentioned somebody else with you?

6             A     Yes. I had a couple of cousins that  
7     was involved in that, too.

8             Q     And what were your cousins' names that  
9     were working with you on the --

10            A     Mike Wendling, W-E-N-D-L-I-N-G, and  
11     Tim Wendling, W-E-N-D-L-I-N-G, and then Butch  
12     Grillot, G-R-I-L-L-O-T.

13            Q     Any of those three still alive?

14            A     Mike and Tim Wendling are still alive.

15            Q     Now, at the age of nine and ten were  
16     you doing -- I'm sorry -- age of eight, nine, ten,  
17     that period of your life, were you doing anything  
18     else at the landfill other than the salvage work at  
19     the burn pile?

20            A     We had a gentleman that lived on the  
21     dump itself. His name was Bud Young. Bud was an  
22     older gentleman, and I would go with him and help  
23     him pull out the drums. He was more like -- Bud  
24     was kind of like showing me the ropes. Alcine and  
25     them thought they were training me I guess would be

1 the word.

2 Q Now, when you mentioned pulling out  
3 the drums, that was from the pit?

4 A Yes.

5 Q And you referred to that earlier?

6 A Right.

7 Q Anything else during those earlier  
8 years other than what you did at the burn pile and  
9 working with Bud Young pulling out the drums?

10 A General Motors had brought in a lot of  
11 brake parts that held brake fluid, and they would  
12 dump loads of 'em. And we would take 'em from the  
13 ground and take -- there was a plastic cover on  
14 'em. Take the plastic cover off and then throw 'em  
15 in a dumpster to be picked up for metal. I did  
16 that a lot.

17 Q Now, as you got older, did you  
18 continue to work at the dump, at the South Dayton  
19 Dump?

20 A Right till I was up around 15, and  
21 then I started at 16 like I mentioned working for  
22 Doyle's Auto Parts.

23 Q Right at the site?

24 A Yeah, at the site.

25 Q Did you ever have any experience with

1 running magnets along the roads --

2 A Yeah.

3 Q -- on the site?

4 A Yeah.

5 Q Tell me about that.

6 A When the trucks would come in they'd  
7 drop a lot of nails, and during the end of the day  
8 I'd take the magnet and go up and down the lane  
9 where all the trucks would come to pick up -- pick  
10 up metals, you know, nails and things that would  
11 puncture tires. Because that was a big expense for  
12 all of us because they'd get nails in their tires.

13 Q And you did that when you were a  
14 little older?

15 A Yeah, older. Younger and older both.

16 Q Okay. And you mentioned earlier that  
17 you used a hammer and chisel to pop the lids off of  
18 drums?

19 A Right.

20 Q And what age did you do that, if you  
21 already didn't tell me? I kind of forget.

22 A From about ten to when I quit the  
23 dump.

24 Q When you quit the dump you went to  
25 work for Doyle or did you continue to do that?

1           A     Later in age I'm talking about. I  
2 would go on weekends. If they got a big order or a  
3 lot of drums in, I'd go over there to help 'em out.

4           Q     I see. Help out with the drums in the  
5 pit?

6           A     Right.

7           Q     Now, when you were at that younger age  
8 in school, did you work -- did you go to the  
9 landfill after school?

10          A     Most of it was -- through the  
11 wintertime was in the weekends, holidays. And then  
12 the summer -- we spent spring, summer and fall  
13 there.

14          Q     Summer were you there every day?

15          A     Yeah, yeah.

16          Q     And spring and fall would be school  
17 time, so how did you deal with the dump then?

18          A     It was cold and wet.

19          Q     Well, what time -- did you go after  
20 school? Did you go on the weekends? What was your  
21 --

22          A     It was weekends. And then Alcine made  
23 a deal with me. He'd give me 50 cents per barrel  
24 to get the lid off of it, so I would make a little  
25 bit more money.

1           Q     You got efficient with popping those  
2     barrel tops off.

3           A     Yeah.

4           Q     So what about the busy part of the  
5     year for the dump? Was it busier one season than  
6     another?

7           A     It was pretty constant all year  
8     around. The public slowed down in the winter, but  
9     the industrial part of it stayed busy pretty much  
10    all year round.

11          Q     You refer to public versus industrial.  
12    Are you referring to the regular clients versus the  
13    general public?

14          A     Probably would be homeowners, home  
15    people that bring their house debris or whatever.

16          Q     In a pickup truck or something like  
17    that?

18          A     Yeah.

19          Q     How were they charged?

20          A     Whatever -- if they had something  
21    really neat on there, we would charge 'em less to  
22    get the neat stuff. Otherwise they'd say, "Aw,  
23    it's too much," and pull away. But if it wasn't  
24    something we wanted, it would be a certain price.

25          Q     How were the industrial customers

1 charged?

2 A Most of 'em were on charge. We'd fill  
3 out a -- like a ticket. It was a piece of paper.  
4 We'd have one load for whatever the truck was, dump  
5 truck or we called 'em -- rollbacks I think is what  
6 we called them, but they were ones that were  
7 brought up on a truck like a dumpster.

8 Q Now, you said they were on charge.  
9 What do you mean by that?

10 A Pardon me?

11 Q You said the industrial customers were  
12 mostly on charge.

13 A Right.

14 Q What do you mean by that?

15 A No monies was brought between the  
16 driver and whoever was in the office at the time.

17 Q But they didn't dump for free, I take  
18 it?

19 A No, no.

20 Q Do you know how they --

21 A Then the tickets would be picked up in  
22 the evening by Alcine, and he took 'em, I guess, to  
23 his office or home or whatever.

24 Q I'm going to show you another exhibit.  
25 I think we're up to Exhibit 3. This is a one-page

1 exhibit. It's got a few different items on it.  
2 It's got a Bates stamp of DP&L, four zeros and then  
3 345. That's for the record.

4 (WHEREUPON, Grillot  
5 Deposition Exhibit Number 3  
6 was marked for purposes of  
7 identification.)

8 Q You have in front of you Exhibit 3,  
9 and I see four it looks like photographic copies of  
10 dumping receipts, and I wanted you to take a look  
11 at those and let me know if you recognize those  
12 receipts?

13 A Oh, yeah.

14 Q Can you explain what they are?

15 A Well, that's what we'd give -- what  
16 we'd take and put in a box, you know, when someone  
17 would bring a load in that was on charge.

18 Q And who would fill out these dump  
19 receipts?

20 A Mostly -- whoever was in the office,  
21 but mostly Kenneth Grillot, my Uncle Kenny.

22 Q And why was Uncle Kenny the guy who  
23 would be filling out these dumping receipts?

24 A 'Cause he stayed in the trailer all  
25 the time and would strip metals. He had like a

1 work bench, and while he was waiting for loads to  
2 come in he would get -- the fans and stuff we'd  
3 bring in, he would dismantle the actual motors.  
4 Then when a load would come in he would walk out to  
5 the road and give a ticket.

6 Q You mentioned a trailer location.  
7 Let's just take a step back. Can you identify --  
8 was there a single location that served as the  
9 entry to the South Dayton Dump and Landfill?

10 A Well, it would vary with years because  
11 it started in one spot and then ended up somewhere  
12 else as the dump progressed, and then the auto  
13 salvage yard would gobble up whatever room that we  
14 had made as a top tier.

15 Q So the auto salvage this is Doyle you  
16 were talking about?

17 A Mm-hmm.

18 Q That would grow as the --

19 A Right.

20 Q -- landfilling operation moved?

21 A Right.

22 Q What was the general direction of the  
23 movement of the landfill operation?

24 A From north to south.

25 Q Going back to figure 2, can you

1 identify where the various entry locations were  
2 into the South Dayton Dump?

3 A (So complies.) Entrance 1 --

4 Q Okay. Slow down a second. I just  
5 want to let the record reflect that the witness has  
6 marked figure 2 by writing in a black pen "Enter 1"  
7 towards the top of the exhibit. Can you put a  
8 circle around that so it will be a little easier to  
9 see?

10 A (So complies.)

11 Q And what was Enter 1?

12 A That was the beginning of the site,  
13 the landfill.

14 Q The operation that Alcine ran?

15 A Right.

16 Q And what happened at Entrance 1 or  
17 Enter 1?

18 A What happened?

19 Q Yeah. I mean, is that where the  
20 trucks came in?

21 A That's where the trucks -- it was  
22 gated off and locked. In the morning the gate  
23 would be opened, and then the trucks and so on  
24 would come in that way.

25 Q And was there an office location there

1 near Enter 1?

2 A Mm-hmm.

3 Q And what was the office there? Was  
4 that a trailer?

5 A No, it was a building that was --  
6 office. (Indicating)

7 Q Okay. That looks good. Let me just  
8 let the record reflect that the witness has written  
9 the word "Office" in just below and left -- he put  
10 an "Office 1" just below and left of Entrance 1.

11 Was that an existing building, Office 1, at  
12 the time, I assume; right?

13 A Pardon me?

14 Q There was a building there at the  
15 time?

16 A Yeah. This was a brick building. It  
17 had a -- my father got an Army building brought to  
18 the site, and they put it together. And that's  
19 where they stored all of the drums of copper, brass  
20 and stuff like that.

21 Q This is the metal that they had  
22 recovered?

23 A Yes, mm-hmm.

24 Q And does that building still exist?

25 A Yes.

1           Q     Now, when was the last time you had  
2 the opportunity to visit the site?

3           A     A gentleman and myself went there  
4 Sunday.

5           Q     Sunday as in three days ago?

6           A     Yes.

7           Q     And did you observe that building that  
8 you just referenced as Office 1?

9           A     Yes.

10          Q     So it's still there?

11          A     Mm-hmm.

12          Q     I'm just curious. When was the last  
13 time you visited the site prior to Sunday?

14          A     Ten years ago.

15          Q     More or less?

16          A     Yeah.

17          Q     All right. Let's keep going.

18                You've identified the initial entrance to  
19 the dump as Enter 1 and nearby Office 1. Before we  
20 move on, during -- you know, I may be testing your  
21 memory here, but during what period of time at  
22 least during your life was Entrance 1, Enter 1 in  
23 use?

24          A     Like I said, from five to -- five to  
25 maybe nine that building was used, I believe.

1           Q     And five to nine would be your age at  
2     the time; is that right?

3           A     Right.

4           Q     So if you were born in '52, that would  
5     be like '57 to -- 1957 to 1961?

6           A     Right.

7           Q     Then what happened next?

8           A     We moved the office location to  
9     another site.

10          Q     To another site?

11          A     Mm-hmm.

12          Q     Or to another location on the site?

13          A     It was moved -- (indicating).

14          Q     Let the record reflect the witness  
15     marked on Exhibit 2 "Enter 2" somewhere several  
16     inches below Enter 1 along what he had marked as  
17     Broadway.

18                 And did -- was Enter 1 associated with --  
19     I'm sorry -- Enter 2 also associated with an  
20     office?

21          A     Yes. It was also a brick building.

22          Q     Tell me more.

23          A     The office -- that office also had a  
24     back where the metals were stored, and it was gated  
25     off again. And a new gate was put in, and that's

1 where Kenny would take -- have the drivers come  
2 through to go back into the landfill.

3 Q Did Kenny continue to strip metal in  
4 the building?

5 A Yeah, mm-hmm.

6 Q And does that building still exist  
7 where Enter 2 is?

8 A It was a different building than Enter  
9 1.

10 Q Right. Is that building still on the  
11 site?

12 A Yes.

13 Q Is it also on this figure in front of  
14 you, Exhibit 2?

15 A Correct.

16 Q Can you mark off where the building 2  
17 was, Office 2 was?

18 A (So complies.)

19 Q Okay. Let the record reflect that  
20 using a light blue pen the witness marked off  
21 Office Number 2 adjacent to Enter Number 2.

22 Okay. And during what period of your life  
23 was Enter 2 in use at the --

24 A From around '61 till about '68, I  
25 think.

1 Q So between your ages nine and 16?

2 A Mm-hmm.

3 Q Does that sound right?

4 A That's about right, yeah.

5 Q And then what happened -- was that the  
6 end of it? Was that the last entrance?

7 A We moved one more time.

8 Q Kept moving. And the reason for the  
9 movement was the movement of the landfill --

10 A Right.

11 Q -- north to south?

12 A Right.

13 Q So what about the third entrance?  
14 Let's hear about that.

15 A The third entrance changed a little  
16 bit because there were no more buildings actually  
17 to -- for Alcine to use. So he picked up a  
18 trailer, an old mobile home I guess you'd call it,  
19 and run -- ran the office out of that. And then  
20 the materials were -- he picked up old Kroger and  
21 Liberal Markets trailers, and we set them on the  
22 site, and that's where the metals were locked up in  
23 those.

24 Q Okay. So why don't you mark for us on  
25 Exhibit 2. And he's using a dark blue pen. He's

1 choosing.

2 A Well, let's use dark blue.

3 Q Okay. A dark blue pen on Exhibit 2.  
4 He's going to mark "Enter 3"? Is that what you  
5 want to do?

6 A Yes. (So complies.)

7 Q Which looks like it's a little bit  
8 south of Enter 2.

9 And what about the trailer? Where was that  
10 located?

11 A Trailer was right this area here.  
12 (Indicating.)

13 Q Office trailer location he's marking  
14 on Exhibit 2 is Office 3, and he threw in a little  
15 rectangle for where the trailer was. Okay. Very  
16 good.

17 And is that trailer still there?

18 A No.

19 Q And do you know that because you  
20 didn't -- you couldn't find it when you were at the  
21 site on Sunday?

22 A Right, right.

23 Q That's correct?

24 A Right. Correct.

25 Q Do you know what happened to the

1 trailer?

2 A No.

3 Q Could it have been buried?

4 A I don't think so.

5 Q Now we're talking about the future  
6 instead of the past; right?

7 All right. So how are you doing? Would  
8 you like a little break?

9 A No, I'm fine.

10 Q You're doing good. Okay. You're  
11 wearing me out.

12 Now, let's just go back and pick up some of  
13 your personal history. When did you become  
14 licensed to drive as you were growing up? What  
15 age?

16 A Are you talking legally or illegally?

17 Q Well, let's start with legally since  
18 we have somebody here from the government.

19 A Sixteen.

20 Q You might have done a little driving  
21 before then?

22 A On the dump that was one of the --

23 Q Off road; right?

24 A That was kind of a neat thing being on  
25 the dump. We were allowed to drive as long as we

1     could reach the pedals.

2                 Q     What would you drive before you were  
3     16 when you were reaching the pedals?

4                 A     It was the oldest vehicle on the  
5     place, and it was -- it was -- I remember it had a  
6     starter on the floor. It was an electric starter  
7     on the floor. I could barely reach it to get down.  
8     We just used it to go around and pick up the -- as  
9     we got older, we were allowed to drive. Instead of  
10    going down and putting them in a wheelbarrow or  
11    five-gallon bucket, we were allowed to go around  
12    the dump and pick up fans and motors. Made it a  
13    lot easier.

14                Q     So you used that vehicle to get around  
15    early on before you were 16 --

16                A     Right.

17                Q     -- to pick up salvaged metals from the  
18    burn areas?

19                A     Right.

20                Q     And you continued to do that after you  
21    became legally eligible to drive on the highway?

22                A     Yeah.

23                Q     I'm not sure it was illegal to drive  
24    on the dump before you're 16. We have to get a  
25    legal opinion on that.

1           A     It's neat to go to school and tell the  
2 kids you're already driving.

3           Q     Sounds good. At some point did you  
4 start driving a bulldozer on the site?

5           A     I had jumped from South Dayton Dump to  
6 another landfill that was owned by a friend of  
7 Alcine's, and I started driving heavy equipment  
8 there.

9           Q     This was -- was this -- have you ever  
10 heard of Powell Road Dump?

11          A     Yes. That's where I worked.

12          Q     What age did you go to work at Powell  
13 Road?

14          A     That would have been when I was about  
15 17 to 18.

16          Q     About a year?

17          A     Yeah.

18          Q     And after you worked at Powell Road,  
19 did you come back to work at South Dayton?

20          A     Yeah. After Alcine had heard that I  
21 was out there running the dozer, he asked for me to  
22 come over to his house and he offered me more money  
23 to come back on the dump.

24          Q     And run a dozer for Alcine?

25          A     Right.

1           Q     Then you did that? Did you run a  
2 dozer for Alcine?

3           A     Right.

4           Q     About how long were you doing that for  
5 him?

6           A     For about a year, two years.

7           Q     And where did -- now we'll stick with  
8 the site. Powell Road we'll wait for another  
9 lawsuit.

10          A     Right.

11          Q     Leave that aside. Back to South  
12 Dayton. When you were running the bulldozer,  
13 driving the bulldozer, what did you do -- what was  
14 your function at South Dayton Dump in driving the  
15 bulldozer?

16          A     Mostly in the morning I'd have to get  
17 the equipment checked out, make sure it had oil and  
18 diesel fluid. Alcine had bought an old D7 dozer  
19 that had a hydraulic leak. It was so old it had  
20 hydraulic leaks. So I had to go find these old  
21 drums that appeared to be hydraulic fluid, and we  
22 would fill the hydraulic cylinders every morning.  
23 And then I would start pushing the fly ash and  
24 stuff on Tier 3. And then after they would burn  
25 off of Tier 1 or Tier 2, then I'd go over there and

1 push the ash and stuff over to the side of the  
2 bank.

3 Q And this was -- this was at the burn  
4 piles?

5 A Yeah, burn pile in Tier 3.

6 Q Right. Because by that point Tier 3  
7 was in use -- or had been in use for quite some  
8 time?

9 A Pardon me?

10 Q Had Tier 3 been in use for quite some  
11 time by the time you were operating the bulldozer?

12 A I'm still not --

13 Q Tier 3 --

14 A Yeah.

15 Q -- did that go back -- had that been  
16 in use for quite some time?

17 A Right, right, right, right.

18 Q So by the time you were operating the  
19 bulldozer, Tier 3 had been in use for quite some  
20 time?

21 A Right.

22 Q Did you ever push fly ash when you  
23 were running the bulldozer into the liquid pit?

24 A Yeah.

25 Q Why would you do that?

1           A     'Cause it would soak up a lot of the  
2     water. There was another brown substance that came  
3     from Delphi I think. It was brake drum powder when  
4     they would turn drums or make drums. It was either  
5     the casting or something. And both of those  
6     materials soaked up the water and liquid, whatever  
7     we'd take out of the barrels.

8           Q     Now, after you returned to SDD to  
9     drive the bulldozer for Alcine, you said that was a  
10    year or two?

11          A     (Nodding in the affirmative.)

12          Q     Did you move on to another job at some  
13    point?

14          A     Yeah. There was conflict. My other  
15    cousin was running the incinerator. We had an  
16    incinerator that burned skids at that time, and  
17    there was bad blood there. So I -- one of the -- I  
18    don't know if I'm getting ahead, but anyway --

19          Q     So you moved on from the dump?

20          A     I moved on.

21          Q     Did you get another job somewhere?

22          A     Yeah.

23          Q     Who did you go to work for?

24          A     I started at Liberal Markets. I  
25    worked in the vegetable -- I forget what it's

1 called now. You know, I prepared for lettuce and  
2 stuff like that. My mind just went blank. And a  
3 bag boy. I was a bag boy there.

4 Q Did you ever go to work for a paint  
5 company?

6 A No, I -- I continued when -- I didn't  
7 have a very good time -- an hourly schedule at  
8 Liberal, so I'd go back to the dump and help Kenny  
9 out a little bit. And a driver from one of the  
10 construction dumpers I kept asking him for a job  
11 for ten years. Then they finally hired me on. So  
12 I went to work for them.

13 Q What was the name of that company?

14 A A.E. Fickert and Son.

15 Q Then you got to know that driver  
16 because they were hauling stuff to South Dayton  
17 Dump?

18 A Yeah. All the drivers would come in  
19 and dump off construction debris.

20 Q Now, about what age is it when you  
21 were kind of working off and on for Kenny? What  
22 age were you at that point?

23 A It would be about from 18 till 27  
24 maybe, something like that.

25 Q Maybe nine years?

1 A Yeah.

2 Q Off and on?

3 A Right.

4 Q Still working at South Dayton Dump?

5 A Mm-hmm.

6 Q And then you got the job with Fickert?

7 A Right.

8 Q Now, after your employment with  
9 Fickert, did you ever do any more work back at the  
10 dump?

11 A Yeah. My father came again and  
12 grabbed me, and we started buying HUD houses and  
13 fixing 'em up. To get material I'd go down to the  
14 dump and pick up stuff that I could use, and I'd  
15 help whatever needed to be done there, you know.

16 Q HUD houses you're talking Housing and  
17 Urban Development?

18 A Yes.

19 Q About what age were you when you were  
20 helping your dad? This would be Cyril; right?

21 A Yes.

22 Q You helped your dad with the HUD house  
23 work and picked up materials from the dump?

24 A It was from about -- my age was -- we  
25 did that -- I was around 22 till about 27,

1 somewhere in that area.

2 Q And then after your 27th birthday, did  
3 you have further involvement with the dump?

4 A No. I started working for myself. I  
5 had got enough experience to pick up a hammer and  
6 saw and would go out and get side jobs.

7 Q And that was pretty much it with your  
8 work at the dump?

9 A Yeah. Oh, I started bringing my  
10 debris over there. So I still had contact with the  
11 dump. You know, till it closed down I pretty much  
12 was around somewhere, you know.

13 Q What age were you when the dump closed  
14 down, as you put it?

15 A I don't really know if it closed down.  
16 I would say that the late eighties maybe is when  
17 things got really to the point where you could call  
18 it closed down, but I still think there was people  
19 dumping there.

20 Q Now, just to catch up on something you  
21 said earlier. You mentioned an incinerator for the  
22 first time in our discussion here.

23 A Mm-hmm.

24 Q Tell me about the incinerator. What  
25 was that?

1           A     Alcine Grillot and a gentleman named  
2     Larry Brandon got together with I think it was  
3     either Container Service or General Refuge (sic),  
4     and they all went together and put their money  
5     together and built a \$150,000 incinerator. They  
6     used that, and they made pads.

7           Q     Concrete pads?

8           A     Concrete pads where various companies  
9     will come in and dump skids, burnable plywood and  
10    stuff like that.

11          Q     Mainly wood?

12          A     Right.

13          Q     Anything else?

14          A     DP&L would have these big, I guess,  
15    spindles that came that had wire on it and stuff,  
16    and we'd roll them over and throw them in, too.  
17    And then it was mostly, you know, card -- not  
18    cardboard, but plywood and oak skids and stuff like  
19    that.

20          Q     Poles? Any poles go in there?

21          A     Pardon me?

22          Q     Poles?

23          A     No, no.

24          Q     And when -- so this \$150,000  
25    incinerator, how old were you when that was placed

1 -- I assume this was placed at the South Dayton  
2 Dump?

3 A Yes, mm-hmm.

4 Q How old were you when that happened?

5 A It was built -- I remember the year  
6 more. It was right around '69 to '71, in that  
7 area.

8 Q Okay. And the incinerator looking at  
9 the figure in front of you, Exhibit 2, would you be  
10 able to tell us where that was?

11 A Yes. It was on Tier 1, the very west  
12 -- it would be right about this area right here.

13 Q Can you mark that as "incinerator"?  
14 That would be a big help.

15 A Wait. I'm sorry. Quitting school and  
16 going to work on the dump, I wasn't very good at  
17 reading and writing.

18 Q So you're writing this from a couple  
19 of notes you have for spelling, hmm?

20 A (So complies.)

21 Q Okay. Now, let the record reflect  
22 that the witness wrote the word "incinerator" near  
23 Tier 1. Wrote it vertically and then put a box and  
24 an X through it. Is the box with the X through it  
25 the location of the incinerator?

1 A Correct.

2 Q That's all on Exhibit 2 written in  
3 black ink.

4 A Yes.

5 Q Okay. Did you ever work the  
6 incinerator?

7 A Not as much 'cause I was mostly on the  
8 doze -- on the bulldozer. I would always get up --  
9 when things were slow that was my other assignment  
10 to help David out stacking the skids. We'd sort  
11 the skids, and then Skid Row -- am I getting ahead?

12 Q No, you're doing fine.

13 A Skid Row, which was an operation south  
14 of the dump, would come pick them up, or whoever  
15 brought them would buy 'em back. We'd repair 'em  
16 to some degree. Then that started off a branch of  
17 another operation where the skids were being  
18 reconditioned.

19 Q Would that be an operation that you  
20 did right at South Dayton Dump?

21 A No. That was at Skid Row.

22 Q We'll get to Skid Row in a second. So  
23 if I understand you correctly -- and you can tell  
24 me if I'm getting this wrong -- your operation  
25 tried to salvage what it could --

1           A     Right.

2           Q     -- out of the skids?

3           A     If they weren't that damaged, then  
4 they were stacked in a pile, and then General  
5 Motors or Inland or Delphi or whatever would come  
6 back and pick 'em up to my knowledge. That's what  
7 I was told. I never saw who picked 'em up  
8 sometimes 'cause I was out on the dozer.

9           Q     You mentioned Skid Row. Was that a  
10 commercial establishment?

11          A     It was a gentleman that had a truck --  
12 this was also up by the incinerator. They would  
13 bring a dump -- I mean a garbage truck, and they  
14 would get cardboard -- they started out by mostly  
15 there would be skids that had cardboard around 'em  
16 or lots of cardboard in it, and they would recycle  
17 the cardboard.

18          Q     And Skid Row was that an entity right  
19 on the dump, or were they located off the dump?

20          A     Mostly they would take and load the  
21 skids up and then take 'em to the southern part  
22 where we called Skid Row.

23          Q     And that would be the southern part of  
24 Cyril's property?

25          A     South Dayton Dump, yeah.

1           Q     Show us where Skid Row was.  It's a  
2     pretty nice name, Skid Row.

3           A     (So complies.)

4           Q     Let the record reflect that on Exhibit  
5     2 the witness wrote "Skid Row" in light blue pen  
6     and circled it.

7           Is that the location of Skid Row?

8           A     Yes.

9           Q     What happened at Skid Row, just so we  
10    get a fuller understanding?

11          A     It actually lasted longer than the  
12    dump.  The gentleman that started that, I assume  
13    he's still in business somewhere.  He was one of  
14    the last persons to leave.

15          Q     When did Skid Row begin at your  
16    agewise or yearwise?

17          A     Late seventies.  Before it wasn't  
18    called -- they just took the skids there, but Skid  
19    Row actually got its name around that time.

20          Q     When did they actually start doing the  
21    operation in that location?

22          A     Well, when the incinerator started up.  
23    So it would be around the early seventies.

24          Q     All right.  Now, I just want to catch  
25    up on the name of the site.  Now, you've referred

1 to the site as the South Dayton Dump and South  
2 Dayton Landfill. Is that what your father, Cyril,  
3 called it?

4 A They called it "the dump."

5 Q What about Alcine? Did he refer to it

6 --

7 A South Dayton Dump.

8 Q That was what Alcine referred to it  
9 as?

10 A Right.

11 Q Have you heard of the dump being  
12 referenced by any other names? Was it known by you  
13 to be referenced by other names? Let me try  
14 something out. Was it ever called the Grillot Dump  
15 or Grillot Landfill?

16 A It was nicknamed that a lot.

17 Q Nicknames are good. That's what I  
18 meant.

19 A Yeah.

20 Q Okay. And what about the Broadway  
21 Dump or Landfill?

22 A That was more known in like the phone  
23 book. This Exhibit 3, things like that, you know,  
24 when there was telephone numbers they would have a  
25 sign out "South Dayton Dump," and they had an arrow

1 pointing back to it.

2 Q And how did the name Broadway come  
3 into the nickname -- or name?

4 A Because of it being the road Broadway,  
5 you know.

6 Q Do you know how the drivers referred  
7 to it or used it?

8 A The drivers to my knowledge called it  
9 South Dayton Dump.

10 Q And what about the Dryden Road Dump or  
11 Landfill? Was that a nickname ever?

12 A No, 'cause that came later. Dryden  
13 Road came a lot later.

14 Q And what about Springboro Dump or  
15 Springboro Pike Dump?

16 A Not to my knowledge.

17 Q Ever hear anyone refer to it as DP&L  
18 Landfill or Dump?

19 A A lot of people kidded because DP&L  
20 was right there, a lot of confusion. Across from  
21 Broadway was DP&L's operation, so a lot of people  
22 thought that they kind of went together. So they'd  
23 kid around 'cause -- because of that.

24 Q So when they kidded around, what did  
25 they say?

1           A     Hmm?

2           Q     What did they say about it? Did they  
3 refer to it as the DP&L Dump or Landfill when they  
4 were kidding around?

5           A     I don't know how to say this, but  
6 Dayton Power and Light was in a lot of controversy  
7 about the smoke coming from the stacks, and so was  
8 Dayton -- South Dayton Dump. Because when we would  
9 burn everywhere the wind blew if it went into  
10 Dayton everybody hated us. So there was a  
11 confusion whose smoke was what, you know. So we  
12 got accused and DP&L did also.

13          Q     All right. Any other nicknames for  
14 the dump that you are aware of?

15          A     Well, like DP&L because of their  
16 initials was called Dayton's Pollution Leader. So  
17 was South Dayton Dump. They just nicknamed it the  
18 Pollution Leader.

19          Q     All righty. Now, when loads came to  
20 the site from someone who wasn't a regular  
21 customer, was there any kind of a form filled out  
22 as the truck came in?

23          A     Mostly cash sales weren't put on the  
24 ticket because the ticket was mostly used for the  
25 company that would dump there and then a receipt

1 for Alcine to mark how many loads came in that  
2 month.

3 Q Was there ever to your knowledge any  
4 documents that identified the size of the load  
5 coming in?

6 A Containers had like yardage, a 44-yard  
7 container, 60-yard. You know, there were different  
8 sizes. So whatever size the container was we would  
9 mark that down. But most of the time was one load,  
10 and Alcine would know what truck.

11 Q So occasionally you'd see a yardage  
12 would be marked down?

13 A Mm-hmm.

14 Q Now, let me ask you about the site  
15 hours. When was the dump open?

16 A We opened from 7:30 till around 4:00.

17 Q Is that weekday or weekend?

18 A Weekday.

19 Q What about weekends?

20 A Closed Sunday, and we were open like  
21 7:30 till about 2:00, something like that. We'd  
22 quit early.

23 Q That was Saturday?

24 A Mm-hmm.

25 Q 7:30 to 2:00? Saturday was 7:30 to

1 2:00?

2 A Yeah.

3 Q And that pretty much -- does that  
4 cover the time period you were associated with the  
5 dump?

6 A Right.

7 Q It didn't really change that much?

8 A No.

9 Q And we mentioned three entrances.  
10 Each entrance had a gate --

11 A Right.

12 Q -- when it was being used; is that  
13 right?

14 A Right.

15 Q And the gate was locked?

16 A Yeah, we had a padlock on the gates.

17 Q And what kind of lock did you have?

18 A It was a regular keyed Master Lock.

19 Q Okay. And do you know the key number?

20 A Yep.

21 Q You remember the key number?

22 A Yeah.

23 Q What was the key number?

24 A 2246.

25 Q How is it that you remember that?

1           A     'Cause that particular key was used at  
2     the Powell Road landfill, General Refuse, South  
3     Dayton Dump, gas pumps, anything that was locked  
4     off. So all the drivers and everybody involved  
5     would use that key.

6           Q     So if they were hauling to Powell or  
7     hauling there --

8           A     Yeah.

9           Q     -- going to gas pumps --

10          A     Right.

11          Q     -- the drivers would have that common  
12     key number?

13          A     Right.

14          Q     And that was just a key with a number  
15     on it?

16          A     Yeah.

17          Q     So it was an identical key?

18          A     Right.

19          Q     So you could get into all sorts of  
20     good places with that key; right?

21          A     There was a lot of dishonesty going on  
22     I think.

23          Q     What do you mean by that?

24          A     We -- when Kenny and I would get there  
25     in the morning we'd drive around the dump to make

1     sure everything was okay. 'Cause a lot of times  
2     people come across the river and get metals and --  
3     but the drivers if they weren't knowledgeable where  
4     to dump or where they were told to dump in the  
5     evenings then Kenny would get real mad.

6             Q     You'd find stuff dumped where it  
7     wasn't supposed to be dumped?

8             A     Right.

9             Q     Give me an example.

10            A     A load of skids could be not where the  
11     incinerator was. They'd put it down in Pit 3, you  
12     know, which made it very inconvenient for me  
13     because I had to pick up the skids.

14            Q     Just to jump in, you referred to Pit  
15     3. Was this one of the burn pits?

16            A     Or Tier 3. I'm sorry. Tier 3.

17            Q     Okay. And we talked about liquid pit.  
18     Was there more than one liquid pit or just one?

19            A     Just -- well, sometimes if it was a  
20     heavy enough liquid we'd dump it up by the office.  
21     Behind the office there was a smaller tier that we  
22     would let run down because it would help with the  
23     road and so on and so forth.

24            Q     Which office are you referring to now?

25            A     Office 3.

1 Q So there was an area near Office 3 --

2 A Yeah.

3 Q -- where you'd dump liquids?

4 A That was where I took the -- and I  
5 made -- you know, took the tops off of 'em. It was  
6 actually convenient for me to just dump 'em there.

7 Q Dump the drums there?

8 A The thinner liquid I wasn't allowed  
9 because it made a mess.

10 Q So some of the thick liquids in the  
11 drums you'd dump right near Office 3; is that  
12 right?

13 A Yeah, if it was half a drum they'd  
14 refer -- but they were so heavy the only thing I  
15 could do is let 'em roll.

16 Q So just to get it straight, near  
17 Office 3 if you had some heavy liquids in a drum  
18 for convenience you'd dump 'em pretty near to  
19 Office 3?

20 A Right.

21 Q Is there a particular spot where this  
22 happened that you could show us on Exhibit 2?

23 A (So complies.) It would have been in  
24 this area. Drums. Right there.

25 Q That's fine. Let the record reflect

1     that the witness drew on Exhibit 2 in dark blue pen  
2     just below the Entrance 3 and circled something  
3     that he referred to as "drums."

4             Okay. And that is the location where  
5     occasionally you'd tip some of the heavier drums to  
6     pour out the heavier liquids?

7             A     Right.

8             Q     Do you know why operations eventually  
9     ceased at the site?

10            A     Pardon me?

11            Q     Do you know why operations eventually  
12    ceased at the landfill?

13            A     From my knowledge, things got a little  
14    bit too hectic as far as we had people come out  
15    from the EPA, especially when they burned -- after  
16    we had burned, and then a lot of the other dumping  
17    Alcine stopped some of the operation. And then he  
18    was actually Mayor of Moraine Township at the time,  
19    and when he was booted out of office then he pretty  
20    much was on the dump more, and I think he got  
21    burned out. And so he allowed pretty much the  
22    drivers more or less to take over, and he just  
23    would get a lump sum, I guess. Some of it I don't  
24    -- I just remember Dad talking about it. So I  
25    don't remember.

1           Q     Now, I wanted to get back -- we talked  
2     about the Master Lock 2246 on your gate, and it  
3     sounds like a number of people had that key because  
4     it was usable in various locations around --

5           A     Right.

6           Q     -- the city; right?

7           A     (Nodding in the affirmative.)

8           Q     But did customers in particular have  
9     the right to come into the -- come through the gate  
10    in the evening or at night and dump their loads?

11          A     The ones that pretty much worked 24 --  
12    you know, had three shifts, the companies that  
13    their trash would get too built up they were  
14    allowed to come in the evenings, late at night.

15          Q     There wouldn't be any attendant there  
16    at the landfill at that point?

17          A     No, no.

18          Q     Can you tell me what customers had  
19    that right with the three shifts to come in the  
20    evening or at night to open the gate with the key  
21    and dump their loads?

22          A     Inland, Delphi, GM, General Motors,  
23    and I'm thinking Frigidaire.

24          Q     What about DP&L?

25          A     I'm -- I'm not sure. I don't know. I

1 don't remember.

2 Q Anyone else that comes to mind?

3 A Well, DP&L had another -- where Skid  
4 Row is there was another site that wasn't gated  
5 off, but Dad only allowed them to put dirt and  
6 topsoil there. When they would dig a hole like in  
7 the city for gas line or whatever, then they were  
8 allowed to dump there.

9 Q And that wasn't gated off you said?

10 A No, hmm-mm.

11 Q Show me that location where your dad  
12 allowed DP&L to dump topsoil and whatnot.

13 A (So complies.) I'm going to have to  
14 call this Tier 4.

15 Q Okay.

16 A And there was an access road Dad  
17 allowed --

18 Q Just a second. We'll get to that.

19 So let the record reflect that on Exhibit 2  
20 the witness marked in a green pen what he's calling  
21 Tier 4.

22 Now, is that the location you just  
23 referenced where your dad allowed DP&L --

24 A Correct.

25 Q -- to dump soil?

1           Any other materials you're aware of that  
2     got dumped there by DP&L?

3           A     Yeah, a lot of -- 'cause I liked it  
4     'cause Dad let me have those. It was cast iron  
5     pipes that would come from gas lines, or they would  
6     call them sleeves that would go down where they  
7     would shut the gas on and off. And so I'd get that  
8     -- I was allowed to take the cast iron from those  
9     areas. A lot of wood, maybe a lot of wood roots  
10    that would be dug up from the holes that they would  
11    make. Some skids. But I'd go back there and get  
12    most of the wood products. That was going to be  
13    the solid top layer. That was going to be the  
14    finished product where it would meet up to the  
15    northern dump. So they were kind of enclosing the  
16    bottom pit in, if that makes sense.

17          Q     And what did you do with the pipes and  
18    stuff? Was that resold or --

19          A     Pardon me?

20          Q     You said you were pulling stuff like  
21    pipes --

22          A     The cast iron I'd take to Franklin  
23    Iron and Metal or Patterson Iron and Metal.

24          Q     And resell?

25          A     Yeah.

1           Q     Now, in what period of time was it you  
2 were working in that area pulling out your cast  
3 iron and whatnot? How old were you?

4           A     I remember from about 14. And then,  
5 obviously, if I was taking the stuff, 16, 17,  
6 something like that 'cause I had my license then.

7           Q     Now, you were about to reference an  
8 entry point to that area?

9           A     Yeah. DP&L had -- Dad allowed them to  
10 dump -- or park their equipment along this -- they  
11 had poles, electric poles that are still there  
12 right now that went back this way somewhere. And  
13 he allowed them to put -- sometimes they'd come in  
14 with a semi truck that had a trailer that had real  
15 long telephone poles on it that had a red tag on  
16 it, and they'd put 'em in there because they didn't  
17 really have a whole lot of other area over there to  
18 park their equipment.

19          Q     You did a lot of -- I understood what  
20 you were talking about, but I was watching you  
21 gesture. We're going to have to help the record  
22 and the court reporter.

23          A     Okay.

24          Q     So why don't we mark the area where  
25 you said that DP&L would park their trucks and

1 poles with the red tags on them?

2 A (So complies.)

3 Q Let the record reflect the witness  
4 marked with a light blue pen "Truck Parking" kind  
5 of below Skid Row. Would that be right?

6 A Yeah.

7 Q How far west --

8 A It went in pretty much as far -- I  
9 would say three, 400 feet at least.

10 Q You want to draw your arrows as to how  
11 far it went to the left of where you put "Truck  
12 Parking"? Would you draw an arrow in that  
13 direction?

14 A (So complies.)

15 Q Which the witness just did on Exhibit  
16 2.

17 And was there any kind of gate or anything  
18 getting into that part of the property?

19 A No.

20 Q I didn't hear your answer, Ed.

21 A No.

22 Q And why would your dad just out of the  
23 goodness of his heart let DP&L let the trucks park  
24 there?

25 A Well, he -- because the type of

1 material that was coming in for that tier, you  
2 know, was pretty hard to get.

3 Q Tier 4?

4 A Right. And it wasn't, you know,  
5 anything but solid material, and so it was real  
6 handy. and I think his thought at the time was  
7 that would be a good site for another building.  
8 They ran out of room to put industrial buildings,  
9 so he was trying to -- he had -- okay.

10 Q You mentioned poles coming in on those  
11 trucks. I'm just wondering, did you ever observe  
12 DP&L sending poles as waste to the site?

13 A Other than if we used them for  
14 barriers. You know, if they were real bad poles so  
15 vehicles couldn't drive we might use them for a  
16 barricade, but not --

17 Q When you went on the site on Sunday,  
18 did you see any poles, telephone type poles strewn  
19 about?

20 A On Sunday, yes, we did.

21 Q And were those from DP&L?

22 A Yeah.

23 Q Why were there poles on the site when  
24 you went around a few days ago from DP&L?

25 A Like I said, we used some for

1 barricades. And they're hard to move, so I think  
2 the person who's running the operation north right  
3 now probably pushed them there.

4 Q But you accepted them onto the site to  
5 use as barricades; is that it?

6 A Right, mm-hmm.

7 Q And they came from DP&L?

8 A Could I add something else?

9 Q You can add anything you want.

10 A Because Moraine Township was trying to  
11 be brought into its own city, Kettering -- the  
12 annex from Kettering, Alcine, being the Mayor, and  
13 my dad having another company called United  
14 Fireworks had fireworks displays. Because NCR had  
15 an incident, I think, in the thirties or forties  
16 where a bunch of people got killed, and they quit  
17 having their show. So Alcine would have that show  
18 for anyone who wanted to see it. A lot of those  
19 telephone poles we used during the show to  
20 barricade off so people wouldn't go back in the  
21 landfill. It wasn't fenced off, so we didn't have  
22 no other way. And they wanted to get as close as  
23 they could, so we used them telephone poles to  
24 barricade that off. So that's my recollection.

25 Q Of DP&L telephone poles?

1 A Yeah.

2 Q All right. I wanted to ask you this  
3 before. I forgot. There was an entity called  
4 Moraine Recycling. Does that mean anything to you?

5 A Well, Larry Brandon had several  
6 companies. Out of the cardboard and newspaper he  
7 started Dayton Fiber, which is an insulation  
8 company that was ran on West River Road. So that's  
9 --

10 Q I'm just asking. I've heard that  
11 name, and I was wondering if that meant anything to  
12 you?

13 A That's all I can remember.

14 Q No problem.

15 We've been going about close to maybe an  
16 hour and 50 minutes. I'm trying to think about  
17 when we started. Ten after 10:00. How are you  
18 feeling? You want to take a break for lunch?  
19 Might be a good time. Or you want to press on a  
20 little bit?

21 A The heat's on me. What time is it?

22 Q It's about six minutes to 12:00.

23 A We can take a lunch break.

24 (Whereupon, the deposition recessed for  
25 lunch at 11:55 o'clock a.m. and reconvened at 1:14

1 o'clock p.m.)

2 Q Ed, I wanted to raise a new subject  
3 with you regarding lead ingots.

4 A Pardon me?

5 Q Lead bars. Lead bars.

6 A Okay.

7 Q Do you know anything about the  
8 melting of lead into bars anywhere at the South  
9 Dayton Dump and Landfill?

10 A Yeah. Yes, I do.

11 Q Great. Tell me what you know.

12 A Alcine, my Uncle Alcine because some  
13 of the lead shrouds and some lead wire connectors  
14 there were so many of 'em he decided -- he had this  
15 brilliant idea melting 'em down and making lead  
16 bars out of 'em. And so we would -- he got an old  
17 kettle somewhere, big kettle, and we got these  
18 square -- little square four-by-fours that had  
19 creosote on 'em that came from DP&L, and he started  
20 firing them. We'd throw those underneath there and  
21 melt the lead and make the bars out of that. And  
22 he had the scoop thing, and he'd scoop it. And  
23 they looked like gold bars, but they were made out  
24 of lead.

25 Q Lead bars?

1                   A     Yeah.

2                   Q     And then I have a lot of questions  
3     about that, but let me start with this one.  What  
4     did he do with the lead bars?

5                   A     He would turn 'em into the salvage  
6     yard to sell.

7                   Q     Do you remember which salvage yard  
8     would buy lead bars, just out of curiosity?

9                   A     The only two companies we really  
10    dealt with was Patterson Iron and Metal and  
11    Franklin.

12                  Q     Franklin Iron and Metal?

13                  A     Mm-hmm.

14                  Q     Now, you mentioned the lead came in  
15    with wire connectors -- connections for wires.  You  
16    mentioned a couple of things.

17                  A     I don't know if they make 'em out of  
18    lead still or if it's aluminum, but where you put  
19    two wires together and they had a crimping tool  
20    that they would crimp 'em and they'd come in in  
21    loads and be dumped to be burned.  But because they  
22    would burn up and melt a little more than the other  
23    like copper and that, we'd get them and put 'em in  
24    five-gallon buckets and save them and put them in  
25    55-gallon drums.  When we had enough of 'em, then

1 we'd melt 'em.

2 Q Now, you mentioned that the lead  
3 would be in the connections that were crimped --

4 A Right.

5 Q -- in the wires?

6 A Yeah.

7 Q Where did these lead connections  
8 come from?

9 A DP&L.

10 Q And how do you know that?

11 A Because the loads that would come in  
12 we knew what loads that would be on the dump truck  
13 they would dump, and then they were put in a  
14 certain area because those piles had to be searched  
15 down on your hands and knees. 'Cause you might  
16 have little copper wires that small, and I'd have  
17 to get down there with a rake and rake out --  
18 'cause it would be in the ash after they were  
19 melted.

20 Q And they came in on dump trucks?

21 A Right.

22 Q Did these dump trucks have a DP&L  
23 insignia on them?

24 A That one I was telling you with the  
25 lightning rod and --

1 Q The answer is yes --

2 A Yes, yes.

3 Q -- with a DP&L insignia?

4 A Yes.

5 Q Wait till I finish my question.

6 I've got to get rolling again here.

7 A I'm sorry.

8 Q No problem. Now, did you call it a  
9 pot or a kettle or what did you call that where the  
10 lead was melted down?

11 A It looked like one of them things  
12 out of a movie like Tarzan where they put the  
13 hunters in there and they'd cook 'em. You know, it  
14 was that big. It was huge.

15 Q About how far across would you say  
16 was this metal pot radius -- or diameter?  
17 Diameter.

18 A Four to five feet. Four to five  
19 feet and about, oh, 18 to two feet deep, something  
20 like that.

21 Q So about four to five feet across --

22 A Right.

23 Q -- and eighteen inches to two feet  
24 deep?

25 A Right.

1                   Q     And you mentioned these blocks.  You  
2     said four-by-four.  Were they four feet by four  
3     feet or --

4                   A     No, four inches by four inches.

5                   Q     Small blocks?

6                   A     And they were maybe eight to ten  
7     inches in length.

8                   Q     So rectangular?

9                   A     Yeah.  Right.

10                  Q     Four-by-four-by-eight inches?

11                  A     Right.

12                  Q     And then these blocks came in from  
13     DP&L as well?

14                  A     Yeah, mm-hmm.

15                  Q     You said they were soaked with  
16     something?

17                  A     It's -- it was either creosote or a  
18     tar substance, but I think it was called creosote.

19                  Q     And they came in in trucks.  Did it  
20     come in in trucks?

21                  A     Right.  Mm-hmm.

22                  Q     From DP&L?

23                  A     Right.

24                  Q     Across the road to your knowledge?

25                  A     Pardon me?

1                   Q     From the service building across the  
2 road to your knowledge?

3                   A     I don't know.

4                   Q     You don't know where they came in?

5                   A     I don't know where they came in.

6                   Q     But from DP&L?

7                   A     Right.

8                   Q     Now, can you tell me where this  
9 Tarzan pot was on the site?

10                  A     It was behind office number 3.

11                  Q     And you're looking at Exhibit 2 now,  
12 the figure?

13                  A     Yes.

14                  Q     And you're going to mark it?

15                  A     Yes.

16                  Q     And this looks like a light blue  
17 pen.

18                  A     Right. (Indicating)

19                  Q     All right. Let the record reflect  
20 that the witness drew a square near to the -- I  
21 guess immediately to the northeast of office number  
22 3, put an X in the square and wrote the word "pot"  
23 next to it.

24                  Okay. Was this a continuous -- well, we  
25 already talked about was this -- withdraw that

1 question.

2 Okay. I want to talk a little bit about  
3 the drums that came in that you worked on to take  
4 off the lids, the drums coming to the site --

5 A Right.

6 Q -- that you worked on to take off  
7 the lids. Do you remember your testimony that the  
8 drums with the heavy liquids went to a location  
9 near office number 3?

10 A 3, mm-hmm.

11 Q And the drums with the lighter  
12 liquids went into the location -- area where there  
13 was the -- what you called the pit?

14 A Yeah.

15 Q Is that right?

16 A Mm-hmm.

17 Q I'm trying to -- I guess my first  
18 question is, were these drums typically full drums?

19 A Yes. Yeah, the ones that had no  
20 lids, like I mentioned earlier, would spill while  
21 they're being delivered. And then the ones that  
22 had a cap on the drum of the barrel itself, they  
23 would be full.

24 Q And were most of them full?

25 A Yeah.

1                   Q     And let me ask about your -- your  
2     job for at least part of the time you worked at the  
3     site was to kind of take off the tops --

4                   A     Right.

5                   Q     -- by one manner or another?

6                   A     Right.

7                   Q     And that was pretty difficult work,  
8     I assume?

9                   A     Yes, very hard.

10                  Q     Did you have any tools that you used  
11     to take the tops off?

12                  A     Started out with a hammer and  
13     chisel, cold chisel, and you'd take -- you start it  
14     on an angle, and you just keep making notches all  
15     the way around it. And then later somewhere Uncle  
16     Kenny found a can opener that was really nice, and  
17     so I'd take that can opener. And it was a device  
18     that I just rolled it around that thing, and it  
19     would cut the lid right off.

20                  Q     And it had a crank on it?

21                  A     Pardon me?

22                  Q     The can opener had a crank on it? A  
23     crank?

24                  A     Yeah, like a crank thing.

25                  Q     And you had to use two hands to work

1 the crank?

2 A Yeah.

3 Q So it was a pretty big can opener?

4 A Oh, yeah.

5 Q Do you know where that can opener  
6 came from?

7 A No.

8 Q Now, one of the questions for me is  
9 where did all these drums full of liquid or nearly  
10 full of liquid or the open ones that were spilling  
11 out, where did those drums come from?

12 A From talking to a couple of the  
13 drivers, they came from another barrel site. It  
14 was out in Beaver creek.

15 Q Barrel site in Beaver creek?

16 A Mm-hmm.

17 Q If you heard it being referred to as  
18 the Barrel Factory --

19 A Barrel Factory, yeah.

20 Q Is that how you heard it from the  
21 drivers?

22 A Right. Plus, when it had a mishap  
23 over there in the early seventies, an explosion,  
24 and the whole city of Dayton got to see the  
25 fireworks display. So it was a pretty big ordeal.

1                   Q     This was an ordeal over in  
2     Beavercreek?

3                   A     Right.

4                   Q     So a lot of these drums -- I'm going  
5     to let you say, but did a lot of the drums come  
6     from Beavercreek to your understanding?

7                   A     Right, mm-hmm. But some came from  
8     Inland, Delphi, various different other companies,  
9     but I think the majority came from there.

10                  Q     "From there" being?

11                  A     Dayton Drum -- I mean --

12                  Q     The Barrel Factory?

13                  A     Yeah, Barrel Factory, yeah.

14                  Q     Now, you just mentioned Dayton Drum.  
15     Did you hear of a company called Dayton Industrial  
16     Drum?

17                  A     Mm-hmm.

18                  Q     Do you know whether that was a  
19     source of the drums?

20                  A     I know from the Barrel Factory  
21     mostly, but I've heard that name several times.  
22     So, yeah.

23                  Q     You've heard the name Dayton  
24     Industrial Drum several times?

25                  A     Right, mm-hmm.

1           Q     But your understanding from talking  
2     to the drivers is that the drums that were either  
3     poured into the pit or into the heavy liquid  
4     location was from the Barrel Factory; is that  
5     right?

6           A     Right, mm-hmm.

7           Q     You have to answer audibly.

8           A     Yes, yes.

9           Q     Thanks. All right.

10          Now, that can opener that you used, the  
11     mechanical can opener, was that helpful for you?

12          A     Very helpful, yeah.

13          Q     Made your job easier?

14          A     Got more money out of the drums.

15          Q     And why is that?

16          A     Well, I could do a lot more a day,  
17     you know.

18          Q     How much were you getting per drum?

19          A     Fifty cents.

20          Q     Fifty cents?

21          A     Mm-hmm.

22          Q     Who paid you?

23          A     Uncle Alcine.

24          Q     I'm going to ask you about kind of  
25     the southern end of the site. And we talked about,

1     you know, the three entrances to the site and the  
2     three offices, and now I'm going to focus your  
3     attention on the quarry pond.

4                   A     Okay.

5                   Q     And this is that area on Exhibit 2  
6     that's below the darker line that kind of  
7     circumvents the --

8                   A     The perimeter.

9                   Q     Yeah, the perimeter of sort of the  
10    upper part of the site.

11                  A     Right.

12                  Q     And you see the quarry pond parcels  
13    where it says that and you see a big pond?

14                  A     Mm-hmm.

15                  Q     You see a little island in the  
16    middle of the pond?

17                  A     Mm-hmm. Yes, yes.

18                  Q     Did you know that there was an  
19    island there?

20                  A     Yeah, I camped on it.

21                  Q     You used to camp on the island?

22                  A     Yeah.

23                  Q     Did you ever swim in the quarry  
24    pond?

25                  A     Yeah, we'd swim and fish. It was

1 kind of a playground.

2 Q Now, what I'm curious about with the  
3 quarry pond is with the landfill moving from north  
4 to south, did it really ever reach the quarry pond  
5 area, the landfill?

6 A No, hmm-mm.

7 Q Was there some thinking on the part  
8 of your dad or Alcine that it eventually would?

9 A Oh, that we would go that far?

10 Q Yeah.

11 A Yeah, yeah.

12 Q They were thinking that?

13 A But it wouldn't -- we would always  
14 kid around it wasn't going to be in their lifetime  
15 and it probably wouldn't be in mine 'cause being a  
16 burning dump it filled up very slowly.

17 Q So the land filling activities never  
18 reached below that --

19 A No.

20 Q -- perimeter line we just discussed  
21 on Exhibit 2?

22 A On that perimeter line there was  
23 kind of a mound, and then DP&L's power line came  
24 through there. Like I said, there was enough road  
25 that trucks could be parked there. So they had

1     their --

2                   Q     That was the DP&L truck park?

3                   A     That sort of divided the pond with  
4     the landfill itself.

5                   Q     That was the DP&L truck parking you  
6     referred to earlier?

7                   A     Yeah.

8                   Q     All right.  Now, the area around the  
9     quarry pond was never fenced or locked; is that  
10    correct?

11                  A     No.

12                  Q     So there could have been a little  
13    dumping here or there?

14                  A     Yeah.

15                  Q     Was there to your knowledge?

16                  A     Yeah.  Every now and then Dad would  
17    get very upset.  He didn't want Alcine dumping  
18    nothing down there.  He blamed him, but somebody  
19    would go and dump down there.  Eventually I think  
20    they finally put -- we finally put a gate on or  
21    blocked it off with a telephone pole.

22                  Q     Did you have an opportunity on your  
23    visit to the site this past Sunday to walk around  
24    the quarry pond area?

25                  A     We drove it, but we didn't get out.

1 Q You observed it?

2 A Yes.

3 Q Brought back memories?

4 A Oh, yeah.

5 Q All right. Did you ever hear about  
6 any insulators made of glass or porcelain coming to  
7 the site?

8 A Oh, lots of 'em, yeah.

9 Q What can you tell me about that?

10 A They -- we'd take 'em, throw 'em and  
11 break 'em because they were made of glass or  
12 porcelain. They were from Dayton Power and Light.  
13 They were like the caps that set on a pole when  
14 they run power lines. I think they had a groove in  
15 it that the power lines would sit in 'em. And  
16 there were tons of 'em, different sizes and so on  
17 and so forth.

18 Q Did any of them come to the site  
19 from Dayton Power and Light?

20 A Mm-hmm.

21 Q What's the answer audibly?

22 A Yes, yes.

23 Q And they came in Dayton -- DP&L  
24 trucks?

25 A Yes.

1 Q You observed that?

2 A Yes.

3 Q You said there were tons of them?

4 A Tons of 'em, yeah. I've got one at  
5 home. I saved one of 'em.

6 Q And just a curiosity, back on the  
7 discussion of the transformers we had before lunch,  
8 did any of 'em come in sort of shall we say a dark  
9 shade of black?

10 A Yeah, some of them were damaged, I  
11 think, from lightning strikes or what have you, and  
12 so we thought it was interesting, you know. 'Cause  
13 a lot of the lightning strikes that hit the dump  
14 area they'd hit them big power lines that were  
15 there when storms come in, and the drivers will say  
16 that's where they got 'em. They were from  
17 lightning strikes. We thought that was pretty  
18 neat.

19 Q These are the DP&L drivers would  
20 that say that?

21 A (Nodding in the affirmative.)

22 Q Is that right?

23 A Yes.

24 Q Just sort of a fun question. Do you  
25 know where the name "Moraine" comes from?

1           A     Moraine told me that Dad -- or my  
2     dad told me that Moraine was the end of a glacier.  
3     And that's why so much of his attention was on  
4     Sandy Mountain, which is where the cemetery sat, is  
5     where the glacier ended, and all that topsoil and  
6     sand and gravel got mixed in and pushed down to  
7     that area. I thought that was pretty --

8           Q     Sounds good.

9           A     And I might add that that -- the  
10    area -- we got to see the photo on Sunday of 1939  
11    showed when Dad had first bought -- him and Mr.  
12    Fink had that area that it was all swamp land. And  
13    the one area where Dayton Power and Light has their  
14    service building there, you could tell it was all  
15    swamp land. They eventually drained everything and  
16    made it feasible for building and stuff, so --

17          Q     You're talking about the service  
18    building over across what's now Dryden Road?

19          A     Right.

20          Q     All right. Just one other question  
21    about the liquid pit you identified on Exhibit 2 in  
22    front of you. Was fly ash put into the pit to  
23    absorb extra liquid at any point?

24          A     Right.

25          Q     Tell me about that.

1           A     Well, because it was so -- like I  
2     said this morning, it was so powdery and it would  
3     absorb moisture, you know, water. The fly ash and  
4     the powder and then the brake -- the brown brake  
5     stuff that came from, I think, Delphi or whatever,  
6     the Brake Division of GM, it would just absorb all  
7     that liquid and stuff that was in there. So the  
8     closer we would push it to there, it pushed that  
9     pond, if you want to call it, or water over to the  
10    edge. So eventually we were trying to force it  
11    just to be solid land.

12           Q     You're talking about the liquid pit  
13    now; right?

14           A     Right, mm-hmm.

15           Q     And the fly ash came from DP&L that  
16    was used there?

17           A     Right, mm-hmm.

18           Q     You have to say audibly.

19           A     Yes. Sorry.

20           Q     No problem.

21                     Just one other feature on the site I  
22    wanted to ask you about. Did your dad own a piece  
23    of property -- I think it's a triangular piece of  
24    property across Dryden Road?

25           A     Yeah. It's 2942.

1                   Q     The witness is pointing to Exhibit  
2     2. Can you write something in there so we know  
3     what you're talking about?

4                   A     (So complies.)

5                   Q     You wrote in in light blue "parking  
6     lot DP&L" in a triangular piece of property across  
7     Dryden Road and across -- inbounded by East River  
8     Road; is that right?

9                   A     Yes.

10                  Q     Tell me about that piece of  
11     property. Just I want to complete the story.

12                  A     Well, that was where the farmhouse  
13     for that -- this area of land, whoever had the farm  
14     at that time when Dad had bought it, we lived there  
15     for a while. Or actually they did. I wasn't born  
16     yet. He told me that's where they lived, and they  
17     were close to the dump and stuff. Once the house  
18     got torn down, it was an empty lot. And so DP&L  
19     needed more parking space. They ran out. So Dad  
20     at first let 'em use it. And I don't know if he  
21     ended up selling to 'em or what, but that was their  
22     -- where they put a lot of their trucks. And  
23     they're still there today. It's fenced off now,  
24     gravel.

25                  Q     Did you see that spot on Sunday?

1 A Yes, I did.

2 Q All righty. I think that's all I  
3 wanted to say on that line.

4 A Larry, could I add something on that  
5 parking lot? 'Cause I think it would be important.  
6 Doesn't matter.

7 Q I don't think I can say no. Go  
8 ahead, Ed.

9 A Why I know these -- about the  
10 parking area is because when we bought the HUD  
11 houses Dad let me have one of 'em, and at that time  
12 is when they were trying to go from natural gas to  
13 all electric, and that was around '71, '72. And I  
14 tried to purchase a gas meter, and Dayton Power and  
15 Light said they weren't able to do it no more, that  
16 you had to convert to electric. And so I called  
17 Dad and said, "Dad, we can't get heat here." He  
18 said, "What do you mean?" I said, "Well, I talked  
19 to DP&L." And he said, "Well, let me take care of  
20 it." Two hours later a DP&L truck pulled up. I  
21 asked Dad what he did. He said, well, he called  
22 whoever -- a friend of his down there and said, "If  
23 you don't get my son a meter," he said, "get the  
24 trucks off my lot." I mean, it was all kidding  
25 around, but I'll never forget that. So --

1 Q Sounds good. Thanks, Ed.

2 Now, I'm going to start going through a  
3 list of companies, and pretty much in alphabetical  
4 order it looks like, and ask you whether or not to  
5 your knowledge the particular company sent waste to  
6 the site and maybe ask you a little more detail  
7 about what you know about their waste and when and  
8 how often and that kind of stuff. Are you ready?

9 A I'm ready.

10 Q First company's name is A.E. Fickert  
11 and Son. Actually, you mentioned that company  
12 earlier today.

13 A I worked for them, yes.

14 Q Did they send waste to the South  
15 Dayton Dump site?

16 A Yes, they did.

17 Q What kind of waste?

18 A Theirs was mostly construction  
19 debris, cans of paint, empty paint cans, drywall  
20 mud cans, drywall -- actual drywall/plaster  
21 products, plastered walls and stuff like that.

22 Q Did they self-haul, do you know?

23 A Pardon me?

24 Q Do you know if they'd self-haul or  
25 used somebody else? When I say "self-haul," did

1     they bring their own stuff in their own trucks?

2                   A     Yeah, yeah, yeah.

3                   Q     The answer is --

4                   A     Yes.

5                   Q     -- they did bring their own stuff in  
6     their own trucks?

7                   A     Right.

8                   Q     Okay. And what about how often were  
9     they coming in?

10                  A     Maybe twice a week.

11                  Q     And what about the time period when  
12     you were observing them come in?

13                  A     When I really noticed 'em was when I  
14     was about 15 and 16 'cause I had always asked the  
15     drivers -- I wanted to work for 'em 'cause I really  
16     liked construction. So -- they ended up hiring me  
17     down the road. So --

18                  Q     Now, do you know if they're bringing  
19     stuff when the site began when you were 15 and 16,  
20     or is that when you just first noticed it?

21                  A     That's when I really paid attention  
22     to it.

23                  Q     Okay. Is that about when you  
24     started thinking you really wanted to do  
25     construction?

1                   A     Well, I -- it's another story, but

2     --

3                   Q     We'll let that one go.

4                   A     Yeah.

5                   Q     Now, the next name on my list is  
6     Bergstrom Paper. Is that familiar to you?

7                   A     Pardon me?

8                   Q     Bergstrom Paper, B-E-R-G-S-T-R-O-M.

9                   A     (Indicating in the negative.)

10                  Q     Not familiar to you?

11                  A     No.

12                  Q     Now, the next one looks like a  
13     trucking company called Blaylock Trucking.

14                  A     Blaylock, yeah.

15                  Q     What can you tell me about Blaylock  
16     in relation to South Dayton Dump?

17                  A     Well, they're -- if I'm not  
18     mistaken, over on South Dixie they had their  
19     landfill and stuff. The stuff they didn't want  
20     came over to our landfill. And what we didn't want  
21     -- or what we could not take we sent over there  
22     like the garbage products and stuff like that.  
23     Kenny would always say, "Go down to Dorothy Lane,"  
24     you know.

25                  Q     "Go down to Dorothy Lane" you said?

1 A Yeah.

2 Q To go to the Blaylock location?

3 A Right.

4 Q What kind of stuff didn't Blaylock  
5 like that ended up where you were?

6 A Lots of cardboard. Since we had the  
7 incinerator, a lot of the skids and stuff like  
8 burnable stuff.

9 Q Even before the incinerator --

10 A Yeah.

11 Q -- was Blaylock sending stuff?

12 A Yeah. We'd burn it. And theirs was  
13 mostly garbage from grocery store chains and stuff  
14 like that.

15 Q They weren't a burning dump?

16 A No.

17 Q And you were?

18 A Yes.

19 Q So burnables they moved from their  
20 -- they moved over to your dump?

21 A Right.

22 Q And does that go back to when you  
23 were a little kid?

24 A I'm pretty sure because over there  
25 next to the dump they had a movie theater, a

1 drive-in movie theater, and Dad when he'd take us  
2 he told us stories about that.

3 Q Did you observe the Blaylock trucks  
4 coming in to your site?

5 A Yeah, mm-hmm.

6 Q And what about -- in addition to  
7 burnables, what about industrial waste? Was that  
8 coming in from Blaylock?

9 A I don't remember from them.

10 Q Here's one since you got a can right  
11 in front of you. What about Coca-Cola?

12 A Yeah.

13 Q Yeah, what?

14 A We got a lot of stuff from them.

15 Q What kind of stuff?

16 A Wooden -- you know, wooden Coca-Cola  
17 for cases of Coke.

18 Q Mm-hmm.

19 A We got a lot of their bottles, you  
20 know, ones that used to be --

21 Q A nickel or a penny?

22 A Two cents apiece. They would be  
23 chipped or something. They were damaged, and  
24 they'd come in truckloads. And then sometimes  
25 there would be cartons of syrup would come in like

1 paper boxes, and they'd dump big -- a whole bunch  
2 of that off.

3 Q Anything else that you can think of?

4 A That's all I can think of at the  
5 moment.

6 Q What about frequency? How often was  
7 it coming in from Coke?

8 A They would come maybe once a month  
9 maybe, something like that.

10 Q What size of loads were they coming  
11 in on?

12 A I don't remember.

13 Q Their own trucks or were they using  
14 --

15 A Coca-Cola emblem was on 'em, but I  
16 don't remember what --

17 Q Does this go back to when you were a  
18 little kid?

19 A Yeah.

20 Q All right. And what about their  
21 competitor, Pepsi-Cola?

22 A I don't remember.

23 Q You don't remember Pepsi coming in?

24 A No, hmm-mm. They were closer, I  
25 think, to Powell Road because they were up north.

1 So I don't think --

2 Q You don't have any memory of Pepsi  
3 coming to SDD?

4 A No.

5 Q Since we're going in alphabetical  
6 order, you mentioned earlier today a hauling  
7 company named Container Service.

8 A Right.

9 Q What was their connection to SDD?  
10 Did they bring waste to your site?

11 A Larry Brandon and another gentleman  
12 ran that company before they were bought out by a  
13 Chicago-based outfit, and they would mainly dump at  
14 Blaylock's because it was mostly garbage and stuff.  
15 There was a couple chicken packing places, Valley  
16 Farms, I think. All the chicken parts would come  
17 in that.

18 Q They would go to Blaylock, the  
19 chicken parts --

20 A Yeah.

21 Q -- or to you?

22 A Yeah.

23 Q Okay.

24 A But that was General Refuse and  
25 Container Service. Container Service was more the

1 service of the containers. They'd bring 'em in --  
2 when I worked for Larry that's -- they would bring  
3 'em in, and we would reweld 'em if they got bent up  
4 and paint 'em. But General Refuse was the actual  
5 hauling company.

6 Q General Refuse in your mind was  
7 connected somehow to Container Service; right?

8 A Yeah.

9 Q Same owners in your mind?

10 A Yeah, mm-hmm. There was one -- a  
11 third party in the Container Service, and I don't  
12 remember -- Ed -- Ed something.

13 Q Okay. And you said that you  
14 believed that Container Service was bought out by a  
15 Chicago outfit?

16 A Yeah, mm-hmm.

17 Q Do you happen to remember the name  
18 of it?

19 A IWD I think was the name of it.

20 Q All right. Now, how about Danis?

21 A B.G. Danis, yeah. We got a lot of  
22 construction material from like building projects.  
23 They did mostly commercial work, and so we got a  
24 lot of their construction debris.

25 Q And when you say "commercial work,"

1 can you remember any -- who their commercial  
2 customers were?

3 A Like I think when Rike's Kettering  
4 was being built, you know, big projects. Dorothy  
5 Lane -- or Hills and Dales Shopping Center when  
6 they would remodel. Places -- big outfits like  
7 that.

8 Q Big development work?

9 A Big development work, yeah.

10 Q What about frequency of Danis coming  
11 to SDD?

12 A At least once or twice a week.

13 Q And what did their trucks look like?  
14 Do you remember what they looked like?

15 A Well, it said "B.G. Danis" on 'em.  
16 I think they were red trucks, I believe.

17 Q But they said "B.G. Danis"?

18 A Yeah.

19 Q And "B.G." were the initials?

20 A B.G., yeah.

21 Q Do you know what "B.G." stood for?

22 A Huh?

23 Q Do you know what "B.G." stood for?

24 A Hmm-mm.

25 Q Me either.

1           Just on the subject of General Refuse,  
2    which you said in your mind was connected to  
3    Container Service, do you know who their customers  
4    were?

5           A     Like I said, Valley Farms. I know  
6    that. Liberal Markets, Kroger's. Later on Liberal  
7    turned to Metro Markets. Just about any  
8    businesses. Now, when the Dayton Mall came into  
9    play a lot of them -- their trash came to -- if  
10   it's cardboard or stuff like that, it came to the  
11   dump.

12           Q     To your dump; right?

13           A     Yeah.

14           A     And then like I mentioned that  
15   Blaylock got all the garbage.

16           Q     Right. All right. I'm going to  
17   move on now to a company called D-A-P, DAP. DAP  
18   Products perhaps?

19           A     Yeah, they were up by  
20   Wright-Patterson. They had a lot of caulking,  
21   silicone products, came in tubes, construction  
22   stuff.

23           Q     Were they a customer of the South  
24   Dayton Dump?

25           A     Yeah, mm-hmm.

1 Q And you saw their trucks come in?

2 A I don't think they had a truck.

3 Q How did they get their stuff to your  
4 site?

5 A I don't know.

6 Q Maybe used another hauler?

7 A Probably, yeah.

8 Q So how do you know they were coming  
9 into your site if you didn't see the trucks?

10 A Because I saw the tubes.

11 Q And did it say DAP on it?

12 A Yeah, mm-hmm.

13 Q Oh, it said "DAP" right on the  
14 tubes?

15 A Right on the tubes, yeah.

16 Q Okay. Any other stuff coming in  
17 from them that had their name on it?

18 A They had cans of window glazing that  
19 would come in.

20 Q It said "DAP" on those, too?

21 A Mm-hmm.

22 Q Did they have an emblem of any kind  
23 that you remember?

24 A I don't remember.

25 Q You want to think about that one?

1 A Yeah.

2 Q Okay. Here's another one for you.  
3 Everyone's favorite, Dayton Daily News.

4 A (Nodding in the affirmative.)

5 Q You're shaking your head. What do  
6 you know about them?

7 A Mostly paper or cardboard.

8 Q Were they a customer of SDD, South  
9 Dayton Dump?

10 A Not as much. They would go to  
11 Blaylock because it was mostly -- their paper and  
12 stuff had -- couldn't be recycled at the time, and  
13 they would bury it until Larry Brandon came up with  
14 the idea to make insulation out of it, and I think  
15 he got the bulk of their business.

16 Q Container Service got the bulk of  
17 their business?

18 A Mm-hmm.

19 Q And did that material come to SDD?

20 A No, just when -- it was called  
21 Dayton Fiber. That was Larry Brandon. That's what  
22 the newspaper --

23 Q I got you.

24 A It was over on -- I think I  
25 mentioned on West River Road, and they would shred

1 the newspaper up and then put a chemical with it  
2 and made insulation that you would pour in your  
3 attic.

4 Q Got you. Now, what about ink or  
5 waste ink from Dayton Daily News? Did that come to  
6 your site?

7 A Yes, it would.

8 Q And tell me about that. What do you  
9 remember about that?

10 A Well, when I stepped in it, it got  
11 all over my shoes. I wasn't very happy. It was a  
12 blue color. It was between McCall's and Dayton  
13 Daily News that a lot of -- and Journal Herald at  
14 the time, which was part of Dayton Daily. It was  
15 the morning --

16 Q Morning edition?

17 A -- Journal.

18 Q Morning paper?

19 A Right.

20 Q That was called the Journal Herald?

21 A Journal Herald, yeah.

22 Q It goes back a long way.

23 So how did Dayton Daily News get its ink  
24 waste, as well as Journal Herald, how did they get  
25 their ink waste to SDD?

1                   A     Trucks. But I don't remember --  
2     yes, they did have Dayton Daily -- "Journal Herald"  
3     on the side of 'em. That's it. They were big  
4     white like box trucks.

5                   Q     Right.

6                   A     And they would come in that.

7                   Q     And what kind of containers was the  
8     ink in?

9                   A     Ink was in like tubes. That's what  
10    I say, if you didn't watch where you walked, you'd  
11    step on that tube and that ink would fly  
12    everywhere, and it was very annoying to us on the  
13    dump.

14                  Q     I can imagine. How frequently did  
15    you see these Journal Herald -- white Journal  
16    Herald trucks come in with the ink tubes?

17                  A     They had loads come in twice a week,  
18    something like that.

19                  Q     For what period of time?

20                  A     Oh, what period of time?

21                  Q     When you were a little kid?

22                  A     I remember it as a teenager mostly.

23                  Q     Okay. So that -- and you also you  
24    just mentioned McCall's. I'll jump ahead. That's  
25    really an M, but since you mentioned them let's

1 talk about McCall's.

2 Were they connected to Dayton Daily News,  
3 or is that a separate entity?

4 A I don't know. I believe it was a  
5 separate entity.

6 Q And a magazine, McCall's?

7 A Hmm?

8 Q They were a magazine, weren't they?

9 A They made magazines, yeah.

10 Q And did they also bring in ink  
11 waste?

12 A Ink waste. Some of their barrels --  
13 big barrels came from their -- I don't know, some  
14 kind of solvents or something, and then --

15 Q So they actually brought drums in?

16 A Yeah, mm-hmm.

17 Q All right. And what kind of a load  
18 of drums would come? Well, let me ask what kind of  
19 truck? Did they have -- it say "McCall's" on the  
20 truck?

21 A Yeah.

22 Q What sort of truck was it, if you  
23 remember?

24 A Panel truck.

25 Q And full of drums?

1                   A     No, just maybe a couple, you know.

2     And then sometimes if there weren't a lot of  
3     magazines we were allowed to take it. But, in  
4     general, we didn't -- it was sent, I think, to  
5     Blaylock.

6                   Q     What was sent to Blaylock?

7                   A     The magazines. But every now and  
8     then we'd get 'em. I remember we'd sit there and  
9     read 'em sitting on a couch or chair eating our  
10    lunch.

11                  Q     Reading McCall's?

12                  A     Yeah.

13                  Q     Tell me about the drums. How -- how  
14    many drums would McCall's bring, say, in a month?

15                  A     Maybe 50, something like that.

16                  Q     Okay.

17                  Q     And how often would you see a  
18    McCall's truck coming into the dump?

19                  A     Once a week.

20                  Q     Okay. I just had a thought here.

21    Oh, and where did the ink go? Did it go to the  
22    pit, or did it go to the heavy --

23                  A     The ink are you asking?

24                  Q     Yeah, the drums.

25                  A     Oh, the drums would be dumped down

1 at the pit.

2 Q Not at the other location near  
3 building 3, the heavier?

4 A Like I said, it all depends if they  
5 were full and we could catch 'em, you know, so --

6 Q It could have been in either  
7 location?

8 A I think McCall's came at night.

9 Q Oh, really?

10 A Yeah.

11 Q Did they have a key?

12 A I think so. Well, they had to have,  
13 you know. But they -- I don't know.

14 Q You did observe their trucks on  
15 occasion?

16 A Huh?

17 Q You did observe their trucks on  
18 occasion?

19 A When -- sometimes through like on  
20 the weekends, stuff like that, if I worked Saturday  
21 they might have came on a Saturday. So that's --  
22 but through the week I don't remember recalling the  
23 emblem or, you know, McCall's. But the evidence  
24 was there because you got the magazine that said  
25 "McCall's" on it.

1 Q And do you remember what their  
2 emblem looked like?

3 A No.

4 Q Let me throw out Miami Valley  
5 Hospital. Well, no, no, no. I'll get to that  
6 later. I just jumped ahead to McCall's. Let me  
7 jump back, back to D.

8 Dayton Industrial Drum we already spoke  
9 about. Anything more on them that you recall?

10 A Hmm-mm.

11 Q How about Dayton Mental Hospital?  
12 Were they a customer of SDD, South Dayton Dump?

13 A No. But my dad from history told me  
14 that from their -- they found like a suitcase, a  
15 leg with a boot on it, and he said that came from  
16 the state hospital. So whether or not they were a  
17 constant -- but that put the fear in my cousins and  
18 I. We didn't want to find something like that. So  
19 we didn't open up suitcases. That was what I was  
20 told.

21 Q We'll keep that one in mind. What  
22 about the Dayton -- City of Dayton School Board?  
23 Were they a customer?

24 A Yes. We got desks. A lot of desks.

25 Q Anything else?

1           A     Desks, some books. But we got a lot  
2 of like wooden cabinets and stuff like that.

3           Q     Was that burnable stuff?

4           A     Yeah, mm-hmm.

5           Q     Gum under the desk?

6           A     Pardon me?

7           Q     Gum under the desk?

8           A     Well, no.

9           Q     All right. What about Dayton Tire  
10 and Rubber Company?

11          A     Pardon me?

12          Q     Dayton Tire and Rubber Company.

13          A     What about 'em?

14          Q     Yeah. Were they a customer of the  
15 South Dayton Dump and Landfill?

16          A     Yes.

17          Q     What can you tell me about Dayton  
18 Tire and Rubber Company as a customer?

19          A     They brought like -- I remember a  
20 lot of inner tubes 'cause we'd take the tubes up  
21 and fix 'em and take 'em over to the pond and float  
22 on 'em. They brought tubes, and there was a rubber  
23 -- a rubber I'll call it a shroud that would come.  
24 Some tires. It wasn't a whole lot that I remember.  
25 Now, I think Doyle got a lot, 'cause if I'm not

1 mistaken Doyle told me -- the recapping came into  
2 play at that time, so Doyle would get a lot of the  
3 recap or the tires off the cars that were pretty  
4 worn and stuff like that. I don't remember if  
5 they'd go in to Dayton Tire or how -- where they  
6 were recapped at. But I remember the big trucks  
7 would come in, and they'd load all these tires up  
8 and send 'em somewhere.

9 Q Now, the Dayton Tire and Rubber the  
10 stuff that came from them to your operation, to the  
11 landfill operation, what kind of -- did it come in  
12 -- whose trucks did it come in?

13 A I remember 'em coming in in their  
14 trucks.

15 Q Dayton Tire and Rubber had their own  
16 trucks?

17 A Right, mm-hmm.

18 Q Hauled their own waste?

19 A Pardon me?

20 Q Hauled their own waste to South  
21 Dayton Dump?

22 A Yes.

23 Q Can you describe what their trucks  
24 looked like?

25 A All I remember is they had a horse

1 on 'em inside of -- they had looked like a ring and  
2 then there was a horse.

3 Q Okay. This will be Exhibit Number  
4 4. That's the colored version. We'll pass out the  
5 black and white version.

6 (WHEREUPON, Grillot  
7 Deposition Exhibit Number 4  
8 was marked for  
9 purposes of identification.)

10 Q All right. I'm putting in front of  
11 you Exhibit 4.

12 A The horse right there.

13 Q Can you repeat that?

14 A I said I see the horse.

15 Q Is that the same horse you were just  
16 referring to?

17 A Yeah.

18 Q And that's a horse in the middle of  
19 that emblem?

20 A Yeah. I think someone -- either the  
21 driver or Uncle Kenny or Alcine told me that they  
22 made pony tires or something like that or pony  
23 something. And that's what I remember from them  
24 coming in.

25 Q Now, the Dayton Tire and Rubber

1 trucks that you saw -- well, let me withdraw that.

2 Do you ever remember any trucks that had  
3 cages on them?

4 A Yeah.

5 Q Whose trucks were those?

6 A I don't know.

7 Q Do you remember if Dayton Tire and  
8 Rubber had cages on their trucks?

9 MR. MOSS: Objection, leading.

10 THE WITNESS: I don't know.

11 BY MR. SILVER (Continuing):

12 Q And what about frequency of the  
13 Dayton Tire and Rubber trucks coming into the South  
14 Dayton Dump?

15 A I'd say once a week maybe.

16 Q And what period of time do you  
17 remember those trucks?

18 A Through the day.

19 Q Excuse me?

20 A Through the day.

21 Q Through the day?

22 A Yeah.

23 Q And what about when you were young  
24 when you first started working at repairing the  
25 landfill, did you see them then?

1 MR. MOSS: Objection, leading.

2 THE WITNESS: Like I said, I just  
3 remember the pony.

4 BY MR. SILVER (Continuing):

5 Q How about at what age were you when  
6 you started seeing them?

7 A Maybe ten or 12, something like  
8 that.

9 Q And do you remember anything else  
10 that came from Dayton Tire and Rubber other than  
11 what you already discussed in those trucks?

12 A That was it.

13 MR. HARBECK: I'm sorry. I didn't hear.

14 THE WITNESS: Is he talking to me?

15 BY MR. SILVER (Continuing):

16 Q Yeah, they couldn't hear your answer  
17 to that question.

18 A Oh, he didn't hear. Yes. Or what  
19 was the question?

20 (Whereupon, the answer was read back by  
21 the court reporter.)

22 Q I just want to throw out  
23 Wright-Patterson Air Force Base. Did you ever hear  
24 of that location?

25 A Wright-Pat?

1 Q Yeah. Do you know about Wright-Pat?

2 A Yeah.

3 Q Was Wright-Pat ever a customer of  
4 South Dayton Dump and Landfill?

5 A I don't think -- I think they had  
6 their own dumping facility.

7 Q You don't remember anything coming  
8 from them?

9 A No.

10 Q What about a company called Duriron?

11 A Duriron, yes.

12 Q Yes, what?

13 A I remember them.

14 Q Were they a -- was Duriron a  
15 customer of South Dayton Dump?

16 A Yes.

17 Q Okay. Would you characterize -- how  
18 would you characterize them in terms of size of  
19 customer?

20 A Size of what?

21 Q Customer, you know, importance.

22 A They were a good customer.

23 Q And describe to me what came in from  
24 Duriron to SDD.

25 A Why I remember so vaguely -- or not

1 vaguely, but why I remember is because the device  
2 that they brought in looked like the Apollo space  
3 craft. It was a big cone that had steel shooting  
4 out of it that was hot. It would come in -- we  
5 called it a hot load. And when it came in we had  
6 to take it down to the bottom pit to dump it 'cause  
7 it was so heavy and hot that it would lay in the  
8 fly ash and the liquid, and sometimes it would  
9 catch the liquid -- because the liquid would be  
10 sometimes a little toxic. It would catch that on  
11 fire.

12 Q And what was in these capsules?

13 A I was told from Kenny that when they  
14 melted steel that it was the sludge off the junk  
15 that came off the top of it, and they would push it  
16 into some device that looked like a bowl, and then  
17 they would dump it in the back of the truck. It  
18 was the by-product, I think, of melting something.

19 Q You just described what Kenny told  
20 you. What did you actually observe about what was  
21 coming in from Duriron? Did you actually see --  
22 tell me what you observed personally.

23 A Yes, it would come in with a truck  
24 that had a container that was on two chains 'cause  
25 it was so hot. And it would be swinging, and it

1 would be smoldering. And, like I said, you could  
2 see steel rods and angle irons sticking out of it.  
3 It was a pretty cool sight.

4 Q The trucks that hauled these  
5 capsules, did they have a Duriron name or emblem on  
6 them?

7 A Yeah, "Duriron."

8 Q You saw "Duriron" on the trucks?

9 A On the doors, yeah.

10 Q What kind of frequency did you see  
11 Duriron come in to the site?

12 A We'd have at least one or two  
13 capsules a day coming in there. There's a lot of  
14 'em underneath that ground.

15 Q What did you do with the capsules?

16 A I said we took them down to the pit  
17 because we were afraid if we got 'em too close to  
18 the surface the dozer or whatever would hit the  
19 metal, and they were so hot.

20 Q What would hit the metal? You said  
21 something might hit the metal if they were close to  
22 the surface?

23 A With the rods and stuff that stuck  
24 out of the bottom -- say the capsule or the cone,  
25 the bottom part of the cone had stuff sticking out

1 of it that, I guess, didn't get melted or whatever.  
2 I don't know the process. But a lot of times that  
3 would be visible. And then when they'd dump it, it  
4 depends on if they got it upside down or if they  
5 had it up. But then when you tried burying 'em you  
6 just can't move 'em. They're so heavy. They'd go  
7 right into the fly ash.

8 Q So did the operation dump them into  
9 the liquid pit?

10 A Yeah, mm-hmm.

11 Q That was the -- that was the  
12 practice of the South Dayton Dump and Landfill to  
13 dump them in the liquid pit?

14 A Right, mm-hmm.

15 Q And you observed this?

16 A Yes.

17 Q And tell me when you first started  
18 observing, if you can recall, Duriron's trucks  
19 coming in with these capsules?

20 A Nine or ten. Pretty early in life.

21 Q And what about continuous until  
22 when? Was it continuous?

23 A Till I left, you know.

24 Q And you left again in -- at what age  
25 that you're referring to as far as Duriron's

1 concerned?

2 A Well, I was 15, 16 the first time I  
3 left or, you know, when I worked for Doyle.

4 Q And when you came back, did you  
5 continue to see the Duriron trucks with the  
6 capsules?

7 A I saw capsules, but you seen one you  
8 seen 'em all at that time, so whether they were  
9 still bringing them in I --

10 Q You remember seeing the Duriron  
11 trucks after you returned from Doyle?

12 A Yes, I did. Yes. But, you know,  
13 the trucks come and go. You see 'em on the road,  
14 so --

15 Q What about the Duriron trucks coming  
16 in to SDD after you returned from Doyle?

17 A Yes.

18 Q All right. Now we're moving on to  
19 another company named Durel Paint, D-U-R-E-L.

20 A Durel.

21 Q Sorry, Durel.

22 A Durel Paint.

23 Q What can you tell me about Durel  
24 Paint?

25 A One-gallon paint cans -- quart cans,

1 one-gallon paint cans and five-gallon metal  
2 buckets. 'Cause I'd use them buckets to put the  
3 metal in to haul it up to the office. We'd empty  
4 out the paint and stuff and let it dry. They made  
5 good buckets for --

6 Q So Durel Paint was a customer of  
7 South Dayton Dump and Landfill?

8 A Right.

9 Q And how did they bring their paint  
10 -- how about paint thinners? Did any paint  
11 thinners come from them?

12 A They had different solvents, yeah.

13 Q And you know that because why? How  
14 do you know that?

15 A 'Cause we'd use some of the  
16 solvents, you know, for different things on the  
17 dump.

18 Q How did you use the solvents?

19 A Well, like some buckets would have  
20 something in there that was oil-based paint. This  
21 is when latex started coming in. And oil-based  
22 paint we could pour it in there and keep dumping  
23 out in different buckets, get most of that paint  
24 deposit out.

25 Q Use solvents to get the oil-based

1 paint out?

2 A Some of the solvents we used to get  
3 the bolts off of things that we tried to take apart  
4 'cause it would eat the rust off of it until Uncle  
5 Kenny said we should start using Coca-Cola, and  
6 that was the best.

7 Q So before that you were using Durel  
8 paint solvents to get those bolts off?

9 A We'd get bikes in a lot, and we'd  
10 put new tires on and stuff. And to get the bolts  
11 off, to lubricate the chains, we'd use different  
12 material that would come in.

13 Q And Durel Paint did they come in in  
14 their own trucks?

15 A Yeah, they had -- it was like a  
16 paint van almost, a white van.

17 Q And did it say "Durel" on it?

18 A Yeah, mm-hmm.

19 Q Do you remember any kind of emblem  
20 that they had?

21 A No.

22 Q And what about frequency? How often  
23 were you seeing their trucks come to the land --

24 A I'm sorry. I remember Day Ton.  
25 They had a paint I think called Day Ton.

1 Q Mm-hmm.

2 A And I remember seeing their cans. I  
3 remember that.

4 Q All right.

5 A It was D-A-Y and then below it said  
6 T-O-N, Day Ton. It was like a cheaper paint, you  
7 know.

8 Q Sounds like a play on words on  
9 Dayton.

10 A Yeah.

11 Q All right. So how frequently did  
12 you see the Durel Paint truck come in?

13 A Maybe once a month, maybe every  
14 couple months. They didn't come in that often.

15 Q Starting when you were a youngster?

16 A Yeah, mm-hmm. Their plant was over  
17 on the east side and close to -- we had a company  
18 come called Hewitt Soap Company, and I remember  
19 'cause I would go over there and I wanted to see --  
20 you know, when your stuff comes in, you want to  
21 know where it comes from. I'd go look at the  
22 factory. I was hoping I'd get a better job some  
23 day out of one of these companies.

24 Q Did you typically go check out the  
25 factory of the companies that brought waste to the

1 site?

2 A Pardon me?

3 Q Did you often check out the factory  
4 of the companies that brought waste to the site?

5 A Yeah, to see where -- it was  
6 curiosity mostly.

7 Q What other companies did you go  
8 check out?

9 A When I worked for Larry Brandon we  
10 -- one of the jobs I got during the wintertime was  
11 I worked at McCall's.

12 Q What about that?

13 A Well, since General Refuse had a  
14 container there that squished paper and cardboard  
15 in it, I got to talk to that -- those operators.  
16 But my job was to clean -- keep snow off of the  
17 driveways and salt 'em down and stuff like that,  
18 clean the -- I had a Jeep where I cleaned the  
19 parking lots of the snow.

20 Q This is at McCall's?

21 A Yeah, mm-hmm.

22 Q What other customers did you visit  
23 in terms of checking out their manufacturing plant  
24 or factory?

25 A Well, I had -- I went up to Inland

1 'cause they made -- they had a lot -- made a lot of  
2 steering wheels. Then they had baskets that they'd  
3 put the steering wheels in, I guess, to have 'em  
4 coated with a certain rubber type of thing.

5 Q Which one of the Inland plants did  
6 you take a look at?

7 A That was up off of -- on the west  
8 side. It was --

9 Q West side of Dayton; right?

10 A Yeah. McCall Street -- well, McCall  
11 Street and -- I don't remember the other street.  
12 There was a big plant.

13 Q Any other customers' plants that you  
14 visited?

15 A We went out to DAP 'cause Dad told  
16 me that DAP had -- they had displays of windows  
17 that they would glaze to see how long their product  
18 would last, and I wanted to see that. So I  
19 remember going up there.

20 Q That was up near you said  
21 Wright-Pat?

22 A Right.

23 Q Any other companies that their  
24 plants you visited?

25 A Frigidaire. Got to go down to

1 Frigidaire. That's about it. That's all I can  
2 remember right now. I'm sorry. I'm getting kind  
3 of a little bit of a headache.

4 Q All right. You want to take a  
5 little break?

6 A No, no.

7 Q All right. We're going to keep  
8 moving along here.

9 A Okay.

10 Q I only have about four or five pages  
11 of companies to get through.

12 A Okay.

13 Q Earl Scheib of Ohio.

14 A Yeah. Yes.

15 Q What can you tell me about Earl  
16 Scheib?

17 A Well, I knew their paint jobs were  
18 19.95. But they'd bring paint -- empty paint drums  
19 and stuff like that, paint cans, solvent cans, a  
20 lot of like masking tape and plastic, stuff like  
21 that.

22 Q And they brought it to the South  
23 Dayton Dump and Landfill?

24 A Right.

25 Q Is that right?

1 A Yes.

2 Q And you observed it?

3 A Yes.

4 Q And what kind of vehicle were they  
5 coming in?

6 A I don't remember them.

7 Q How do you know it was Earl Scheib?  
8 What made you think it was Earl Scheib?

9 A 'Cause I wanted to see -- I asked  
10 one of the drivers one time how they can do it for  
11 19.95, and I remember talking to him. I said,  
12 "Where you guys from?" He said, "We're over off of  
13 Oakwood." I said, "Well, that's where I live." So  
14 I remember the conversation with the guy.

15 Q And he told you they were from Earl  
16 Scheib?

17 A Yeah, mm-hmm.

18 Q Did you understand it to be an Earl  
19 Scheib truck or some hauler?

20 A I don't know.

21 Q You just know from talking to the  
22 driver?

23 A From talking to the guy, yeah.  
24 Sometimes there would be receipts would come with  
25 the stuff, receipts and stuff like that.

1 Q You might see the name on a receipt?

2 A Yeah, mm-hmm.

3 Q What about frequency? Do you have  
4 any sense of how often Earl Scheib brought waste to  
5 the site?

6 A Not very often.

7 Q Mm-hmm.

8 A Once every couple months maybe.

9 Q Once every couple of months you  
10 said?

11 A Yeah.

12 Q All right. We'll keep moving. How  
13 about Franklin Iron and Metal? That name came up  
14 earlier today. Were they a customer of the site  
15 bringing waste to South Dayton Dump and Landfill?

16 A Franklin Iron and Metal I remember  
17 them coming, but I don't -- I have seen -- the  
18 trucks were pretty similar to the cones that came  
19 in, so I don't remember --

20 Q Similar to the Duriron cones?

21 A Yeah, mm-hmm.

22 Q Like space capsules?

23 A No, not that I remember.

24 Q You don't remember the space  
25 capsules?

1           A     No, I don't remember them coming  
2     from Franklin.

3           Q     So you remember them from Duriron,  
4     but you don't necessarily remember them from  
5     Franklin Iron and Metal?

6           A     Right.

7           Q     Let me come back to that one. Give  
8     that one some more thought. Okay?

9           A     Okay.

10          Q     You already mentioned Goodwill and  
11     the Salvation Army.

12          A     Yes, yes.

13          Q     They were a customer of South Dayton  
14     Dump and Landfill?

15          A     Yeah.

16          Q     And whose trucks did Goodwill bring?  
17     Did they have their own trucks?

18          A     Like I said earlier, I don't  
19     remember Goodwill actually, but I remember  
20     Volunteers of America and Salvation Army.

21          Q     Okay. And did the Volunteers of  
22     America have their own trucks?

23          A     Yes.

24          Q     And how about Salvation Army? Same?

25          A     Yes.

1                   Q     And what would they -- what would  
2 each of them bring?

3                   A     Furniture products. Like I said,  
4 TVs, radios, household items.

5                   Q     Clothing?

6                   A     Yeah, a lot of clothing.

7                   Q     Do you remember the name Harris  
8 Seybold, S-E-Y-B-O-L-D?

9                   A     Harris?

10                  Q     Seybold, S-E-Y-B-O-L-D.

11                  A     Hmm-mm.

12                  Q     And we just talked about Hewitt  
13 Soap?

14                  A     Right.

15                  Q     Were they a customer of your dump?

16                  A     Yes.

17                  Q     What did they bring in?

18                  A     A lot of shampoo, soap -- things of  
19 soap. We'd take 'em home and use 'em. Dad got  
20 free soap. There would be jars of pink soap I  
21 think that went to like restaurants and stores like  
22 that.

23                  Q     You took it all home, or did you  
24 leave some at the landfill?

25                  A     That's what we used to wash up with.

1 Q So you left some at the landfill?

2 A And then there would be a lot of  
3 boxes of powdered soap.

4 Q And what did you do with that?

5 A Used it.

6 Q Used every bit of it?

7 A (Nodding in the affirmative.)

8 Q What about the shampoo?

9 A Pardon me?

10 Q What about the shampoo?

11 A Yeah.

12 Q You used it all, or did you leave  
13 any in the landfill?

14 A A lot. And then some of the stuff  
15 that -- I guess the fragrance stuff would come in  
16 in bottles, you know.

17 Q Let me ask this. Did anything come  
18 in from Hewitt Soap that was left at the landfill  
19 to be landfilled?

20 A Yeah.

21 Q How often did you see Hewitt Soap --  
22 well, let me ask, did Hewitt Soap have their own  
23 trucks?

24 A I don't remember.

25 Q Do you remember their stuff, though?

1 You remember their waste?

2 A Yeah.

3 Q And what percentage of the Hewitt  
4 Soap stuff coming in was dumped in the landfill, if  
5 you know?

6 A Well, like big -- like they were big  
7 -- these weren't quite 55-gallon drums. They were  
8 smaller drums.

9 Q They were in drums?

10 A Yeah. And so then they would get  
11 down -- taken down to the pit and dumped down  
12 there, stuff that we didn't -- we didn't recognize  
13 it as being something usable, so, you know.

14 Q I see. And what size drums? You  
15 said smaller than 55-gallon?

16 A They were about that wide and maybe  
17 about that high. (Indicating)

18 Q Give me some dimensions so that  
19 we'll have something on the record.

20 A 13 to 14 inches round and about two  
21 feet high.

22 Q Circumference or diameter 13 to 14  
23 inches?

24 A Thirteen to 14 inches --

25 Q Across or around?

1                   A     Across. And then about two feet  
2     high.

3                   Q     And how often did you see these  
4     drums coming in from Hewitt Soap?

5                   A     Hewitt wasn't that often either.  
6     Maybe once every six months. I don't know.

7                   Q     Now I'm going to throw out another  
8     name, Johnson Controls. Is that familiar to you?

9                   A     No.

10                  Q     You don't believe that they were a  
11     customer of SDD?

12                  A     I don't recall them, no.

13                  Q     Here's one, Kimberly Clark.

14                  A     Yes.

15                  Q     They were a customer of SDD?

16                  A     Yes.

17                  Q     What can you tell me about Kimberly  
18     Clark as a customer?

19                  A     I remember the name, but I can't  
20     recall what they brought.

21                  Q     Do you know what kind of business  
22     Kimberly Clark was in?

23                  A     No.

24                  Q     And where is the name coming from  
25     you as a customer? What's your memory of the name?

1                   A     I just remember the name. I thought  
2     it was a neat name for one thing. I liked the  
3     name. So I don't really remember.

4                   Q     Do you remember whether they had  
5     their own trucks?

6                   A     I don't remember.

7                   Q     If you think of anything more about  
8     Kimberly Clark --

9                   A     Okay.

10                  Q     -- let me know. We talked about  
11     McCall's.

12                  A     Miami Valley Hospital. Is that a  
13     familiar name as a customer?

14                  A     We got a lot of dental and  
15     veterinarian stuff, but Miami Valley I don't know  
16     if --

17                  Q     Do you remember who sent the dental  
18     stuff?

19                  A     I remember St. E's bringing some  
20     loads in, but not --

21                  Q     Not Miami Valley?

22                  A     No.

23                  Q     Let's talk about St. E's. That was  
24     a hospital?

25                  A     Yeah.

1 Q Where were they located?

2 A On East -- what is the name of that  
3 road? I think it's called Edwin C. Moses Drive  
4 now. I forget what it used to be called.

5 Q And what sort of materials came to  
6 the dump from St. E's?

7 A Burnable like skids, stuff like  
8 that. Wood products.

9 Q And what kind of frequency were you  
10 seeing stuff from them?

11 A It was very -- I'd say once every  
12 six months.

13 Q Do you remember what sort of vehicle  
14 they came in?

15 A No.

16 Q Do you remember whether they had  
17 their own truck?

18 A No.

19 Q All right. What about Ohio Bell  
20 Telephone Company?

21 A Yeah, they came in.

22 Q To the dump?

23 A Yes.

24 Q They were a customer?

25 A Yes.

1 Q Frequent or not?

2 A Not so often.

3 Q What did they bring?

4 A Mostly old telephones, a lot of  
5 wire. A lot of those like DP&L, the bigger ones,  
6 things the wire came on. They were empty. Spools  
7 I guess you call them.

8 Q Spools?

9 A Yeah.

10 Q Any kind of plastic?

11 A Fittings, a lot of fittings.

12 Q Any plastic material?

13 A A lot of plastic. Covers off of  
14 phones without the guts and stuff like that.

15 Q Mm-hmm.

16 A 'Cause we would take whatever we got  
17 and put -- that was salvageable in the dumpster,  
18 and then with part of DP&L's metal to be taken off  
19 of salvage to a recycling center.

20 Q And what about metals? Did many  
21 metals come in from Ohio Bell?

22 A Well, the inner parts was metal.

23 Q Inner parts of the phones?

24 A Right, mm-hmm.

25 Q Inner parts of anything else?

1 A Not that I can recall.

2 Q And did Ohio Bell bring in -- have  
3 their own truck?

4 A Yes.

5 Q And how do you know that?

6 A 'Cause their emblem.

7 Q What was their emblem?

8 A Ohio Bell.

9 Q Okay.

10 A Before they was AT&T.

11 Q Mm-hmm. And what kind of frequency  
12 were you seeing their trucks?

13 A Hmm?

14 Q How frequently were you seeing their  
15 trucks?

16 A Maybe once a week.

17 Q And let me ask you, what kind of --  
18 do you remember what the trucks looked like, what  
19 size truck?

20 A Mostly came in vans that have the  
21 ladder thing on top of it.

22 Q You observed these yourself?

23 A Yeah, mm-hmm.

24 Q And what age did you start seeing  
25 Ohio Bell?

1                   A     You get a lot of phone -- no, that  
2     was something else. A lot of phone books would  
3     come in.

4                   Q     Where did the phone books come from?

5                   A     L.M. Berry Company.

6                   Q     L.M.?

7                   A     Berry. And they're on South Dixie.

8                   Q     How frequently did you see their  
9     phone books coming in?

10                  A     It would be after their -- after the  
11     new books came out. February -- end of January,  
12     February that all of the old phone books would come  
13     and they'd dump 'em off. I think Larry Brandon  
14     started taking them to recycle for insulation.

15                  Q     Okay. And that was the L.M. Berry  
16     Company?

17                  A     Mm-hmm.

18                  Q     B-E-R-R-Y?

19                  A     Yes.

20                  Q     Back to Ohio Bell. Did you see Ohio  
21     Bell when you first started hanging out at the  
22     landfill when you were a kid?

23                  A     It was later in life. They changed  
24     names so many times. It was like Ma Bell or  
25     something. Then there was South Bell and Northern

1 Bell, you know. I don't really remember. When  
2 they became Ohio Bell I remember them, you know.

3 Q You remember them as Ohio Bell  
4 coming in?

5 A Right, mm-hmm.

6 Q All right. The Ohio Highway  
7 Department we mentioned them as getting some of  
8 your dump. Did they also bring waste to South  
9 Dayton Dump?

10 A Well, their waste would come in from  
11 the barrels that we would sell them that would be  
12 run in by trucks and cars that were so bent up they  
13 couldn't bend 'em back. And then they'd throw all  
14 their highway debris, tires or, you know, like  
15 pieces of semi tires, two-by-fours.

16 Q Stuff they picked up off the side of  
17 the road?

18 A Right, yeah.

19 Q Put them back in those drums?

20 A Yeah, and then bring 'em back and  
21 dump 'em off.

22 Q When you got 'em back, what did you  
23 do with 'em?

24 A Put 'em down in the pit.

25 Q This was the -- not the liquid pit;

1 is that right?

2 A Yeah, the liquid pit, but it would  
3 be Tier Number 2, but they were rolled down into  
4 the pit. So, you know --

5 Q Okay. So Tier 2. They'd come in to  
6 Tier 2?

7 A Right.

8 Q That's where you put them at least?

9 A Right.

10 Q So how frequently did all the Ohio  
11 Highway Department send you back drums, beat up  
12 drums?

13 A Mostly be late spring or early  
14 summer when, you know, we'd always hear on the  
15 news, well, the barrels are out again when they  
16 were working on roads and stuff. And that's when  
17 people would run into 'em and damage 'em and stuff  
18 like that. Through the winter and stuff I think  
19 that they would stock up on 'em and paint 'em  
20 orange and get 'em ready. And then when they had a  
21 road project B.G. Danis or -- I just mentioned  
22 their name the other day. There was two other road  
23 companies or contractors, and they would divide 'em  
24 up with them and use them.

25 Q Okay. So what kind of frequency

1 would you get waste from the Ohio Department of --  
2 Highway Department?

3 A In late spring and summer we'd  
4 probably get a load a day.

5 Q And these drums would have waste in  
6 'em; right?

7 A Right.

8 Q What did they do with stuff they  
9 picked up on the side of the road the rest of the  
10 year?

11 A I don't know. And then over on Tier  
12 4 -- did I mention Tier 4?

13 Q You did.

14 A A lot of road, you know, debris  
15 would be put over there.

16 Q Where did that stuff come from?

17 A The Highway Department.

18 Q And what sort of debris were you  
19 talking about for Tier 4?

20 A Concrete, blacktop, gravel, stuff  
21 like that.

22 Q Was that a year-round thing?

23 A Pretty much, yeah.

24 Q From the Highway Department?

25 A Right.

1           Q     All right. And let me ask you, do  
2     you know of a company named Ohio Seal and Chemical?  
3     Does that sound familiar to you?

4           A     No.

5           Q     And just to make sure, Ottoson  
6     Solvents, O-T-T-O-S-O-N, Solvents, is that a  
7     familiar name to you?

8           A     (Indicating in the negative.)

9           Q     You've got to say out loud.

10          A     No. I'm sorry. No.

11          Q     How about Patterson Iron and Metal?

12          A     We just mentioned that.

13          Q     Yeah. How about them as somebody  
14     that brought waste to the site?

15          A     See, they would come pick most of  
16     our containers up that we loaded metal in. So I'm  
17     confused on what they would bring back. So I don't  
18     know -- and I think they did have a steel -- a  
19     melting process also, but it's not -- I don't have  
20     it in my head right now.

21          Q     We may come back to them if we get a  
22     chance.

23          A     Okay.

24          Q     Let's keep going here.

25          What about a hauler named Peerless or

1 Peerless Transportation?

2 A Peerless Mill?

3 Q Peerless.

4 A Peerless. I remember that name.

5 Q Maybe we'll come back to that one as  
6 well.

7 Here's another company. We're getting  
8 down to the end of the list, and we'll probably  
9 take a break as soon as I finish the list 'cause I  
10 know you're getting a little tired.

11 Sherwin-Williams?

12 A Yeah, they were like Durel paint.  
13 Matter of fact, a lot of the paint that we used on  
14 the buildings came from Sherwin-Williams.

15 Q Really?

16 A Yeah. We'd take gallon buckets,  
17 five-gallon buckets and put it in 55-gallon drums  
18 and mix it up. Whatever color -- we had pink  
19 buildings one year, olive color next year.

20 Q Let me ask this. They were a  
21 customer of the South Dayton Dump and Landfill?

22 A Mm-hmm.

23 Q Answer the question. Your answer is  
24 yes?

25 A Yes.

1 Q And they'd bring drums?

2 A Yeah, mm-hmm.

3 Q And you observed that?

4 A Huh?

5 Q Did you observe them coming in with  
6 drums?

7 A Yes.

8 Q And did they use their own trucks?

9 A Yes.

10 Q And what did their trucks look like?

11 A They were white with "Sherwin-  
12 Williams" written on the side of it. Most of those  
13 came from the old BHA building on Patterson Road.  
14 That was their industrial part. And then they  
15 moved back in the early eighties to over close to  
16 the dump.

17 Q And let me see. What kind of --  
18 what sort of truck was it you described? What was  
19 on the side?

20 A Like a panel truck that had that  
21 lift. Lift on the back of it. That's what they'd  
22 come.

23 Q Do you know what a box truck is?  
24 What would you call a box truck?

25 A It would be a Chevy, GM or Ford,

1     like a two-ton truck, three-ton that would have a  
2     box on the back of it.

3                 Q     Is that --

4                 A     Closed in where they could lower the  
5     door down like a moving -- U-Haul truck.

6                 Q     Is that the same as a panel truck,  
7     or is that something different?

8                 A     I would call a panel truck like the  
9     three-quarter ton, regular van or like a van.

10                Q     And what -- Sherwin-Williams came in  
11     what?

12                A     The box truck.

13                Q     Sherwin-Williams had a box truck?

14                A     Yeah.

15                Q     Before I think you said panel truck,  
16     and I wanted to make sure we're on the same page.

17                A     I'm really getting confused right  
18     now. I'm getting tired. I apologize. Now it's  
19     all getting a little --

20                Q     We'll give you a break now and come  
21     back and finish off the list and then turn it over  
22     to my friends and colleagues.

23                A     Okay.

24                MR. SILVER: All right. So let's take a  
25     quick break.

1 (Whereupon, a recess was taken.)

2 Q Ed, we were going through lists of  
3 companies, and I was asking you whether they were  
4 customers of South Dayton Dump. I've got a few  
5 more. I kind of missed one in the alphabetical  
6 order, so I'll have to jump back for that one.

7 Do you know the name Monsanto?

8 A Yes.

9 Q Do you know whether Monsanto was a  
10 customer at any time of the South Dayton Dump and  
11 Landfill?

12 A Yes.

13 Q Yes, they were?

14 A Yes.

15 Q Okay. Tell me about Monsanto as a  
16 customer.

17 A Well, we got products across the  
18 river. They had a plant or some kind of thing over  
19 there, and then Miamisburg somewhere they had  
20 something else. They call it The Mound. I think  
21 we got some stuff off of them. Skids, stuff like  
22 that to my recollection, paper barrels with stuff  
23 in it. I don't really know what was in it.  
24 Powder stuff.

25 Q Powder stuff in the paper barrels?

1                   A     They were in paper barrels, yeah.

2                   Q     And you mentioned a Monsanto  
3     facility across the river --

4                   A     Right.

5                   Q     -- from the South Dayton Dump?

6                   A     Yeah. It would be -- which I'm  
7     calling Edwin C. Moses, and then East River Road  
8     would come together. They were back in that little  
9     plat back in there.

10                  Q     Are you familiar with a road called  
11     Nicholas Road?

12                  A     Nicholas, yeah, that's it.

13                  Q     Is Nicholas Road related in any way  
14     to Edwin C. Moses?

15                  A     Yeah, I think Nicholas comes down  
16     from up the hill. And I think Nicholas was the one  
17     where they -- where Broadway comes into Nicholas is  
18     where they change it to -- down by the Arena change  
19     it to Edwin C. Moses.

20                  Q     And did you recognize trucks coming  
21     in from Monsanto?

22                  A     Vaguely.

23                  Q     What's your vague recollection?

24                  A     "The Mound," I think, something like  
25     that. I see red letters, but I don't know -- the

1     only thing that I can tell you that I remember is  
2     one of the drivers. And we were talking about  
3     where he was coming from, and I told him that my  
4     dad took me down there and showed me where there's  
5     five points of transportation. Back a long time  
6     ago they had the railroad, trolley, the Erie canal  
7     boats, and we talked about that. And then where  
8     725 -- or Dixie was old 25 Highway, and he said he  
9     came from the Miamisburg plant. So that's what I  
10    remember from Monsanto.

11                 Q     Do you remember -- do you have any  
12    sense of what kind of frequency Monsanto hauled to  
13    the site?

14                 A     No. I'm not -- I would say maybe  
15    once a month maybe, something like that.

16                 Q     Okay. Let me just throw out a  
17    couple more names for you. How about the name Lau,  
18    L-A-U, Fan or Lau Blower? L-A-U. Is that a  
19    familiar name to you?

20                 A     Hmm-mm. L-A-U. Hmm-mm.

21                 Q     And what about --

22                 A     No, no, no.

23                 Q     That's all right.

24                 What about Monarch Marking,  
25    M-A-R-K-I-N-G? Monarch, like the butterfly,

1 Marking?

2 A I know the name, but I don't  
3 recollect anything. No activity from the dump.

4 Q And we left off with Peerless  
5 Transportation. Peerless. Nothing coming back to  
6 you on that?

7 A The only thing I'm remembering is  
8 that they had -- on South Dixie they had a moving  
9 -- it was like a moving company, and they  
10 transported heavy machinery and stuff like that is  
11 what I remember.

12 Q You don't remember them being a  
13 customer of the dump?

14 A I believe they were, but, you know  
15 -- 'cause I'm confused. 'Cause I think we got more  
16 activity up at Powell Road, I think, than we did  
17 there.

18 Q Okay. How about the University of  
19 Dayton? Were they a customer of yours at the South  
20 Dayton Dump?

21 A They were like the Dayton School  
22 Board. We'd get like desks and stuff every now and  
23 then. But it wasn't -- towards the latter part  
24 when Dad got the -- after him and Mr. Horace Boesch  
25 had donated the Arena that they started bringing

1 stuff in. But then they got their own landfill  
2 next to the Arena, so they pretty much had their  
3 own dump.

4 Q You remember some stuff coming in  
5 from them, but later on?

6 A Yeah.

7 Q Maybe desks and the like?

8 A Pardon me?

9 Q Desks?

10 A Desks. We got a lot of light  
11 fixtures, fluorescent, you know, ceiling tile,  
12 stuff like that.

13 Q What sort of containers did they  
14 come in? What sort of trucks did the University of  
15 Dayton send their materials in?

16 A I don't know.

17 Q Okay. What about Van Dyne-Crotty?

18 A Could you spell that, Larry?

19 Q Sure. V-A-N D-Y-N-E dash  
20 C-R-O-T-T-Y. Van Dyne-Crotty.

21 A I think we got, if I'm not mistaken,  
22 a lot of towels, dispensers -- they were like those  
23 towel things you keep pulling down.

24 Q In the old bathrooms?

25 A Yeah, like the old bathroom stuff.

1 Heaters. Remember the old where you push the thing  
2 and the heat? But a lot of towels because we used  
3 their towels with Hewitt Soap Company's soap.

4 Q You had everything you needed, huh?

5 A It was all there, you know, so --

6 Q What about cleaning materials? Any  
7 cleaning materials from Van Dyne-Crotty?

8 A It was mostly -- no, I don't. No.

9 Q What about the kind of vehicles  
10 their stuff came in?

11 A I don't remember either.

12 Q How about frequency of --

13 A It would be also once a month maybe.

14 Q Now we're on a company called --  
15 I'll just spell it 'cause I'm not sure.

16 W-E-I-M-E-R. Weimer or Weimer Corporation?

17 A No.

18 Q Don't remember anything about Weimer  
19 Corporation?

20 A I know the name, but I don't  
21 remember them dumping there.

22 Q Did anyone bring acetylene tanks --

23 A Yeah.

24 Q -- to the site?

25 A Maybe that was Weimer. They were

1 down on Sellers Road and -- yes, I do remember.

2 Q Do you have any memory of any tanks  
3 that might take off like rockets during the burns?

4 A Yeah, when we'd burn the piles, if  
5 any of their tanks was in there, even if it had  
6 anything in it, boy, this thing would take off like  
7 a rocket. Yeah, I do remember that.

8 Q And do you have any recall --

9 A They'd sit there and the lid would  
10 bust or whatever. Shooooo. But I don't know if it  
11 was oxygen tanks, acetylene tanks or what. They  
12 looked like torpedoes they'd put in the old  
13 submarines. That's what they looked like to me.

14 Q Okay. Your own fireworks display,  
15 hmm?

16 A Yeah.

17 Q Now, tell me about Weimer. Do you  
18 have any information about what sort of vehicle  
19 their waste came in?

20 A Yeah, they came in on a flatbed  
21 truck that was, I think, green. And they would be  
22 all chained together with chains, and then they'd  
23 come and throw 'em off. They had a lift on it,  
24 too.

25 Q Chained together. That would be the

1 tanks chained together?

2 A Mm-hmm. Yeah.

3 Q What about frequency of their  
4 materials coming to the site?

5 A I don't know. When you saw the  
6 rockets that's -- you know, it was kind of scary.  
7 It was dangerous, you know, with the piles.

8 Q Let me run through a couple more  
9 companies for you. A.E. Fink?

10 A Yeah. Fink was the other highway --  
11 they did highway roads for the counties.

12 Q For the counties did you say? The  
13 counties?

14 A Yeah. And then the city was mostly  
15 done by -- I just remembered five minutes ago.

16 Q That's all right. We may get to it.

17 A Okay.

18 Q Let's stick with Fink. They were a  
19 customer of SDD, of South Dayton Dump?

20 A Yes, mm-hmm.

21 Q What kind of frequency did you see  
22 Fink coming in, A.E. Fink?

23 A Fink in the peak of the season  
24 brought quite a bit of debris into Tier 4, and then  
25 their construction debris, you know, like road --

1 forms and stuff for concrete.

2 Q Metal?

3 A Metal.

4 Q Z-bar maybe?

5 A Rebar.

6 Q Rebar. Okay.

7 A What's that called? Mesh, wire  
8 mesh. A lot of it looked to me like expansion  
9 joints, expansion things, rubber. A lot of rubber  
10 expansion things.

11 Q Did they have their own trucks A.E.  
12 Fink?

13 A Mm-hmm, yeah.

14 Q Do you remember anything about --

15 A As I said, I don't remember what  
16 their emblem looked like.

17 Q Okay. What about a company called  
18 Zeigler, Z-E maybe I-G-L-E-R?

19 A Right. He did blacktopping. And  
20 it's Zeiler. I'm pretty sure it's Zeiler.

21 Q You spell it for me. Maybe I  
22 shouldn't ask.

23 A (Indicating in the affirmative.)

24 Z-E-I-L-E-R? I'm not sure.

25 Q All right. And tell me a little bit

1 -- what can you tell me about Zeiler? You said  
2 blacktop?

3 A Zeiler would get a lot of his stuff  
4 from Valley Asphalt or, you know, pick up blacktop  
5 and stuff. But he did a lot of road work, parking  
6 lots, anything that would have to do -- I think he  
7 did a few driveways. But him and his brother I  
8 think was in business together. And then the  
9 latter part they rented my dad's office that he had  
10 on Springboro Pike.

11 Q Now back to A.E. Fink. You said  
12 that they -- you saw waste from them during the  
13 peak season?

14 A Yeah.

15 Q What was the peak season?

16 A From about end of March till  
17 November, in that area.

18 Q And how about Creigler?

19 A Creiger. That's it.

20 Q Creiger?

21 A Creiger.

22 Q Okay.

23 A And he was on Patterson Road in  
24 Oakwood, and he did most of the City of Dayton,  
25 Kettering and stuff like that. He did the cities.

1 Q Okay. And he was also a  
2 construction company?

3 A Right.

4 Q And was he a customer of South  
5 Dayton Dump?

6 A Yes.

7 Q And did he go to Tier 4?

8 A Pardon me?

9 Q Did he --

10 A Mostly Tier 4. Mostly it would be  
11 the same as B.G. Danis. It would be, you know,  
12 forms, concrete forms and stuff like that.

13 Q How frequent did you see Creiger?

14 A Creiger would come in about once a  
15 week.

16 Q And what about Zeiler?

17 A Once a month.

18 Q And did I ask you about Fink's  
19 frequency?

20 A I'd say once a month.

21 Q All right. I think we're done with  
22 the list. And I want to show you sort of a series  
23 of photographs --

24 MR. NASH: What was Creiger's first name?

25 THE WITNESS: Creiger? I don't remember.

1                   (Whereupon, a discussion was held off the  
2 record.)

3                               (WHEREUPON, Grillot  
4 Deposition Exhibit  
5 Numbers 5 through 23 were  
6 marked for purposes of  
7 identification.)

8               Q     I'm putting a series of photographs  
9 in front of you.

10              A     Okay.

11              Q     And I'm going to ask you really one  
12 after the other pretty much to tell me what you're  
13 looking at and how it relates to that diagram in  
14 front of you, which is Exhibit 2.

15              A     This is the building from Office  
16 Number 1. It's the site furthest north from South  
17 Dayton Dump.

18              Q     And what you're looking at is marked  
19 as Exhibit 5; correct?

20              A     Yes.

21              Q     Okay. All right. Let's go to the  
22 next one, Exhibit 6. What do you see there?

23              MR. MOSS: Larry, excuse me. So I don't  
24 have to interrupt, may I have a continuing  
25 objection as to lack of foundation as to these

1 photographs?

2 MR. SILVER: Okay. I have no problem  
3 with that.

4 BY MR. SILVER (Continuing):

5 Q Just to help out, what's depicted in  
6 Exhibit 5, Ed, did you have an opportunity to look  
7 at this scene recently?

8 A Yes.

9 Q When was that?

10 A Sunday.

11 Q Okay. Let's keep going to Exhibit  
12 6.

13 A Exhibit 6 would be the entrance from  
14 Office Number 2, and it would be where those two  
15 trucks are to the upper left-hand side.

16 Q Now, were the trucks there on the  
17 entrance to Office Number 2 or where the gate was?

18 A That was where the office was.

19 Q Where the two trucks are?

20 A Right.

21 Q And is it the building to the left  
22 of the office, the left of the truck?

23 A Mm-hmm.

24 Q Now, same question as Exhibit 5.

25 Did you have the opportunity to observe this scene

1 recently?

2 A Correct. On Sunday.

3 Q All right. And this would be Office  
4 Number 2 as shown on the diagram in front of you,  
5 which is Exhibit 2?

6 A Yes, it is.

7 Q Let's go to Exhibit 7, and tell me  
8 if you can identify this scene.

9 A Again, this is Office Number 2 on  
10 Exhibit Number 7.

11 Q Same trucks as the previous photo?

12 A Yes, it is.

13 Q All right. And, again, you observed  
14 this --

15 A On Sunday.

16 Q Thank you. Exhibit 8?

17 A This would be -- on Exhibit 8 would  
18 be the building that Doyle's Auto Parts ran his  
19 operation out of.

20 Q And can you identify the location of  
21 Doyle's Auto Parts on the figure in front of you,  
22 Exhibit 2?

23 A Yes.

24 Q And you observed this on Sunday?

25 A Yes, I did.

1 Q And let's move on to Exhibit 9.

2 A Exhibit 9 is the entrance to Office  
3 Number 3.

4 Q Looking from which direction, Ed?

5 A This would be looking east to west.

6 Q From east to west?

7 A East to west.

8 Q Okay. And was the gate to entrance  
9 number 3 somewhere in this photo?

10 A Yes. I recognize from Sunday being  
11 at the location that that rusty pole coming out of  
12 the ground was our original gate post.

13 Q And that's a rusty pole almost right  
14 in the center or little above center of the  
15 picture?

16 A Correct.

17 Q Again, you saw this view on Sunday  
18 --

19 A Yes.

20 Q -- when the picture was taken?

21 A Yes.

22 Q That was Exhibit 9. Let's move on  
23 to Exhibit 10.

24 A It is the same photograph, just  
25 taken back a little further.

1                   Q     All right.  What's that building on  
2     the right?

3                   A     That was a fabricating -- Buckeye  
4     Fabricating Company.

5                   Q     Was the office building at the  
6     entrance 3 visible in this photo?

7                   A     No.

8                   Q     Let's move on to Exhibit 11.  What  
9     are you looking at in Exhibit 11?

10                  A     This would be the entrance to Office  
11     Number 3 also looking west to east.

12                  Q     Okay.  The entrance to the office or  
13     entrance to -- where is the office?  Can you see  
14     the office area?

15                  A     The office would be to the back side  
16     of this photo.

17                  Q     Oh, okay.  And you're looking west  
18     to east here or east to west?

19                  A     West to east.

20                  Q     And, again, this is a view you saw  
21     on Sunday?

22                  A     Yes.

23                  Q     Let's go to Exhibit 12.

24                  A     And you can -- I'm sorry.

25                  Q     Go ahead.

1           A     Also on the exhibit you can see some  
2 of the transformers. That's what they looked like.

3           Q     The ones up on the poles?

4           A     Yeah, mm-hmm.

5           Q     All right. Okay. And Exhibit 12?

6           A     12 did you say?

7           Q     12, yeah.

8           A     Exhibit 12 from walking the grounds  
9 on Sunday I found that to be the site of Office  
10 Number 3.

11          Q     And was Office Number 3 a trailer?

12          A     Yes.

13          Q     And this is where the trailer was?

14          A     Yes.

15          Q     And anything else you want to  
16 observe on Exhibit 12?

17          A     Well, I found where I had dug a  
18 trench from Office Number 2, a water line -- well  
19 pipe that was still sticking out of the ground that  
20 I buried. It was still there.

21          Q     You don't see it in this picture,  
22 though, do you?

23          A     No.

24          Q     But you saw that pipe?

25          A     Yes.

1                   Q     When you were out there on Sunday;  
2     is that it?

3                   A     Correct.

4                   Q     You're doing great.  Let's move on  
5     to Exhibit 13.

6                   A     Exhibit 13 was down in the pit area,  
7     I believe.  Yeah.

8                   Q     And this is what you marked on  
9     Exhibit 2 as the pit?

10                  A     Yes.

11                  Q     This is the liquid pit?

12                  A     It would be almost -- we couldn't  
13     quite get to it because of the growth that had --  
14     this is where most of the fly ash and the powder  
15     that was dumped there.

16                  Q     Would have been in the location of  
17     Exhibit 13?

18                  A     Yes.

19                  Q     And this you observed on Sunday as  
20     well?

21                  A     Yes.

22                  Q     And let's keep moving.  Exhibit 14?

23                  A     14 is the pit, just a different  
24     angle of the pit.

25                  Q     Same as Exhibit 13, but a different

1 angle?

2 A Yes.

3 Q Also observed on Sunday?

4 A Yes.

5 Q All right. Let's go on to 15.

6 A This is standing on Tier Number 4,  
7 Exhibit 15, looking down on the pit.

8 Q Which direction are you looking at  
9 on this photo?

10 A It would be southeast looking to  
11 northwest.

12 Q And again observed on Sunday?

13 A Yes.

14 Q All right. Anything else you want  
15 to say about 15?

16 A No.

17 Q All right. Let's move on to 16.

18 A Picture on 16 shows, I guess, one of  
19 EPA's well things. And at the end of this grassy  
20 area to where the brush is to the upper-hand of the  
21 picture is where the pit -- the actual water would  
22 be sitting of the pit.

23 Q And what direction are we looking at  
24 here?

25 A East to west.

1 Q Anything else you want to say about  
2 16?

3 A No.

4 Q You saw that on the scene on Sunday  
5 as well?

6 A Yes.

7 Q All right. Let's move to 17.

8 A 17 is the road that Dad allowed DP&L  
9 to park the trucks and stuff looking over to their  
10 station, their service area.

11 Q And what road is right in the middle  
12 of this picture?

13 A Dryden. Dryden Road.

14 Q And you saw this scene on Sunday?

15 A Yes.

16 Q You want to say anything else about  
17 this photo?

18 A No.

19 Q All right. Let's keep going.

20 A Exhibit 18 is when they were trying  
21 -- I was trying to get my bearings as to where we  
22 were in reference to the landfill. And at the very  
23 bottom left-hand side you can see something appears  
24 like a rock, and that was a corner of the  
25 incinerator.

1           Q     And is the incinerator marked on the  
2     diagram you have in front of you as Exhibit 2?

3           A     Yes, yes.

4           Q     Same incinerator; right?

5           A     Yes.

6           Q     And you observed this on Sunday?

7           A     Yes, I did.

8           Q     Let's keep going.

9           A     This is a more widened picture of  
10    the incinerator. Behind these trees is the four  
11    foot wall of the incinerator.

12          Q     Also observed on Sunday?

13          A     Yes.

14          Q     All right. This was Exhibit 19 you  
15    just referenced; right?

16          A     Yes.

17          Q     Let's move on.

18          A     Okay. Same photograph of the  
19    incinerator that we saw on Sunday, but it was more  
20    in the corner. It goes to the left of us and then  
21    back. It's the corner part of the incinerator.

22          Q     Understood. Okay. That was 20.  
23    Let's move on to 21.

24          A     This picture 21 was taken looking  
25    southeast to northwest position, and where the tree

1 -- the bigger trees is where the area where the  
2 transformers were stationed in that area on the  
3 side of this fence.

4 Q And this is a photograph looking  
5 southeast to northwest you said. Did I catch that?

6 A Right, mm-hmm.

7 Q And you observed this scene on  
8 Sunday?

9 A Yes.

10 Q Anything more on that one?

11 A No.

12 Q Go to the next one.

13 A This was the pad --

14 Q Exhibit 22 you're looking at. Sorry  
15 to interrupt.

16 A Exhibit 22 is the concrete pad. To  
17 the very right of the picture is where the  
18 incinerator's position would be. And this is the  
19 slab where we would -- the skids would be dumped  
20 on, and we would stack them as quickly as possible,  
21 burn the ones that needed to be burned, and take  
22 the others to another location to be recycled.

23 Q I see what looks like some telephone  
24 poles on here?

25 A That's one of the telephone poles

1 from Dayton Power and Light.

2 Q Did anyone else send telephone poles  
3 to the site?

4 A No.

5 Q And this is Exhibit 22. You  
6 observed this scene on Sunday?

7 A Correct.

8 Q All right. I think we got the last  
9 photo here.

10 A As you can see to the -- on Exhibit  
11 23 there's some skids still left over to the very  
12 left of the picture, and then the tires and debris  
13 there the only thing I can -- they either came from  
14 where Valley Asphalt is from Doyle's Auto Parts or  
15 they could be loads that came in to be dumped.

16 Q Just a question. Is the scene in 23  
17 related to the scene in Exhibit 22?

18 A Correct.

19 Q Okay. It's nearby. Is that what  
20 we're talking about?

21 A Yeah, they're actually on the same  
22 slab on the other side of that pile that you see on  
23 22.

24 Q And as far as 23 is concerned, did  
25 you observe this scene on Sunday as well?

1 A Yes.

2 Q We're done with that. Let me just  
3 have a couple more pictures to show you.

4 (WHEREUPON, Grillot  
5 Deposition Exhibit Numbers  
6 24 through 29 were marked  
7 for purposes of  
8 identification.)

9 Q This won't take too long, Ed. I  
10 just wanted to run through these for you.

11 A Okay.

12 Q Starting with Exhibit 24, which  
13 seems to be a front-end -- at least it's marked as  
14 a front-end loader with a group of pictures. Do  
15 you recognize any of the photos on this list on  
16 this page?

17 A Yeah, the one to the top right I  
18 recognize that as a General Refuse truck, and it  
19 was changed I think to IWD. It turned into IWD, I  
20 believe, when it was bought.

21 Q You recognize it as a General Refuse  
22 type truck?

23 A Dump truck, yeah.

24 Q A type of a truck or the actual  
25 truck?

1 A The actual truck.

2 Q So you think this is actually a  
3 General Refuse truck or just the type of truck they  
4 used?

5 A I remember the colors.

6 Q Oh, you remember the colors. Okay.

7 A I pressured washed a lot of 'em for  
8 Larry Brandon and painted some of 'em.

9 Q All right. And this is Exhibit 24.  
10 You're looking at the top right photograph?

11 A Correct.

12 Q Okay. And let's go on to Exhibit  
13 25. Recognize any of the trucks on here? Does it  
14 bring to mind anything?

15 A No.

16 Q Nothing at all?

17 A All right. We can keep on moving.  
18 What about Exhibit 26?

19 A The containers are pretty -- on  
20 Exhibit 26 are pretty similar to the ones that  
21 General Refuse -- or Container Service built and  
22 General Refuse used.

23 Q Any other thing on 26 you want to  
24 mention?

25 A No.

1                   Q     All right.  What about 27, Exhibit  
2     27?

3                   A     The bottom truck, the green one, and  
4     the white also were used with several of the  
5     companies that dumped there.

6                   Q     Any in particular that you can  
7     remember?

8                   A     Inland, Delphi, General Motors.  
9     That's all I can remember at this moment.

10                  Q     Let's go on to the next one, Exhibit  
11     28.  Do any of these pictures bring to mind  
12     anything?

13                  A     The one at the top was a type of  
14     truck that was used from when those cones were  
15     brought in, the Apollo things.

16                  Q     The ones from Duriron?

17                  A     Duriron, yes.  And then Patterson  
18     Iron and Metal and Franklin Iron and Metal they  
19     both had -- they had trucks like that.

20                  Q     They had trucks like that?

21                  A     Yeah.

22                  Q     What substances did Patterson bring?

23                  A     Pardon me?

24                  Q     What did Patterson bring onto the  
25     site in these kinds of trucks?

1           A     Well, that's where I'm kind of  
2     confused as far as -- they picked things up, like I  
3     said.

4           Q     You don't remember whether Patterson  
5     brought anything to the site?

6           A     Right.

7           Q     Same for Franklin?

8           A     Yes.

9           Q     Do you remember Franklin bringing  
10    anything to the site as opposed to --

11          A     I do, but I don't remember.

12          Q     You don't remember what?

13          A     I don't remember what.

14          Q     All right. And then let's go to  
15    Number 29 to see if that calls your mind to  
16    anything.

17          A     No. But on DP&L's big truck they  
18    had something similar to lift those telephone poles  
19    off that I remember, but it wasn't like this truck.

20          Q     Are you referencing the top picture  
21    or the bottom picture or both?

22          A     Both. 'Cause the way the -- the  
23    thing that's round up there, the way they'd go down  
24    and pick up that's something -- I only remember  
25    that. We had some tree companies come in that had

1     those booms, you know, and I think Dayton Power and  
2     Light trucks had the booms and Ohio Bell.

3                 Q     Okay. One other question and then  
4     I'm going to take just a break to see if I have  
5     anymore. I'm not sure I do.

6                 But we talked about drums coming in from  
7     the Barrel Factory.

8                 A     Mm-hmm.

9                 Q     What sort of trucks did you see  
10    coming in from the Barrel Factory?

11                A     Well, I mentioned before it was a  
12    big -- I don't know my trucks, I mean, by the  
13    tonnage, but they were big -- if we go back to --  
14    it would look similar to Exhibit 27, the bottom  
15    truck, the green one. But it wasn't a -- it was  
16    caged in, and that's where they would bring some in  
17    that and take 'em in that. And then like this  
18    dumpster is what -- they would bring some in. When  
19    I told you they would spill and stuff like that,  
20    they were more like dump trucks.

21                Q     So some of them looked like these  
22    roll-off trucks in the bottom picture?

23                A     Right.

24                Q     And others more like dump trucks?

25                A     Right.

1           Q     All right. I think I'm going to  
2     take a quick break to huddle and see if I have  
3     anymore questions. I don't think so. Just a quick  
4     break.

5                     (Whereupon, a recess was taken.)

6           MR. SILVER: We pass the witness. We're  
7     done. And it's up to whoever wants to go first.  
8     Marty, you can go first.

9           MR. LEWIS: Actually, since I'm on the  
10    phone why don't people in the room go first. That  
11    might be the best thing.

12          MR. SILVER: No problem. Any volunteers?

13                    CROSS EXAMINATION

14    BY MR. MERRILL:

15          Q     Good afternoon, Mr. Grillot. My  
16    name is Frank Merrill. I'm an attorney with the  
17    law firm of Bricker and Eckler, and I'm here  
18    representing one of the defendants, the Dayton  
19    Power and Light Company, DP&L.

20          A     Okay.

21          Q     So I've got some questions and  
22    follow-up questions to ask you regarding --

23          A     What kind of questions?

24          Q     Some follow-up questions.

25          A     Oh, follow-up. Okay.

1                   Q     Regarding your testimony this  
2 morning --

3                   A     Okay.

4                   Q     -- and this afternoon.

5                   Same instructions. If you don't  
6 understand my question, please ask me to repeat it.

7                   A     Okay.

8                   Q     And I'll make sure that you do  
9 understand it.

10                  You indicated that you're currently  
11 residing in North Carolina; is that correct?

12                  A     Mm-hmm.

13                  Q     What's the mailing address for your  
14 current residence?

15                  A     I can give it to you. I don't have  
16 it memorized all the way. Please excuse me. I'm  
17 sorry. Here it is. It is 4360 Highway 903 South,  
18 Snow Hill, North Carolina, 28580 is the Zip.

19                  Q     How long have you lived at that  
20 address?

21                  A     Almost two years now.

22                  Q     You gave us a summary of your  
23 employment up till I believe about when you were 27  
24 years old. Can you go from that point in time when  
25 you were about 27 years old and bring us up-to-date

1 with respect to your employment history, what  
2 you've been doing since you were 27?

3 A I started selling firewood off of  
4 Sandy Mountain, which is above DP&L's and the South  
5 Dayton Dump's area up there. We cleared that land  
6 off for -- to get Broadway Sand and Gravel that  
7 they could excavate it and then refill it with  
8 different debris. That would have been '79, I  
9 think, to '81 maybe. Then I went to business for  
10 myself after that and installed fireplaces. Stone  
11 masonry is my heritage, so I put stone fronts on  
12 'em and stuff like that. From there I went to --

13 Q Let me stop you right there. You  
14 started doing that around 1981 installing  
15 fireplaces?

16 A Yeah, mm-hmm.

17 Q And then you're about ready to move  
18 to a different vocation or different job?

19 A Yes, mm-hmm.

20 Q And what's the approximate time  
21 period?

22 A Of the fireplaces?

23 Q Yeah.

24 A I would say '81 till about '83,  
25 something like that.

1 Q Okay.

2 A Then I worked for several different  
3 construction companies, which would be similar to  
4 A.E. Fickert. We did fire alteration. It's called  
5 Angler Construction. And then I worked for another  
6 -- I can't remember the name of the other company.  
7 Don't remember.

8 Q Okay. So that's 1983 until what  
9 period of time were you in the construction  
10 business?

11 A Till present.

12 Q Till present?

13 A Yeah, mm-hmm.

14 Q Are you currently in the  
15 construction business?

16 A Semi.

17 Q What do you do for a living?

18 A Right now I'm semi-retired, I guess  
19 you'd say.

20 Q Well, if you're semi-retired that  
21 means probably half the time you're not retired.  
22 So what do you do the other half of the time?

23 A I met -- where I'm staying at in  
24 North Carolina the gentleman has an old tobacco  
25 barn, and I converted one into a hunting lodge for

1 him. It took me the two years to do that. But my  
2 health is deteriorating pretty quickly, so I'm  
3 having a hard time doing it. So I went to the  
4 hospital, and they told me to try to get on  
5 disability because of my ailment that I have.

6 Q Are you on disability now, sir?

7 A Not yet, no. We are on appeal right  
8 now.

9 Q You indicated that you're having  
10 some health problems?

11 A Yeah.

12 Q Are you currently under any  
13 medication?

14 A Yes, mm-hmm.

15 Q What medication are you taking  
16 currently?

17 A Trazodone for sleep, 100 milligram.

18 Q Anything else?

19 A And Celexa. It's a mood stabilizer.  
20 And then I take a mild blood pressure medicine.

21 Q Are you currently taking those?

22 A Yes, mm-hmm.

23 Q Do you know the dosage of your -- of  
24 those medications currently?

25 A Yes. Trazodone is 100 milligram.

1 Q And that's a day?

2 A Pardon me?

3 Q A hundred milligram a day?

4 A A hundred milligram a day. And then  
5 Celexa is three times a day, 20 milligram.

6 Q And the blood pressure medicine?

7 A Yes. I don't know the -- I don't  
8 take it that much.

9 Q Okay. The mood stabilizer you're  
10 taking three times a day?

11 A Yes, 20 milligram, three times a  
12 day.

13 Q And you're currently -- you've  
14 ingested some of that today?

15 A Yes.

16 Q When you moved -- strike that.  
17 Why did you move to North Carolina?

18 A I had met a lady line dancing in  
19 Miamisburg, and we got to be friends. And she was  
20 a nurse, and we got to be -- our friendship grew.  
21 We decided we wanted -- we asked each other what we  
22 wanted to do the rest of our life. I said I'd like  
23 to travel. I've been stuck in Dayton all of my  
24 life. So she found out that she could travel  
25 nurse, and so I picked up my tools, and she got the

1 opportunity. We flew out to Hawaii first, and that  
2 was our first assignment was out in Hawaii for 11  
3 months. And we bought a -- up in Chicago we bought  
4 a fifth wheel and a truck so when we came back we  
5 could travel the western part of the United States,  
6 and so we did. One of the last assignments she had  
7 was North Carolina, and that's where I met this  
8 gentleman helping someone else put a driveway in.  
9 He saw my talent, and we moved to Michigan after  
10 that. Then he kept -- Johnny down in North  
11 Carolina kept asking me to come back, and that's  
12 where I'm at now.

13 Q Have you ever given a deposition  
14 before, Mr. Grillot?

15 A Not that I can recall, no.

16 Q Ever been convicted of any crimes,  
17 crimes other than transportation-related?

18 A Yes.

19 Q And what crimes are those?

20 A When I was a teenager I was accused  
21 of holding marijuana, so I got held holding the  
22 bag. But that was a felony back then no matter  
23 what you had. So that was the first mark on my  
24 record.

25 Q Other than the marijuana possession?

1                   A     Are you leading to -- I don't know.  
2     I'm trying to think what word I could use.  
3     Chemical dependency? Is that what you're asking or  
4     --

5                   Q     No. I'm just asking a question  
6     whether you've been convicted of any crimes?

7                   A     Okay.

8                   Q     And you indicated that you had. I  
9     just wanted you to list the ones that you have been  
10    convicted of.

11                  A     Yeah, the marijuana conviction was a  
12    felony. I had another felony back in '03, and it  
13    was for domestic violence.

14                  Q     Anything else?

15                  A     No.

16                  Q     When did you first learn of this  
17    lawsuit relating to the South Dayton Dump?

18                  A     This particular or when my dad  
19    passed away?

20                  Q     No, this particular lawsuit. I  
21    mean, do you understand that you're here because  
22    there's a lawsuit that's been filed?

23                  A     Probably a month ago.

24                  Q     And how did you learn about that?

25                  A     My girlfriend that I traveled with

1     called me.  She lives up here in Dayton and said  
2     there was a gentleman at her door asking questions  
3     about me, trying to find me.

4                   Q     And who was that gentleman?

5                   A     Bill Walsh.

6                   Q     Do you know Bill Walsh?

7                   A     No.  Not personally, no.

8                   Q     Do you know how Bill Walsh got your  
9     name?

10                  A     Apparently he had some time finding  
11     me, but I think he got it from my girlfriend's --  
12     well, how he got my name I'm not sure, but how he  
13     got to find Donna that found -- that knew how to  
14     get ahold of me was he went up to an old house that  
15     Donna had owned when I met her, and her daughter  
16     was living there.  And I think her daughter's  
17     boyfriend was there and gave her -- or gave Bill  
18     information on where I was at, and that's how the  
19     contact was made.

20                  Q     Who contacted you?

21                  A     Donna called me first 'cause Bill --  
22     like I said, Bill was there and so on and so  
23     forth.

24                  Q     Who contacted you after that?

25                  A     After that?

1 Q About this lawsuit.

2 A No one.

3 Q No one? So you've talked to no one  
4 about this lawsuit since you talked to Donna?

5 A Oh, oh. Well, Bill came to talk to  
6 me about why he was there.

7 Q Bill came to North Carolina to see  
8 you?

9 A Yeah, mm-hmm. Yeah.

10 Q Can you tell me about that  
11 conversation?

12 A Well, I really wasn't quite sure  
13 what was happening at the time. I didn't know if  
14 it was a continuation of my dad's EPA and with  
15 attorneys that my dad had at that time. But once  
16 he arrived he explained that he was representing  
17 some other companies that was in a EPA type of  
18 thing and they wanted information, so I gave him  
19 information.

20 Q Do you know who Bill Walsh worked  
21 for?

22 A Not till later on.

23 Q And who does he work for?

24 A Larry.

25 Q Larry. Mr. Silver?

1                   A     Yes.

2                   Q     So after you had this conversation  
3 with Mr. Walsh, did you have any other  
4 conversations with anyone about this lawsuit?

5                   A     I got a few phone calls that Bill  
6 said Larry would like to talk to me. So Bill and  
7 Larry also came down to see me in North Carolina.

8                   Q     What did you talk about?

9                   A     Their -- they wanted to know my  
10 knowledge who dumped there. Actually it started  
11 out what did I do on the landfill, what did I  
12 recollect the operation did, and who was involved,  
13 you know, my other cousins and stuff like that I  
14 mentioned this morning. Talked about the different  
15 companies that I remembered had dumped there.

16                  Q     Did you talk about some companies  
17 that you didn't mention this morning or today  
18 during your deposition?

19                  A     No, not that I can recall.

20                  Q     Not that you can recall. Okay.

21                         After your meetings with Mr. Walsh and  
22 Mr. Silver in North Carolina, did you have any  
23 other discussions with anyone regarding this  
24 lawsuit?

25                  A     I had called my brother. He was a

1 younger brother. He was appointed executor to my  
2 father's estate after my Uncle Alcine had passed  
3 away, and I asked him if he knew what was going on  
4 because I thought they would contact him. And sure  
5 enough, he told me that they had been trying to get  
6 a-hold of me through him and that he didn't think  
7 that I wanted to know, which made me pretty mad  
8 because I did want to know.

9 Q What's your brother's name?

10 A John Robert Grillot.

11 Q And apparently John is still alive?

12 A Yes.

13 Q Does John live here in the Dayton  
14 area?

15 A Yes.

16 Q Besides John, did you talk with  
17 anyone else?

18 A Just my girlfriend, Donna.

19 Q So you made arrangements to come up  
20 here for this deposition today through Mr. Silver;  
21 is that correct?

22 A Yes, mm-hmm.

23 Q When did you arrive in the Dayton  
24 area for this deposition?

25 A It would have been Saturday

1 afternoon on the -- I think the 10th.

2 Q Did you meet with Mr. Silver or  
3 anyone associated with Mr. Silver on Saturday?

4 A No. I got in pretty late.

5 Q Did you meet with Mr. Silver or  
6 anyone associated with Mr. Silver on Sunday?

7 A No, not that Sunday. The following  
8 Sunday we did.

9 Q Oh, so you've been here for --

10 A A week.

11 Q A week?

12 A Yeah.

13 Q You met with Mr. Silver this past  
14 Sunday; is that correct?

15 A Yes -- no, not Mr. Silver. Bill.

16 Q Mr. Walsh?

17 A Yeah.

18 Q You met with Mr. Walsh on Sunday?

19 A Correct.

20 Q Was Mr. Walsh the one who took the  
21 photos that have been identified as Grillot  
22 Exhibits 5 through 23?

23 A Yes.

24 Q Did you meet with anyone else other  
25 than Mr. Walsh this past weekend?

1           A     Yes. I guess we either had to get  
2 permission or walk with someone that was involved  
3 with the cleanup effort. I don't know if it was  
4 the EPA or another company. I think from my  
5 understanding the guy was from Cincinnati. So --  
6 but he drove us around in his truck where we could  
7 get, and then we got out and walked. And I don't  
8 remember the man's name.

9           Q     And this was Sunday --

10          A     Sunday, yeah.

11          Q     -- when you went and visited the  
12 landfill and walked around?

13          A     Right.

14          Q     It was with someone from Cincinnati?

15          A     Right.

16          Q     But you don't remember the man's  
17 name?

18          A     No.

19          Q     Was he with U.S. EPA?

20          A     I don't know if it was that or  
21 independent contractor. I don't know. But they  
22 have an office there, a trailer.

23          Q     At South Dayton Dump they have a  
24 trailer?

25          A     Correct.

1                   Q     Was it someone with Conestoga-  
2     Rovers, CRA?

3                   A     I saw something on the side of the  
4     truck started with a C.

5                   Q     You indicated then you met with Mr.  
6     Walsh on Sunday?

7                   A     Yes.

8                   Q     What did you talk about?

9                   A     At the beginning before we got there  
10    he was just explaining to me that we would probably  
11    have to wear a hard hat and that we might have to  
12    sign a paper in order to get in, and he wanted  
13    directions. So we left my residence and drove down  
14    there, and then we met up with that guy that had  
15    the truck. So -- and then that's -- we couldn't  
16    find him at first. So that's when we decided to  
17    take the pictures, take the photographs. And then  
18    we finally figured out what entrance. They had  
19    another entrance, and that's where we went to and  
20    he was there.

21                  Q     So the time that you've been here in  
22    Dayton recently for this deposition, have you been  
23    staying at a hotel?

24                  A     No. I stayed a couple nights with  
25    Donna, and then I came up -- I had a camper. I got

1 a camper, and I'm staying up in Medway in the back  
2 yard of her daughter's house in the camper. I got  
3 a couple of dogs, and they don't really like the  
4 dogs. Little feisty.

5 Q But the -- I understand the  
6 Plaintiffs are paying your expenses while you're  
7 here; is that correct?

8 A Just -- it was just to get up here,  
9 and then I got a two-meal ticket and then one night  
10 at a motel.

11 Q Are you being paid for your time to  
12 sit at this deposition?

13 A No.

14 Q You had indicated in your testimony  
15 earlier that you saw this 1939 aerial photo of the  
16 site?

17 A Right.

18 Q Where did you see that?

19 A The gentleman that showed us the  
20 site on Sunday he had those aerial -- or the aerial  
21 shots.

22 Q He has a 1939 aerial shot?

23 A He had several of them. '39, '52,  
24 '54, '60-something and then '05.

25 Q And where did you actually view

1     them? Were you in the trailer at the site?

2                   A     Actually when we was over by the  
3     incinerator he showed 'em to us then. Or, no, it  
4     was before we got to the incinerator because I  
5     couldn't get my bearings 'cause everything was so  
6     built up I couldn't tell. So he said, "Well, here.  
7     Look at this. Maybe it will help you." Then we  
8     got around to the incinerator. That's where I got  
9     -- where I was, and then I pretty much led them  
10    down to the pit and then to where the trailer used  
11    to sit at the landfill.

12                  Q     Did you view any other documents?

13                  A     No.

14                  Q     Have you been given any documents to  
15    review in preparation for this deposition?

16                  A     No. But I think I mentioned this  
17    morning I have an aerial shot of the dump. And  
18    several times before I left Dayton to travel I  
19    noticed that Valley Asphalt had ate up a lot of the  
20    land with the blacktop on top of it. So that's my  
21    knowledge. But I never was inside the site to  
22    really -- and I didn't have the understanding that  
23    they fenced it off and they had contractors there  
24    observing the site. I didn't have no other  
25    knowledge of that.

1                   Q     You indicated this morning that your  
2     father Cyril and I believe your Uncle Horace Boesch  
3     --

4                   A     No, it would be his partner.

5                   Q     His partner?

6                   A     Yeah.

7                   Q     Cyril's partner Horace Boesch --

8                   A     Correct.

9                   Q     -- owned the facility at one time?

10                  A     They owned the land, not the  
11     business.

12                  Q     Owned the land?

13                  A     Right.

14                  Q     Do you know who currently owns the  
15     land?

16                  A     I asked that question to I think  
17     Larry or Bill, and they think -- or to their  
18     knowledge my stepmom and Horace Boesch's widow owns  
19     the portion that the dump sits on. Valley Asphalt  
20     bought where Doyle's Auto Parts would have had his  
21     auto parts operation.

22                  Q     What's your stepmom's name?

23                  A     Margaret Grillot, G-R-I-L-L-O-T.

24                  Q     And Margaret is still alive?

25                  A     Yes, mm-hmm.

1 Q Is there a Kathryn Grillot?

2 Kathryn Grillot?

3 A No, Kathryn Boesch.

4 Q Kathryn Boesch?

5 A She's the widow of Horace Boesch.

6 Q Are you aware of any arrangements or  
7 agreement with your stepmom regarding this  
8 facility?

9 A I believe that I heard -- the  
10 knowledge that I got from all the chaos was that  
11 Kathryn and --

12 Q Kathryn?

13 A -- Boesch and Margaret Grillot  
14 received mostly buildings and land from the estate,  
15 and then the siblings would get mostly cash.

16 Q But you're not aware of any type of  
17 agreement with U.S. EPA or others --

18 A Oh, yeah.

19 Q -- related to the South Dayton Dump?

20 A Yes, I was.

21 Q Can you tell me what you know about  
22 that?

23 A At that time there was a law firm  
24 that we had to pay, Coolidge. They used to be EPA  
25 people, but they were attorneys representing my

1 father's estate. And they had agreed with EPA --  
2 we had a big meeting that they would set a fund  
3 aside of a million dollars to clean up the dump,  
4 which Kathryn and -- Kathryn Boesch and Margaret  
5 Grillot would pick up most of it, and then the  
6 siblings would pick up the rest. Which my share  
7 was right around 125 or close to 200,000 each one  
8 of my siblings.

9 Q So have you personally contributed  
10 \$200,000 into this fund?

11 A Yes, mm-hmm.

12 Q And did you receive any type of  
13 settlement or sign an agreement with U.S. EPA?

14 A Well, we couldn't get our  
15 inheritance until we did.

16 Q So you did sign?

17 A Right. It was sort of, I guess, my  
18 understanding our goodwill or our faith that here  
19 is this. That we'll clean it up, and if there's  
20 anything left you might get it. That's what I  
21 assumed happened. Like I said, my frustration was  
22 going down there and seeing Valley Asphalt keep  
23 putting -- who's going to clean up what? Are they  
24 just burying the dump with blacktop?

25 Q So you put in \$200,000 into this

1 fund --

2 A Yes.

3 Q -- to get your inheritance; is that  
4 correct?

5 A Right.

6 Q And how much did you get back?

7 A 140,000.

8 Q So you put in 200 to get 140 back?

9 A Right. Now, like I said, the amount  
10 could have been 125 to 200. I don't remember. I  
11 think I still actually have the documents.

12 Q Are you aware of any type of  
13 agreement or arrangement with the plaintiffs in  
14 this case, NCR, Hobart, Dayton Walther and the  
15 other owners of the property related to this site?

16 A I don't understand the question.

17 Q Fair enough. Are you aware of any  
18 type of agreement with your family members and the  
19 plaintiffs in this lawsuit, namely, NCR and Hobart  
20 and Dayton Walther?

21 A No. Because I was surprised to hear  
22 because one of my initial meetings with my dad's  
23 attorney and Coolidge and those guys was, "Why  
24 don't we get everybody else involved that dumped on  
25 this site to help with the cleanup?" They said,

1 "No, we can't do that." So when this all came  
2 about I was surprised.

3 Q You testified earlier today, Mr.  
4 Grillot, that DP&L trucks came to the site; is that  
5 correct?

6 A Mm-hmm.

7 Q Can you tell us what color those  
8 trucks were?

9 A They were either yellow or white,  
10 but I'm pretty sure they were white.

11 A I just remember especially being  
12 younger the emblem because, like I said, I remember  
13 seeing it on TV. And in talking to drivers. We  
14 all -- when they'd get out and do whatever they had  
15 to do, you know, we'd talk, and I was --

16 Q So this is early 1960s?

17 A Yeah.

18 Q Would you say 1960 to 1965 time  
19 frame?

20 A That would be close enough, yeah.

21 Q And you recall seeing DP&L trucks at  
22 the South Dayton Dump?

23 A Yes. Now, my recollection of seeing  
24 -- when I was younger working in those piles, you  
25 know, like I said, we would go home and see Channel

1 7 have their program and that's what I remember.  
2 But later on I don't remember when they changed  
3 their logo on the trucks to DP&L from where it was  
4 on like a circle Dayton Power and Light. But I  
5 remember the different trucks, like the boom trucks  
6 and then the ones that had the long telephone poles  
7 on 'em and stuff like that. Like I said a minute  
8 ago, the drivers -- I said, "How do you make a long  
9 turn like that?" So I knew they worked for DP&L  
10 out of word of mouth.

11 Q And your recollection is that the  
12 trucks were either white or yellow?

13 A Right.

14 Q Let's talk about your testimony  
15 regarding transformers at the South Dayton Dump.  
16 You testified that you recall seeing transformers  
17 at the dump; is that correct?

18 A Yes, mm-hmm.

19 Q And do you know where those  
20 transformers came from?

21 A Where they came from?

22 Q Correct.

23 A DP&L.

24 Q And what's the basis of your  
25 testimony that they came from DP&L?

1                   A     What was my testimony?

2                   Q     Why do you believe they came from  
3     DP&L?

4                   A     Well, one, I saw 'em bring them.  
5     Second, I don't think there was any other power  
6     company there at the time other than CG&E, and that  
7     was further south that I know of.  And Uncle Alcine  
8     and Kenny told me and Bud, Bud Young.

9                   Q     How many transformers did you  
10    receive at one time?

11                  A     Anywhere from half a dozen to a  
12    couple dozen.

13                  Q     All just -- not more than 20, 30?

14                  A     Something like that, yes.

15                  Q     And all the transformers you saw you  
16    believe they came from DP&L because you either saw  
17    them come in or was told that's where they came  
18    from?

19                  A     Right.  Right.

20                  Q     Do you ever recall any markings on  
21    the transformers that indicated that they came from  
22    DP&L?

23                  A     They were stamped with some kind of  
24    tag, and then I thought I saw the emblem of the  
25    light bulb on the thing, but I'm not a hundred

1 percent sure on that. Just like the telephone  
2 poles, they'd have a metal plate on 'em. The  
3 telephone poles they had at the end of 'em stamped  
4 in the wood.

5 Q So you recall seeing a metal tag on  
6 those transformers?

7 A Mm-hmm.

8 Q And that metal tag designated DP&L  
9 as the --

10 A I don't remember that, but I know  
11 they had like a lot of numbers on it like "Pole  
12 something or other." And there we came from Uncle  
13 Alcine or Kenny, you know. We had a hard time  
14 moving 'em with the dozer. That's all I remember  
15 at this time.

16 Q But do you remember any markings on  
17 the transformer that said it came from DP&L?

18 A No, other than the tags. I mean, if  
19 the tags -- I don't remember seeing DP&L, no. At  
20 this point, no.

21 Q But your testimony is the tag does  
22 not say DP&L; is that correct?

23 A At this point, I don't know.

24 Q Do you recall whether the  
25 transformers still contained the bushings and the

1 inner workings inside the transformer casing?

2 A They were intact like I saw on the  
3 picture, yeah.

4 Q You recall looking inside them?

5 A One of them that was broke and we  
6 saw some kind of liquid. The burnt one we could  
7 look at pretty good 'cause we were trying to see  
8 how that much power, but other than that, no. I  
9 don't know what was done with them after they were  
10 on the site. That wasn't, you know, my job. So I  
11 don't know even what was in 'em to recycle or, like  
12 we said, Uncle Kenny or Alcine if he thought there  
13 was some use for it. But I thought my knowledge  
14 they were just being stored there at that  
15 particular location, so they had no monetary value  
16 that I knew of.

17 Q So your testimony is that you don't  
18 know exactly what was in the transformers?

19 A No. I didn't learn that till after  
20 the lawsuit -- or the EPA came in because of their  
21 drilling and stuff. They noticed the ingredients  
22 inside the transformers they found in the soil, and  
23 they said it came from transformers. And, oh, I  
24 know where that -- that was the only thing when we  
25 were at Coolidge law firm that I said and it

1 clicked in my mind where we had 'em. So I don't  
2 know where they drilled at. I don't know where  
3 they -- as a matter of fact, the fence that's up  
4 there is on the opposite side. The transformers  
5 aren't even in the initial what would you call it?  
6 The hot spot. It's on the other side of that. And  
7 that's what one of the exhibits in the picture  
8 shows.

9 Q Let me just clarify so I understand.  
10 You don't know what was inside the transformers  
11 that you saw at the South Dayton Dump; is that  
12 correct?

13 A To be honest with you, no, as a kid  
14 I didn't know.

15 Q And you don't know whether those  
16 transformers were actually disposed of in the South  
17 Dayton Dump; is that correct?

18 A Correct.

19 Q You don't know what happened to  
20 those transformers?

21 A No.

22 Q That is correct?

23 A Correct.

24 Q Is it possible that some of the  
25 transformers came in from General Motors or Inland

1 or Delphi or some of the other facilities when they  
2 were changing out their transformers?

3 MR. SILVER: Objection. Calls for  
4 speculation.

5 BY MR. MERRILL (Continuing):

6 Q You can go ahead and answer.

7 A Not to my knowledge, no. I don't  
8 know that.

9 Q In your testimony earlier you  
10 discussed this lead smelting type of operation that  
11 your Uncle Kenny --

12 A Right.

13 Q -- had there. And I believe it was  
14 your testimony that you and your cousins would  
15 gather electrical parts and store 'em, and then  
16 would you melt off the lead pieces?

17 A Well, they would be put into that  
18 kettle to be melted down into the bars, yes.

19 Q And where would these metal pieces  
20 come from?

21 A Like I said this morning, I would  
22 pick them up from the dump site where DP&L -- we  
23 almost had like a specific spot like I mentioned  
24 this morning where DP&L -- because I'd have to get  
25 down and really nitpick to get every copper wire

1     that was burned off, but we'd go there before to  
2     get those couplings because Uncle Alcine wanted to  
3     melt them down.

4                 Q     How do you know they came from DP&L?

5                 A     'Cause it was DP&L's pile.

6                 Q     Oh, there was a DP&L pile?

7                 A     Yeah. Like I just mentioned, that  
8     we -- you know, we had -- that that had a lot of  
9     small parts, connectors, lightning rod things, and  
10    just that was their pile, you know. And from what  
11    my uncle said, a lot of it -- their service area  
12    over there they did a lot of, I guess, work or  
13    emptied out the trucks or whatever, and it would  
14    all be thrown in and be brought over to be dumped.  
15    But as far as, you know, knowing exactly, there was  
16    no label on it, but we knew that that was DP&L. I  
17    would see 'em come dump the trucks and see stuff  
18    like that fall out, especially, you know,  
19    connectors and stuff like that. Some of 'em we  
20    took we didn't have to let 'em go through a fire.  
21    They could be sold that way. But if they had any  
22    type of an insulating material on 'em, they had to  
23    be burnt first.

24                Q     Did anyone else dump on the DP&L  
25    pile?

1                   A     As I mentioned before, sometimes  
2     when people would dump in the evening there could  
3     be a pile there, yeah.

4                   Q     There wasn't a sign that said "DP&L  
5     Pile Only"?

6                   A     No, no, no.

7                   Q     There wasn't an understanding that  
8     no one can dump there but DP&L?

9                   A     Between us it was. When we were  
10    there during the day we didn't want nobody else  
11    dumping there. Because the other debris went and  
12    put ashes -- after we'd burn it it would be harder  
13    -- you know, with furniture and stuff like that the  
14    stuff there would make it harder to go through.

15                  Q     When you assembled all these metal  
16    pieces to melt down for the lead content, did you  
17    also get pieces from places other than the DP&L  
18    pile?

19                  A     Yes. Tier Number 4 when I mentioned  
20    I found cast iron shrouds that were to protect the  
21    gas lines and stuff like that, there would be lead  
22    shroud that would go -- I don't know if it was from  
23    water pipe or gas pipe, but they were lead shrouds.  
24    And I questioned somebody. I don't remember who it  
25    was. No, no, it wasn't till later in my life that

1 I found out that all the water pipes in the City of  
2 Dayton had lead shrouds holding the residential  
3 pipes into these pipes. And I told the city guy, I  
4 said, "You guys get so mad because we're  
5 contractors and we scrape paint off of houses and  
6 it drops down on the floor, and here you got lead."  
7 Some of those went into the piles, too, that I  
8 would find on Tier Number 4.

9 Q But with respect to waste from other  
10 companies, like I believe you testified Ohio Bell  
11 dumped waste at this site, and their waste stream  
12 had some material that you would recover or use to  
13 recover the lead from?

14 A (Nodding in the affirmative.)

15 Q So there's other waste streams at  
16 the site that you would salvage the lead for your  
17 Uncle Kenny for this?

18 A Some of the copper like lightning  
19 rod -- where the wire would go into lightning rods,  
20 those connectors could have come from Ohio Bell,  
21 yeah.

22 Q You mentioned that this ingot type  
23 of apparatus that Uncle Kenny constructed was made  
24 of creosote four-by-fours?

25 A Uncle Alcine. Uncle Alcine made.

1                   Q     Uncle Alcine. I'm sorry. Was  
2 constructed of four-by-four --

3                   A     Right.

4                   Q     -- creosotes?

5                   A     It was either creosote or some kind  
6 of rubber like maybe tar off of something, but I  
7 was told it was creosote.

8                   Q     And I believe in your earlier  
9 testimony you indicated it was from DP&L?

10                  A     Right.

11                  Q     And how do you know that?

12                  A     'Cause I asked my uncles, you know,  
13 "What is this for?" And they said, "Well, this  
14 comes from DP&L and we're burning 'em." They would  
15 put off so much smoke into the regular dump pile,  
16 and they found a use for 'em to melt the stuff in  
17 that pot. It would be useful, so we put 'em off to  
18 the side. As a matter of fact, that red building  
19 in one of these -- that's where we stored 'em. And  
20 when we were on the site Sunday we found still a  
21 pile sitting there still with the creosote on 'em.  
22 But that was a known fact through the whole dump.  
23 Everybody probably knew that, I think.

24                  Q     Did you ever see someone from DP&L  
25 disposing of these four-by-four creosote poles?

1           A     Yeah. They come in with the trucks  
2     -- they come in a lot of times on skids that would  
3     have wooden like a crate, and then some will come  
4     in the back of a truck.

5           Q     But you don't know whether it's  
6     creosote; is that correct?

7           A     No, no.

8           Q     You indicated also that you observed  
9     DP&L dumping fly ash at the South Dayton Dump; is  
10    that correct?

11          A     Yeah, mm-hmm.

12          Q     Do you know where the fly ash came  
13    from?

14          A     Uncle Alcine said it was from the  
15    Tait Station. That's all I remember. And I don't  
16    know about the black -- the black powder stuff  
17    where that came from. It was to my knowledge  
18    DP&L's.

19          Q     Did you see DP&L dump the black  
20    powder stuff also?

21          A     Oh, yeah. Well, I -- I don't know  
22    on the black powder. The fly ash I knew for sure,  
23    but the black powder I'm not a hundred percent  
24    sure.

25          Q     Just so that I understand your

1 testimony, you did witness DP&L dumping fly ash at  
2 South Dayton Dump; is that correct?

3 A Right.

4 Q But you're not sure with respect to  
5 the black powder stuff; is that correct?

6 A Right, yeah.

7 Q How do you know it was from DP&L?

8 A 'Cause the fly ash came in DP&L  
9 trucks.

10 Q 'Cause it was in a DP&L truck?

11 A Yeah, mm-hmm.

12 Q Did it ever come in a truck other  
13 than a DP&L truck?

14 A I don't know.

15 Q You testified earlier, Mr. Grillot,  
16 of drums being dumped in the pit area and liquids.  
17 Where did the drums come from?

18 A Most of 'em I had -- was told and  
19 seen was from the Barrel Factory out in  
20 Beaver Creek.

21 Q Did they have any names on the  
22 barrels, any logos?

23 A Oh, there was plenty of -- there  
24 would be tags on 'em and stuff like that. Paper  
25 tags that were like in a rubber type of thing. But

1 I don't remember -- I might have looked at them,  
2 but I don't remember like where they came from and  
3 so on and so forth.

4 Q Do you recall any of the contents  
5 based on those tags?

6 A Well, I know one of the contents it  
7 would work in a dozer, so I assume it was hydraulic  
8 fluid. Because I had done a little bit of  
9 mechanical work on my own car, I know what brake  
10 fluid looks like. It kind of has a smell to it.  
11 It was the same smell that I mentioned this morning  
12 that brake things would come in from General  
13 Motors. We would have to take the cap off, and  
14 some of 'em would have that same liquid in it. I  
15 do remember that.

16 Q Do you recall any waste coming to  
17 the site from NCR?

18 A No, because I was told that they had  
19 their own landfill. Now, I believe -- I don't  
20 know.

21 Q So your testimony is you don't know  
22 whether NCR took any waste to the South Dayton  
23 Dump?

24 A I'm having -- I'm a little tired.  
25 I'm trying to think. But, no, I don't remember.

1 I'm half-and-half on it right now, so I don't know.

2 Q Half-and-half on what?

3 A That I don't remember recalling  
4 seeing anything with NCR's logo on it or anything  
5 like that.

6 Q And the other half you do recall  
7 seeing an NCR logo?

8 A I think I remember seeing -- but  
9 I've been in Dayton all my life. I've seen trucks.  
10 Right now I'm confused of what I saw through my  
11 lifetime and what I remember right now to see 'em  
12 on the dump. This is a lot of information. If you  
13 want an honest answer, I don't remember right now  
14 at this particular --

15 Q I want an honest answer. And if  
16 that's your honest answer, I understand.

17 Same question with respect to Hobart  
18 waste. Do you recall Hobart waste ever being  
19 dumped at the South Dayton Dump?

20 A I was really surprised about Hobart.

21 Q What were you surprised about?

22 A Huh?

23 Q What where you surprised about  
24 Hobart?

25 A That they would dump something all

1 the way from Troy. But then when I remembered that  
2 some of -- there was facilities over in East Dayton  
3 that, I guess, was like a subsidiary or a tool and  
4 die shop, I guess, is the only thing I recall. I  
5 don't know whether they dumped these particular  
6 products. And we had a lot of shavings off --  
7 later that came from various -- that would be real  
8 oily and stuff. And I believe that they would --  
9 would have come from that. 'Cause a lot of stuff  
10 did come from East Dayton. East Dayton Tool and  
11 Die, Apex Tool and Die. There was one on Keowee  
12 Street. I had a friend he worked there, and he  
13 said that they delivered shavings. So I did not  
14 see any -- I -- what's the word I want to use? I  
15 think of Hobart as being kitchen, industrial  
16 appliances, you know. So I did not see any of that  
17 stuff. So when I say surprised, I don't remember  
18 seeing 'em bring trucks from Troy that had those  
19 type of things.

20 Q So you don't recall any Hobart waste  
21 being dumped at the South Dayton Dump; is that  
22 correct?

23 A Correct.

24 Q And the metal shavings that you  
25 recall being dumped there, where did they come

1 from?

2 A I just mentioned it would be Apex  
3 Tool and Die. I just mentioned one other one.

4 Q East Dayton Tool and Die?

5 A Yeah, East Dayton Tool and Die.  
6 Most of the tool and die shops there.

7 Q Do you recall any waste coming from  
8 Dayton Walther being dumped at the South Dayton  
9 Dump?

10 A Yes.

11 Q And what did they dump?

12 A A lot of metal -- metal products.  
13 I'm thinking wheels, wheel stuff. But I think it  
14 was metal products.

15 Q Do you recall them dumping any  
16 drums?

17 A No.

18 Q Do you recall any of them dumping  
19 any liquid waste?

20 A No.

21 Q Did they transport their waste in  
22 their own trucks?

23 A I don't know.

24 Q How often did they come there?

25 A Not very often. Probably once a

1 month.

2 Q You indicated that at one time you  
3 were in the business of rehabbing HUD housing or in  
4 construction of HUD housing; is that correct?

5 A Dad had -- when I was working at  
6 A.E. Fickert he came and got me one day and said he  
7 was going to buy some houses he wanted me to  
8 remodel, and he bought our first batch -- HUD  
9 houses were coming three at a time, so he bought  
10 three to start out with to see what I could do with  
11 them. So we bought the first batch, and I got to  
12 fix one up for myself, and then the other two we  
13 flipped.

14 Q And so when you bought 'em, did you  
15 have to go in and rehab 'em and fix 'em up a little  
16 bit?

17 A Yeah, yeah.

18 Q And so you generated some  
19 construction and demolition debris waste; is that  
20 correct?

21 A Waste?

22 Q Yeah.

23 A Mm-hmm.

24 Q These were older homes?

25 A Yeah, mm-hmm.

1                   Q     Was there any asbestos in the  
2     material?

3                   A     Not -- yes, yes, tile.    Some tile.

4                   Q     Ceiling tile?

5                   A     No, floor tile.

6                   Q     Floor tile?

7                   A     Yeah, bathroom floor tile, little  
8     bit of kitchen floor tile.

9                   Q     And then some insulation here and  
10    there, pipe insulation?

11                  A     Wall insulation, not pipe.

12                  Q     Any painted surfaces?

13                  A     Huh?

14                  Q     Any painted surfaces you'd have to  
15    take off a piece of wood to paint it or --

16                  A     Oh, yeah, yeah.

17                  Q     Might have some lead-based paint  
18    'cause it's an old house?

19                  A     Yeah, mm-hmm.

20                  Q     And you took all that waste to South  
21    Dayton Dump?

22                  A     The city had bulk pickup in Dayton,  
23    so I put a lot of it out for bulk pickup, and the  
24    rest I'd take down to the dump.  Dad didn't really  
25    want me to dump in the area where everybody else

1 was, so I dumped over -- when I could on the  
2 weekends and stuff, I'd sneak it down there and  
3 dump over there in tract 4.

4 Q Is that what's also --

5 A -- or Tier 4.

6 Q Tier 4?

7 A Yeah.

8 Q That's where you dumped your waste?

9 A Yeah.

10 Q And that was old construction  
11 demolition debris for these houses?

12 A Yeah.

13 Q Could have contained some asbestos  
14 and lead-based paint?

15 A Well, I don't know actually what's  
16 in tile, the old tile. I thought there was  
17 asbestos in it. So --

18 Q You had testified earlier about this  
19 lock that everyone knew the number to.

20 A Yeah, 2246.

21 Q 2246. Is that an actual key, or was  
22 that a padlock with the number 2246?

23 A That was the actual key.

24 Q That was the actual key. So  
25 everyone actually had to have that key?

1 A Right.

2 Q But, well, there was a lot of people  
3 that had that key?

4 A A lot of people had that key.

5 Q You indicated that you worked for  
6 Larry Brandon?

7 A Yes.

8 Q What did you do for Larry?

9 A I started working for him at General  
10 Refuse on I think it's Dryden Road painting the --  
11 well, actually I built some offices for him first,  
12 and then after I built the offices then they hired  
13 -- Container Service hired me to paint -- sand and  
14 paint the new containers, spray paint 'em. And  
15 then from there he wanted to try me out at the  
16 Powell Road landfill, so I went out to Powell Road.

17 Q So you worked for Container Services  
18 for some time?

19 A Yes.

20 Q Did you ever see the company  
21 Kelsey-Hayes dump any waste at the South Dayton  
22 Dump?

23 A Kelsey-Hayes?

24 Q (Nodding in the affirmative.)

25 A No.

1                   Q     What about a company named TRW? Do  
2     you recall them ever dumping waste out at the South  
3     Dayton Dump?

4                   A     CRW?

5                   Q     No, TRW.

6                   A     TRW. I want to -- I see that -- I  
7     see TRW. I remember that, but I don't know why.

8                   Q     Do you recall if a company named  
9     Dayton Steel Foundry ever dumped waste at the South  
10    Dayton Dump?

11                  A     Yes.

12                  Q     What type of waste did they dump  
13    there?

14                  A     I think they had like big metal  
15    bands that came in trucks. Say the name again,  
16    please?

17                  Q     Dayton Steel Foundry.

18                  A     Yes, I do, but right now I'm not --  
19    I remember bands coming from somewhere.

20                  MR. MERRILL: If I could go off the  
21    record and take a quick break. I just want to -- I  
22    think I'm done with you, Mr. Grillot.

23                  THE WITNESS: Thank you.

24                  (Whereupon, a recess was taken.)

25                  MR. MERRILL: Back on the record.

1 Mr. Grillot --

2 THE WITNESS: Yes.

3 MR. MERRILL: -- I have no further  
4 questions. I want to thank you for sitting here  
5 this afternoon.

6 THE WITNESS: Thank you very much.

7 CROSS EXAMINATION

8 BY MR. HARBECK:

9 Q Good late afternoon, Mr. Grillot.

10 A Yes.

11 Q Am I pronouncing it the right way?

12 A Grillot.

13 Q No T. Okay. Silent T.

14 My name is Bill Harbeck. I represent  
15 Waste Management of Ohio. I have some questions  
16 for you. Not many.

17 A Okay.

18 Q I'm not going to tread over old  
19 ground. I'll do my best not to. Again, if you  
20 don't understand one of my questions, please let me  
21 know and I'll try to rephrase it.

22 A Okay.

23 Q And if you can't hear me, let me  
24 know, too, because you said you're a little hard of  
25 hearing. So let me know.

1 A Yeah.

2 Q Can you tell me what you did to  
3 prepare for this deposition today?

4 A What did I do?

5 Q Yes. Did you have a meeting with  
6 anybody to sit down? Did they talk to you about  
7 the deposition process, what was going to happen  
8 today, things like that?

9 A Kind of sort of, yeah.

10 Q When did you do that?

11 A Yesterday.

12 Q With whom did you do that?

13 A With Larry. I'm sorry. His  
14 secretary.

15 MR. SILVER: Legal assistant.

16 THE WITNESS: Legal assistant and Bill.

17 BY MR. HARBECK (Continuing):

18 Q Bill Walsh?

19 A Yes.

20 Q Okay. And the legal assistant is  
21 Kaitlyn Harantschuk. Is that who you met with  
22 also?

23 A Yes, yes.

24 Q Hope I didn't butcher your  
25 pronunciation too much.

1                   How long did that meeting last?

2                   A     About an hour.

3                   Q     Okay. Did you go over any documents  
4 during that meeting?

5                   A     I was shown the one Exhibit 2 I  
6 think it was and --

7                   Q     That's the exhibit with the parcels  
8 on it?

9                   A     Right. And some pens, some markers.

10                  Q     Some markers. Okay. Did they tell  
11 you they're going to go through that exhibit and  
12 have you mark various places?

13                  A     He wanted to know if I had a problem  
14 with marking where I would recall different things  
15 on that map.

16                  Q     Okay. During that meeting did they  
17 tell you they were going to ask you the names of  
18 various companies and ask you whether or not you  
19 recognized them in terms of whether they dumped at  
20 the South Dayton Dump?

21                  A     Whether or not that was mentioned  
22 yesterday or the two times that I seen them in  
23 North Carolina, I don't remember. I don't recall  
24 if it was yesterday or not.

25                  Q     The list -- Mr. Silver had a list he

1 was reading names off of. Did you go over that  
2 list at any time prior to your deposition?

3 A No.

4 Q Other than that one meeting which  
5 you said lasted about an hour, is there anything  
6 else that you did to prepare for this deposition?

7 A No, other than we talked about times  
8 and when -- when it would start and so on and so  
9 forth.

10 Q Did you talk to any of your  
11 relatives about the fact that you were being  
12 deposed?

13 A I called my stepmom to inform her I  
14 was -- to inform her I was in town and that I'd  
15 like to see her when I was up here. That's about  
16 it.

17 Q I know you did this a little bit.  
18 I'm a little fuzzy in terms of the -- your site  
19 history, your personal involvement at the South  
20 Dayton Dump. I just want to do this real quickly  
21 if I can and have you tell me if I'm going wrong  
22 and maybe fill in a couple of blanks.

23 A Okay.

24 Q You were born in 1952; correct?

25 A Correct.

1                   Q     And you said the first time you ever  
2     started going to the South Dayton Dump was  
3     somewhere when you were maybe five to seven years  
4     old?

5                   A     Right.

6                   Q     So that would have been somewhere  
7     around 1957 to 1959 when you first started going;  
8     correct?

9                   A     Right. That I remember it being a  
10    youngster.

11                  Q     That you remember, correct.  
12                         And then you said you started working on  
13    a spot basis at the South Dayton Dump you thought  
14    it was around -- when you were around eight years  
15    old?

16                  A     Right.

17                  Q     So that would have been around 1960?

18                  A     Yes.

19                  Q     And then you said -- I think you  
20    said you worked at the dump until you were about 15  
21    years old; is that right?

22                  A     Yeah, before I worked for Doyle  
23    Roberson at the Auto Parts.

24                  Q     And you started working for Doyle  
25    when you turned 15 or when you turned 16?

1                   A     When I turned 16.

2                   Q     So you worked -- you were working at  
3     the South Dayton Dump until about 1967 or so?     Did  
4     I do the math right?

5                   A     Yeah, mm-hmm.

6                   Q     Okay.   And then -- and during that  
7     time frame you were in school the entire time; is  
8     that right?

9                   A     Only up till 16.   'Cause you had --  
10    in order to get out of school you had to be a  
11    certain age and you had to get a work permit from a  
12    company.   So since Doyle's Auto Parts was a friend  
13    of my dad, they decided I could do that.   I  
14    wasn't doing very well in school, so I just decided  
15    --

16                  Q     Did you drop out of school at the  
17    age of 16?

18                  A     Yeah, mm-hmm.

19                  Q     So how much education did you end up  
20    getting through into high school?   Through what  
21    grade?

22                  A     Seventh grade in English and ninth  
23    grade the other things.

24                  Q     So you kind of completed the ninth  
25    grade?

1 A That's when I quit.

2 Q That's when you quit. You were in  
3 the middle of ninth grade?

4 A Yeah, I think so. Actually, I think  
5 it was in the spring of that year that I went down  
6 to work for Doyle.

7 Q Okay. And during that period of  
8 time up until you -- you know, into your 15th year,  
9 you were there during the summers and then during  
10 the school year sometimes on weekends?

11 A Right.

12 Q Is that generally when you were at  
13 the South Dayton Dump?

14 A Right.

15 Q Now, then when did you come back, if  
16 ever, and start working again or doing stuff at the  
17 South Dayton Dump?

18 A I was between I think 17 and 18 is  
19 when I was driving the dozer for Powell Road  
20 landfill and then for Uncle Alcine. So it would be  
21 in that time frame.

22 Q And how long did you drive the dozer  
23 for Uncle Alcine?

24 A A year, maybe two years at the most.

25 Q Okay. So you would have been around

1 17, 18, 19, somewhere in that time frame?

2 A Yeah, mm-hmm.

3 Q So again adding it on in terms of  
4 when you were born, it would have been 1969, 1970,  
5 '71, somewhere in that time frame?

6 A 'Cause I got married in '71, I  
7 think, '70 or '71.

8 Q When you got married -- at the point  
9 when you got married is that when you stopped  
10 driving the dozer?

11 A Pretty much. That's when I started  
12 working at Liberal Markets I think in that time  
13 frame.

14 Q From that point forward, had you  
15 pretty much stopped working at the South Dayton  
16 Dump?

17 A I think I mentioned before I used to  
18 go down and help -- help out different various  
19 times for Uncle Kenny if they had something to do.  
20 David was still working the skids, burning the  
21 skids. I'd go down and help him out sometimes,  
22 too, just to look around, get a feel for the dump  
23 again.

24 Q Okay. And this was after you got  
25 married?

1                   A     Yes, mm-hmm.

2                   Q     So when would you have been doing  
3     that occasionally going back to the dump and  
4     helping out on a spot basis and looking around?  
5     What time frame are we?

6                   A     From '72 into the '80s. Yeah,  
7     somewhere around '82 to '84, I think.

8                   Q     Okay. So from the early 1970s until  
9     1982 or '84 you would go to the dump on occasion  
10    and do odd jobs?

11                  A     Right. Or get stuff off of the dump  
12    to fix up or whatever.

13                  Q     Okay. You know, during that time  
14    frame can you tell me how frequently you would go  
15    to the South Dayton Dump? And this is for that  
16    ten, 12 years or so when you were doing it on a  
17    spot basis.

18                  A     Well, as I was running my own  
19    different businesses after -- in the early -- or  
20    late '70s, early '80s and working for different  
21    contractors through the '80s, I'd go down there and  
22    dump stuff. I'm trying to think what else I did.  
23    We used to mushroom hunt a lot back there and go  
24    fishing in the pond. So I'm getting a little  
25    confused on how much was actual work and how much

1 was --

2 Q Yeah. Putting aside whether you  
3 were working or mushroom hunting or fishing --

4 A I was down there quite a bit.

5 Q When you say "quite a bit," I just  
6 don't have a sense. How often --

7 A At least three times a week.

8 Q Okay. Even for that ten, 12-year  
9 period, you would go back to the South Dayton Dump  
10 at least three times a week?

11 A (Nodding in the affirmative.) I was  
12 real close to Uncle Kenny, and Bud was still  
13 around. I was pretty much friends with them.

14 Q Okay. You nodded your head to my  
15 last question. Was the last answer yes?

16 A Yes, yes.

17 Q Okay. So now we're in the '82 to  
18 '84 time frame. From that point forward did  
19 something happen that changed the frequency with  
20 which you went to the South Dayton Dump?

21 A I think I mentioned this afternoon  
22 that's when a lot of the heat would come down from  
23 the EPA. And Alcine was no longer Mayor, and at  
24 that point Alcine was not very likable. He was  
25 kind of grumpy because of all the problems that was

1 coming down on his life. So I stayed pretty much  
2 away during parts of the day that I knew he would  
3 be down there. Then I'd go later on when Uncle  
4 Kenny was by himself or on Saturday. Nobody else  
5 was there but Bud and Uncle Kenny on the weekends.

6 Q So you would still continue to go  
7 down there?

8 A Yeah.

9 Q At what point did you stop going to  
10 the South Dayton Dump? Was it when you moved out  
11 of the area or some other time? I'm trying to get  
12 sort of an ending point at which you no longer  
13 started -- no longer were going to the South Dayton  
14 Dump.

15 A '89, '90 maybe.

16 Q What happened in '89 or '90 that  
17 made you stop going to the dump?

18 A There wasn't very much activity that  
19 I remember going on. I had just finished my last  
20 house, and I was working for another construction  
21 outfit at that time, and so the dumping was done in  
22 West Carrollton.

23 Q Okay. When did you move to North  
24 Carolina?

25 A It would have been -- well, first

1 time I was there in '08 for eleven months, and then  
2 I moved back November of '10, 2010.

3 Q You said that you -- during this  
4 ten, 12-year period of time when you were doing  
5 other jobs I think maybe even into the '80s you had  
6 various construction-related jobs?

7 A Mm-hmm.

8 Q Besides the HUD projects that you've  
9 already testified to --

10 A Right.

11 Q -- there were other  
12 construction-related projects or employment that  
13 you had?

14 A Yeah.

15 Q And you said I think just a couple  
16 of minutes ago you'd take construction debris from  
17 those jobs also? You'd take that to the South  
18 Dayton Dump?

19 A On various occasions, yeah.

20 Q And, again, what kind of  
21 construction debris would this be?

22 A Construction material. Drywall,  
23 two-by-fours, concrete, stuff like that.

24 Q Would it be houses that you were  
25 tearing down?

1           A     Well, through -- through being a  
2     relative to the dump that was sort of some of the  
3     freebie things you got. So I always wanted to be  
4     Mr. Bigshot, "Oh, I'll take it down to my uncle's  
5     dump." Everybody got real -- I kept my job, I  
6     guess, that way. So, you know, it was just one of  
7     those things, and I got to see Uncle Kenny.

8           Q     Right.

9           A     "Uncle Kenny, can I drop this off  
10    here?" But sometimes I'd go around to Tier 4 on  
11    the weekends and stuff if I was doing home projects  
12    and stuff. Then I'd catch heck later on from my  
13    dad, "What did you dump?"

14          Q     So if you're tearing down a piece of  
15    the house to do a renovation, or were there some  
16    times when you'd be tearing down a complete house  
17    and putting something new in? I mean, I'm trying  
18    to get an idea of scope.

19          A     Sometimes we had a house.

20          Q     Okay. And were all the guts of the  
21    house -- would all the guts of the house you'd take  
22    it all back to the South Dayton Dump?

23          A     Sometimes, yes.

24          Q     How many -- and maybe this is hard.  
25    If you can't do it, let me know.

1                   How many times would you -- did you go  
2 back to the South Dayton Dump yourself and dump off  
3 this type of construction debris?

4                   A     For myself?

5                   Q     Yeah, just you yourself. Not your  
6 own stuff, but just how many times did you do it,  
7 you know, taking it for somebody else, taking it on  
8 projects you were working for, whatever the  
9 situation.

10                  A     It would pretty much vary. Time  
11 frame maybe sometimes it would be twice a week,  
12 sometimes maybe just once a month, you know. Some  
13 year it might have been every day, you know.

14                  Q     Okay. And this would have been --  
15 during what time frame were you doing this? In  
16 the '70s through the '80s?

17                  A     Well, when I worked for Fickert that  
18 short period of time till around '81, '82, when I  
19 had the house over in Kettering would be about that  
20 time frame.

21                  Q     So up until -- Fickert through '81,  
22 '82?

23                  A     Mm-hmm.

24                  Q     Tell me again when did you start  
25 with Fickert roughly?

1                   A     Roughly '72, '73, in that area. I  
2     worked at Liberal Markets, too, I think, at that  
3     time.

4                   Q     The place where you're currently  
5     living, is that a home?

6                   A     The man that I met, Johnny, he's got  
7     an old pack house. It was a slave house for when  
8     they picked cotton and stuff like that. He  
9     renovated it some time ago, and he's letting me  
10    live there.

11                  Q     Okay. Mr. Merrill asked you about a  
12    couple companies in terms of whether or not you  
13    remembered their waste being taken to the dump.

14                  A     Who?

15                  Q     Mr. Merrill, the lawyer that just  
16    asked you questions right before me. He asked you  
17    about a couple of companies, asked you whether or  
18    not you remembered whether their waste was taken to  
19    the South Dayton Dump.

20                  A     Right.

21                  Q     One of them was NCR. And I think  
22    your testimony was you didn't have any specific  
23    recall of them. Did you ever hear from anybody  
24    that NCR was taking waste to the South Dayton Dump  
25    while you were at the South Dayton Dump during the

1 time frame you were working there, visiting there?

2 A See, my half brother, my dad's other  
3 son by marriage, he worked there for a lot of  
4 years.

5 Q Worked at NCR?

6 A Right. And when I'd go over and  
7 talk to him, stuff like that, we'd talk about NCR.  
8 He'd tell me. My confusion with what I remember  
9 from -- and my grandfather worked there for 50-some  
10 years. So what I remember from NCR, they had a --  
11 like I mentioned this morning, they had a fireworks  
12 disaster. The confusion with NCR and what I  
13 remember would come down to the dump, I don't  
14 recall right now, if that helps.

15 Q It sort of does. I'm just wondering  
16 if while you were there at the dump during this --  
17 you were there for quite a long period of time from  
18 late '50s into I think you said the late '80s. Did  
19 anyone ever tell you --

20 A Wait, wait.

21 Q Go ahead.

22 A I do remember NCR cash register  
23 stuff and another cash register called National  
24 Cash Register was over on the west side of Dayton.  
25 I do now remember a couple -- seeing cash registers

1 and stuff, yeah.

2 Q At the South Dayton Dump?

3 A Right.

4 Q And do you remember seeing them come  
5 into the South Dayton Dump?

6 A No. I saw the cash registers and  
7 stuff, the parts. I remember that.

8 Q In what area of the dump did you see  
9 those?

10 A That would have been on Tier 1 or  
11 Tier 2.

12 Q Do you remember roughly when you  
13 first saw cash register parts?

14 A It would be early '60s. '62, maybe  
15 '64, somewhere in that area.

16 Q And did these cash register parts  
17 have National Cash Register names or logos or  
18 brands on them? How did you know they were from --

19 A NCR. They were written NCR and then  
20 the other one. It was either called Standard  
21 Register or International. It might have been  
22 Standard Register. But I was confused because I  
23 thought they were the same company, but I was told  
24 they weren't, they were two different companies.

25 Q So you saw both Standard Register --

1 A Right.

2 Q -- and National Cash Register --

3 A Right.

4 Q -- cash register parts?

5 A Right.

6 Q Did you see any other sort of  
7 mechanical equipment from National Cash Register at  
8 the South Dayton Dump besides cash register parts?

9 A No, those are the only two things.  
10 No.

11 Q How long as far as you know, based  
12 upon your seeing these National Cash Register  
13 parts, did National Cash Register or NCR dump at  
14 the South Dayton Dump?

15 A Well, they were -- how long?

16 Q Yeah. Over what period of time?  
17 You said early '60s --

18 A Yeah.

19 Q -- until when?

20 A I think they stopped their  
21 operations around that time. I think -- whether or  
22 not that was the remnants of it, I don't remember.  
23 I think NCR pulled out or was in the process of  
24 pulling out from that type -- that operation.

25 Q Okay. So you think that they were

1 dumping that sort of stuff there until they sort of  
2 transitioned out of the cash register business?

3 MR. SILVER: Objection, foundation. He  
4 didn't say anything about who sent the stuff to the  
5 site.

6 BY MR. HARBECK (Continuing):

7 Q Go ahead.

8 A I don't understand what happened.  
9 What just happened?

10 Q Yeah. He objected, but doesn't mean  
11 you can't answer the question if you can remember  
12 it.

13 A What was the question?

14 Q It was, is it your recollection that  
15 you saw National Cash Register parts being dumped  
16 at the South Dayton Dump up until around the time  
17 National Cash Register sort of transitioned out of  
18 that business?

19 A Yeah, I think so. Yes.

20 Q Okay. And how about -- let's just  
21 go back to Kelsey-Hayes. You said no recall. Did  
22 you ever hear anybody talk about whether or not any  
23 waste from Kelsey-Hayes was dumped at the South  
24 Dayton Dump?

25 A No, because I don't know that firm,

1 or I don't know -- if they were called something  
2 else at one time I'd remember.

3 Q What about Hobart? Did you ever  
4 hear anybody talk about Hobart using the South  
5 Dayton Dump back during your South Dayton Dump  
6 days?

7 A Not Hobart specifically. Like I  
8 said, a lot of -- I was told later on a lot of the  
9 tool and dies had different companies that would  
10 hire them for different things. Sometimes there  
11 would be a lot of small parts would come in that  
12 they tooled and died and would mess up. But the  
13 most I remember was the shavings, the metal  
14 shavings with the oil on it.

15 Q And you had already described where  
16 those came from; right?

17 A Right.

18 Q Did you ever see any foundry cores  
19 dumped at the South Dayton Dump?

20 A Huh?

21 Q Foundry cores?

22 A What we would call the cores was the  
23 Apollo thing. It looked like Apollo space craft  
24 thing. But I remember seeing a lot sometimes come  
25 in wooden -- things that looked like they were

1 forms, but I don't remember who brought them in.

2 Q Okay. Last question. I'm sorry to  
3 have to ask you this, but it's important to know.  
4 You said you're seeking disability right now?

5 A Yes, mm-hmm.

6 Q What's your disability from your  
7 perspective? What disability do you have?

8 A Degenerative -- I think it's called  
9 degenerative arthritis and bipolar.

10 MR. HARBECK: Thank you very much.  
11 That's all I have.

12 THE WITNESS: You're welcome.

13 CROSS EXAMINATION

14 BY MR. MOSS:

15 Q Good afternoon, Mr. Grillot.

16 A Hi. How are you?

17 Q I'm well. Thank you.

18 My name is Dave Moss. I'm a lawyer who  
19 represents Dayton Tire and Rubber. We've been here  
20 a long time today, and I appreciate your sticking  
21 with this.

22 I need to ask you, is there anything that  
23 would prevent you from answering my questions  
24 completely and truthfully now since we've been  
25 going at it so long?

1           A     My memory is getting a little  
2 cloudy, so I don't -- to honestly answer you, I  
3 don't know.

4           Q     Well, the reason I'm asking that is  
5 because Mr. Silver had several hours of questions  
6 for you this morning.

7           A     Right.

8           Q     And I want to make sure that I'm  
9 getting the same quality of testimony from you --

10          A     Sure.

11          Q     -- that Mr. Silver got. So I need  
12 your honest answer. If you think that your memory  
13 is fading or not as good as it should be, then I  
14 think I need to know that, and I think we may need  
15 to make some decisions here.

16          A     I honestly would have to say yes.

17          Q     Yes what?

18          A     That I'm having problems remembering  
19 right now.

20          Q     Okay. And you think that would  
21 potentially impair your ability to give truthful  
22 testimony?

23          A     Well, I -- you know, I could forget  
24 -- you know, like I said, it's all -- there's so  
25 many questions I'm being bombarded with, so I don't

1 know. I would do my best. That's all I can say at  
2 this point.

3 Q Well, you've never met me before.  
4 We've never spoken; true?

5 A No.

6 Q I just want to ask you this, and  
7 then maybe we'll have to have a discussion. But  
8 before -- when you met with Mr. Silver, did he go  
9 over the list of companies that you've testified  
10 about today before you gave testimony about those  
11 companies?

12 A No. Actually, they asked me what I  
13 remembered. And when Bill came down we sat, and he  
14 said -- and then he had a potential list of  
15 possible companies in the area at that time.  
16 'Cause I asked him, I said, "Well, let's go get a  
17 phone book," because I don't remember back in the  
18 '60s what company was who. A lot of companies  
19 changed names and stuff like that.

20 Q Well, what order did that occur in?

21 A The list?

22 Q Did you give them the name first or  
23 did they give you the name first?

24 A I gave them the name first.

25 Q What names did you give them?

1                   A       Several, but your company was  
2 mentioned.

3                   Q       What names did you give them?

4                   A       It would have been General Motors,  
5 Inland, Delphi, Frigidaire, Monsanto, Dayton Tire  
6 and Rubber, McCall's, Sherwin-Williams, Durel  
7 Paint, Franklin Iron and Metal, Patterson Iron and  
8 Metal, Duriron, A.E. Fickert and Son, Dayton  
9 Walther. That's pretty much the list I can  
10 remember.

11                  Q       As you sit here today, do you know  
12 if that's the exact list that you gave Mr. Silver  
13 when you met with him?

14                  A       Yes.

15                  Q       That is the exact list?

16                  A       Maybe not in that order, but it's  
17 pretty close.

18                  Q       Did you refer to any notes at any  
19 time or anything that you had written down to  
20 generate this list?

21                  A       That's pretty much my memory.

22                  Q       My question, though, is did you ever  
23 write a list down or did you refer to any --

24                  A       I started --

25                  Q       Let me finish my question. And I

1 know you're tired, and I'm tired.

2 Did you ever generate any kind of a list  
3 that helped you put this list together that you've  
4 just given me?

5 A No.

6 Q Have you ever written a list  
7 anywhere?

8 A No.

9 Q You started to tell me something in  
10 response to my question a moment ago.

11 A I had started a list, but I was  
12 getting pretty -- what's the word? I thought I'd  
13 wait till he got there because my writing's not  
14 very good. So I was embarrassed for him to see my  
15 writing on the list. I really asked him if he  
16 would write it down for me. I didn't want him to  
17 know I couldn't spell.

18 Q Do you still have that list that you  
19 started?

20 A I don't think so, no.

21 Q The testimony that you offered  
22 earlier today in response to Mr. Silver's questions  
23 with respect to Dayton Tire and Rubber, was that  
24 the sum total of the recollection that you have  
25 regarding Dayton Tire and Rubber sending product to

1 the site?

2 A I don't quite understand the  
3 question.

4 Q You gave some testimony earlier  
5 today --

6 A Right.

7 Q -- about your recollection of Dayton  
8 Tire and Rubber sending material to the site.

9 A Right.

10 Q My question for you now, is that all  
11 you recall about Dayton Tire and Rubber sending  
12 product -- material to the site?

13 A Well, what I recall is, as I think I  
14 mentioned earlier, that I remember getting inner  
15 tubes from the dump site and taking -- all of my  
16 cousins and I would take them over there and play  
17 on the lake.

18 Q What I'm asking you -- and I  
19 appreciate your asking for clarification. What I'm  
20 asking is what you've already testified to relative  
21 to Dayton Tire and Rubber, the inner tubes, I think  
22 you mentioned rubber shrouds and maybe some tires.  
23 Is that all you recall about Dayton Tire?

24 A At this time, yes.

25 Q Mr. Silver asked you about the

1 period of time when you recall seeing Dayton Tire  
2 and Rubber trucks bringing material to the site,  
3 and I think you said it was when you were about ten  
4 or 12 years old?

5 A Right.

6 Q Is that accurate?

7 A Yeah.

8 Q Was there any period of time after  
9 when you were ten or 12 years old that you remember  
10 Dayton Tire and Rubber bringing material to the  
11 site?

12 A I think I mentioned -- I'm not a  
13 hundred percent sure at this point, but I think I  
14 said when I was younger I remember the horse on the  
15 emblem. That stuck with me.

16 Q So is that when you were ten or 12  
17 or --

18 A I think I was younger than that.

19 Q How old were you when you remember  
20 seeing the horse with the emblem?

21 A Maybe eight or nine when I started  
22 getting into the dump itself.

23 Q So if I understand your testimony  
24 then, the period of time during which you recall  
25 seeing trucks which you believe were Dayton Tire

1 and Rubber trucks because you remember the horse  
2 emblem --

3 A Right.

4 Q -- was from the time you were about  
5 eight until the time you were about 12; is that  
6 fair?

7 A Yeah.

8 Q Is that the sum total of the period  
9 of time that you recall seeing these trucks that  
10 you associate with Dayton Tire and Rubber at the  
11 facility?

12 A I associated tires with the  
13 particular trucks that came in. And so when I  
14 worked for Doyle's Auto Parts I don't remember  
15 whose truck would dump and whose truck would haul  
16 off. Like I mentioned before, that was I think  
17 around when recapping came in. So there would be  
18 big trucks that were encaged that had -- so I don't  
19 know.

20 Q So you may -- what you're saying is,  
21 you may be confusing trucks coming in to unload  
22 material with trucks that were actually taking  
23 tires off the site from Doyle's? Is that what  
24 you're telling me?

25 A Well, I could see 'em take 'em off.

1 That's obvious. But as far as how many would end  
2 up, you know, on our side of the fence -- and what  
3 I mean, Doyle's Auto Parts at that time he had  
4 plenty of tires, too. So the operation could get  
5 real confusing. You know, I'm working. I'm not  
6 really -- I would just observe real quick what was  
7 going on.

8 Q But as we sit here today, to the  
9 best of your recollection the time period during  
10 which you recall trucks you associated with Dayton  
11 Tire and Rubber coming onto the site to dispose of  
12 materials was this period of time from when you  
13 were about eight to when you were about 12; is that  
14 fair?

15 A Mm-hmm. They built a big building  
16 over by the dump along I-75.

17 Q Who is "they"?

18 A Dayton Tire I think it was. And I  
19 remember skids coming in from there.

20 Q When was this?

21 A I think that was in -- between '75  
22 and '79 maybe.

23 Q These were wooden skids?

24 A Yeah.

25 Q How large would they be?

1                   A     They were 42-by-42. I remember the  
2     size.

3                   Q     And what was done with those skids?

4                   A     They were reconditioned or sent to  
5     Skid Row.

6                   Q     So were they -- were any of them  
7     actually disposed of on the site?

8                   A     Yes.

9                   Q     They would be burned?

10                  A     They would be burned, yes.

11                  Q     So if they weren't reconditioned and  
12     sent off site, then they were burned in the  
13     incinerator?

14                  A     Right.

15                  Q     None of them were buried in the  
16     landfill?

17                  A     No.

18                  Q     Do you have any knowledge as to the  
19     volume or number of those skids that would have  
20     been sent to the site during that time frame '75 to  
21     '79?

22                  A     A truckload maybe a week.

23                  Q     And give me an idea of the size of  
24     the truck or the --

25                  A     I think they were 60-yard containers

1 maybe.

2 Q Describe the truck.

3 A It was what they call a roll-back  
4 truck.

5 Q Can you give me a color, model?

6 A I don't remember. And I don't  
7 remember emblems on. That was an earlier day.

8 Q Right. You were shown this Exhibit  
9 4 by Mr. Silver during your Direct testimony. When  
10 is the first time you saw this document?

11 A Yesterday.

12 Q And who showed it to you?

13 A Larry.

14 Q Do you know where he got this?

15 A No.

16 Q Did he tell you where he got it?

17 A No.

18 Q So did he show this to you and ask  
19 you if you remembered this logo?

20 A I'm sorry. No. Bill showed it to  
21 me on Sunday. And -- no, it was before we got to  
22 meet with Larry. And he showed me two photos, one  
23 of something else and then that one. And he said,  
24 "Do you remember these?" And for a quick few  
25 seconds, no. And then I looked down, and I saw

1     that horse on the triangle.  I said, "I remember  
2     that," and that's all that --

3                   Q     Do you know why he was showing this  
4     to you?

5                   A     Do I know why?

6                   Q     Yeah.  Did he say why he was showing  
7     this to you?

8                   A     He wanted to know if I remembered  
9     where it came in from.

10                  Q     Did he tell you that you were going  
11     to be asked some questions about it at the  
12     deposition?

13                  A     Yes.  Yeah.

14                  Q     What did he say?

15                  A     He just said that -- you know, that  
16     -- asked if I would remember this and if I could  
17     recall what I saw.  I said, "Well, I remember the  
18     horse.  That's all."

19                  Q     Okay.  Fair to say, though, that  
20     this -- being shown this Exhibit 4 with the logo  
21     refreshed your recollection as to what the logo  
22     was?

23                  A     Only the horse.

24                  Q     Only the horse?

25                  A     Right.  But, I mean, you take in

1 perspective the whole sign and it said Dayton Tire  
2 and Rubber.

3 Q Well, in fairness, you were asked  
4 this morning if you recalled what the logo of the  
5 Dayton Tire and Rubber Company was. Do you recall  
6 being asked that question?

7 A Yes.

8 Q And you said it was a horse -- you  
9 thought it was a horse with a ring; correct?

10 A Circle. In a circle, yes.

11 Q All right. But you had already been  
12 shown this document, so you knew what it was  
13 because you had already had your recollection  
14 refreshed.

15 A I wasn't asked that. I was asked do  
16 I remember anything, so --

17 Q But you --

18 A -- I wouldn't have --

19 Q Go ahead. I'm sorry.

20 A It sounds like I was prompted to  
21 remember. No, 'cause the first couple seconds I  
22 don't remember, but then I had to sit and look at  
23 it for a while and remember that horse, and then it  
24 came back to me what was there.

25 Q But before you gave sworn testimony

1 in your deposition this morning about what the logo  
2 of the Dayton Tire and Rubber Company was, you were  
3 shown this logo --

4 A Yes.

5 Q -- by Mr. Walsh?

6 A Yes.

7 Q So it's fair, is it not, that your  
8 testimony that you provided with respect to the  
9 logo this morning was based at least in part on  
10 having your recollection refreshed by being shown  
11 this document a couple of days ago?

12 A Correct. Yes. Correct.

13 Q Do you have any estimate that you  
14 can give us as to the volume of inner tubes,  
15 shrouds or tires that you say were sent to the dump  
16 by Dayton Tire and Rubber?

17 A I mentioned maybe a truckload a  
18 week. And then again because of the smoke factor,  
19 we tried to keep tires, anything -- 'cause we were  
20 being told not to burn. So we were trying to keep  
21 the smoke down as much as possible. So I remember  
22 having to pull 'em out of piles, and then that's  
23 where I -- as kids we said we'll use 'em for inner  
24 tubes. So the ones that were patchable, we'd patch  
25 'em up.

1                   Q     So just to try to get to my answer,  
2     the answer to my question, what size truck?  And  
3     can you give us an estimate as to any volume other  
4     than what you've already told us?

5                   A     A 60-yard truck once a week.

6                   Q     I thought that related to the skids  
7     you were talking about.

8                   A     Pardon me?  Well, a lot of times  
9     they would be intertwined with wooden skids and  
10    stuff like that.

11                  Q     I'm confused now, and it's probably  
12    my fault, but we talked about the tires coming  
13    during the period of time from when you were eight  
14    years old to 12 years old.

15                  A     Right.

16                  Q     So now we're talking about 1960 to  
17    about 1964.

18                  A     You're still going to have the wood  
19    products and the rubber products --

20                  Q     Okay.

21                  A     -- whether it came from the west  
22    side or it came from Moraine.  Like I said, I don't  
23    remember exactly when that -- I think Moraine was  
24    just like a storage facility.  It was more a  
25    shipping type of thing, so --

1                   Q     But the period of time during which  
2     the rubber products, which you've identified as  
3     tubes, some rubber shrouds and tires, the period of  
4     time we've already established was from when you  
5     were age eight to age 12?

6                   A     Right.

7                   Q     Then from the period of time that  
8     you said was around '75 to '79, you recall skids  
9     only coming from the warehouse; correct?

10                  A     On the -- yeah, the 42 -- the 60-  
11     yard container, yeah. And in the earlier days I  
12     don't know what they came in. I don't think they  
13     had roll-backs back then. I remember the trucks  
14     that had the big cage to it, so -- does that make  
15     sense?

16                  Q     Well, I'm not sure.

17                  A     Okay.

18                  Q     Do you remember Dayton Tire bringing  
19     materials to the site with a cage truck?

20                  A     Cage truck, yeah. They would be  
21     emptied off of that particular thing. Like I said,  
22     sometimes they'd have skids. They might have a  
23     couple barrels on it. But then from the other side  
24     it was the 60-yard roll-back things that came.  
25     Those had the skids.

1                   Q     Now you mentioned barrels. I  
2 haven't heard any talk about barrels before now.  
3 What do you recall about barrels?

4                   A     They would be them cardboard  
5 barrels. We'd use them to put copper and stuff in  
6 'em.

7                   Q     So these were empty barrels?

8                   A     More or less, yeah.

9                   Q     Is there anything else -- and I have  
10 to make sure you understand. This is the only  
11 chance I get to question you before trial.

12                  A     Correct.

13                  Q     You understand that?

14                  A     Correct.

15                  Q     I just want to make sure that when  
16 we get to trial I'm not going to hear something  
17 extra or different about what you recall about  
18 Dayton Tire and Rubber. So have we exhausted your  
19 memory of what materials Dayton Tire and Rubber may  
20 have brought to the South Dayton Dump?

21                  A     Today you have, yes.

22                  Q     Well, if you remember anything else,  
23 will you let Mr. Silver know?

24                  A     I will do that, yeah.

25                  Q     Just a couple of other follow-ups

1 and then I'm done.

2 What's your girlfriend's full name?

3 A Donna Moeller, M-O-E-L-L-E-R.

4 Q Spell the last name again.

5 A M-O-E-L-L-E-R.

6 Q And what's her address?

7 A I don't have -- her old address  
8 would be 11540 Wilts Lane, Medway, Ohio. I don't  
9 know the Zip.

10 Q And where does she currently live?  
11 What city?

12 A She's living in Kettering right now.

13 Q And the gentleman that you're -- are  
14 you renting from him or is he just allowing you to  
15 live in the house?

16 A Yeah.

17 Q He's just allowing you to live  
18 there?

19 A Yes, mm-hmm.

20 Q What's his full name?

21 A John Turnidge.

22 Q And how did you meet Mr. Turnidge?

23 A Through traveling with Donna. That  
24 was one of her job locations.

25 Q And what did Donna do for a living?

1                   A     He inherited a farm. He has a farm,  
2 big farm down there. Excuse me. He was a school  
3 principal most of his life.

4                   Q     My question was, what did Donna do  
5 for a living?

6                   A     Oh, Donna. I'm sorry. Donna she's  
7 a nurse.

8                   Q     And you said -- I believe you said  
9 that what took you to North Carolina to live with  
10 Mr. Turnidge had to do with some work that you had  
11 done and he had seen or something. What was that  
12 about?

13                  A     At the campground that we stayed at  
14 I met one of the persons that took care of the  
15 property, and he wanted me to help him pour some  
16 cement. So I went over to Mr. Turnidge's house and  
17 poured the cement. He saw my talent. He wanted to  
18 use me. So he used me for the eleven months that  
19 we were there. Then we went to Michigan for our  
20 next assignment, and he kept in contact with me and  
21 wanted me to come back because he had a lot of  
22 things to do.

23                  Q     And you've been down there now for  
24 about two years you said?

25                  A     Yeah.

1                   Q     Have you given any recorded  
2     statements in this case?

3                   A     No.

4                   Q     Have you ever been married?

5                   A     Yes.

6                   Q     And is your wife still living -- are  
7     you currently married?

8                   A     I have a deceased wife that I  
9     married in '70 -- 1970.

10                  Q     What was her name?

11                  A     Patricia Ann Grillot.

12                  Q     And when did Miss Grillot pass away?

13                  A     Last year.

14                  Q     And were you still married at the  
15     time?

16                  A     No.

17                  Q     When -- I assume you were divorced  
18     from her?

19                  A     Yes, mm-hmm.

20                  Q     When were you divorced?

21                  A     1975.

22                  Q     And where was that divorce?

23                  A     Montgomery County.

24                  Q     Have you been married any other  
25     times?

1 A Yes, to Christine Agnes Grillot.

2 Q What was her maiden name?

3 A Lockvis. Christine Lockvis.

4 Q Can you spell that?

5 A L-O-C-K-V-I-S, I believe.

6 Q And when were you married to

7 Christine?

8 A We got married in '77.

9 Q And did that marriage end in

10 divorce?

11 A Yeah, divorced in '89.

12 Q Where was your divorce?

13 A Montgomery County.

14 Q Any other marriages?

15 A Yeah. Lisa A. Grillot.

16 Q Maiden name?

17 A Huh?

18 Q What was her maiden name?

19 A Rowe.

20 Q R-O-E?

21 A Yeah. R-O-W-E, I think it was.

22 Q And when were you married to her?

23 A '95, divorced in '04. Clark County.

24 Q Any other marriages?

25 A No.

1 Q Do you have any children?

2 A Yes.

3 Q Can you just give me their names and  
4 ages?

5 A Chantal Marie Grillot,  
6 G-R-I-L-L-O-T. Edward R. --

7 Q How old is Chantal, if you can give  
8 me a birth date or an approximation?

9 A She was born in '71. Edward Rene,  
10 Jr. Eddie was -- he was born '84, I think. Yeah,  
11 '84. And then Sean Edward Grillot.

12 Q When was he born?

13 A No, he was '84. Eddie would have  
14 been -- Eddie was born in '75.

15 Q Any other children?

16 A No.

17 Q You said that you were convicted of  
18 domestic violence in 2003?

19 A Mm-hmm.

20 Q Who was the complainant?

21 A My son, Eddie.

22 Q And how did that charge -- did you  
23 plead to that?

24 A I pled guilty to it.

25 Q Pled guilty?

1 A Yeah.

2 Q What county was that?

3 A Greene County.

4 Q And that was a felony?

5 A Yes.

6 Q Did you serve any time in jail?

7 A Thirty days.

8 Q Have you had any felony convictions  
9 since 2003?

10 A No.

11 Q Have you ever been treated for the  
12 abuse of alcohol or drugs?

13 A Yes.

14 Q Tell me about that.

15 A I was having some issues and later  
16 -- I thought they were mental issues, and so I put  
17 myself into East Dayton -- it was called Eastway  
18 Mental Health Center, and they had told me that  
19 their conclusion was that I was an alcoholic.

20 Q When was this?

21 A That would have been 19 -- I was  
22 going to Eastway from about '76 till -- no, '75 to  
23 '76, and then I entered a -- they just opened up an  
24 alcohol ward in Miami Valley Hospital, and I put  
25 myself in there.

1 Q In about '76?

2 A That was 1977.

3 Q Any other treatment for alcoholism  
4 or drug abuse since then?

5 A Yeah, several.

6 Q When was the last?

7 A The last was when I was in North  
8 Carolina. It would have been November 14th, '08.

9 Q And what was that treatment? Was it  
10 for alcohol or drugs or both?

11 A More mental issues, but the alcohol  
12 was involved in it also.

13 Q And I'm not asking this to pry, but  
14 was alcohol aggravating your underlying bipolar  
15 disorder? Is that kind of how you understood it?

16 A My understanding is I inherited a  
17 lot of it from my folks and that the melatonin and  
18 serotonin in my brain had -- when I was born was  
19 pretty much depleted, and my younger drinking as  
20 high school and stuff like that added to it to the  
21 point where it was hard for me to sleep. So I used  
22 alcohol as a sedative. I'd drink a six-pack a  
23 night and then go straight to bed. And 2001 I went  
24 to another treatment program, and they told me  
25 about Trazodone. They said it was very effective

1 with chemical dependent people, and so I used the  
2 Trazodone, and I still to this day. It's a miracle  
3 drug for me to sleep. But I had some relapses over  
4 the course since '01 that I still have issues, and  
5 I didn't realize what they were. In '08 when I  
6 went to the facility there they told me that I was  
7 bipolar, and so I got it straightened up there.

8 Q Have you used alcohol since November  
9 of 2008?

10 A No.

11 Q You've been sober since 2008?

12 A Yeah.

13 Q Congratulations.

14 A Thank you.

15 Q All I would ask, as I said before,  
16 is if you recall anything else about Dayton Tire I  
17 would ask that you advise Mr. Silver.

18 A Okay.

19 Q All right?

20 A I'll do that.

21 MR. MOSS: Thanks very much. Thanks for  
22 your time.

23 MR. SILVER: I think the last one is  
24 coming, Ed.

25 (Whereupon, a discussion was held off the

1 record.)

2 CROSS EXAMINATION

3 BY MS. WRIGHT:

4 Q Sir, I know you're tired. We're all  
5 tired, and you have to be a hundred times more  
6 exhausted than we are. So I will try to be brief.

7 My name is Vicki Wright, and I represent  
8 Pharmacia Corporation, which used to be known as  
9 Monsanto Company.

10 A Yeah.

11 Q And that's why I'm here.

12 A What was the name of the company  
13 now?

14 Q Pharmacia.

15 A Pharmacia, okay.

16 Q When you testified about Monsanto  
17 Company, I had the understanding that you said that  
18 the Mound facility in Miamisburg sent skids and  
19 paper barrels with a white powdery substance to the  
20 South Dayton Dump; is that correct?

21 A The powder I thought came from  
22 across the river, yeah.

23 Q Okay. That would be from the  
24 research lab?

25 A Yeah.

1                   Q     Okay. And the skids you believe  
2     came from Miamisburg?

3                   A     Right.

4                   Q     Okay. You testified that this was  
5     about once a month. Let's break it down. On  
6     Miamisburg, the Mound lab, how frequently did you  
7     see trucks coming from there?

8                   A     Well, one time that I was -- it  
9     would have been once a month because I don't  
10    remember the trucks. Okay.

11                  Q     Okay.

12                  A     I can't tell you. And, too, I don't  
13    know if they had a key to get in in the evening or  
14    what. And I knew that I had spoke to one of the  
15    drivers before is what I told Larry.

16                  Q     And then he is the one who  
17    identified that he was coming from Miamisburg?

18                  A     Right.

19                  Q     During that one month time period,  
20    what ages are we talking about for you? Was this  
21    when you were how old to how old or what years,  
22    whichever is easier?

23                  A     I would say time frame would have  
24    been about early '70s, '75 maybe, something like  
25    that.

1                   Q     Okay. And for the Dayton lab across  
2 the river, do you recall the time period for that  
3 facility?

4                   A     That I think was pretty much more  
5 frequent.

6                   Q     Can you help me narrow that down to  
7 how many times a year?

8                   A     Maybe ten to 12 times a year.

9                   Q     Okay. And during what years do you  
10 think that would have been?

11                  A     From about maybe '67 to early '70s,  
12 you know.

13                  Q     Okay. All right. Do you recall any  
14 other times?

15                  A     No.

16                  Q     Okay. You testified about the truck  
17 from Miamisburg because it had the red M on it;  
18 correct?

19                  A     Correct.

20                  Q     How did you know trucks were coming  
21 from the Dayton lab?

22                  A     The Dayton lab?

23                  Q     Yes.

24                  A     'Cause some of those barrels, the  
25 cardboard barrels had indication where they came

1 from.

2 Q How were they marked?

3 A Like I said earlier, I thought it  
4 said "lab" or "Mound" or something like that. So  
5 -- but and I think a lot of -- and like I said,  
6 sometimes it would spill out, but it was a white --  
7 like a white powder type of thing.

8 Q Do you know what that white powder  
9 was?

10 A No, hmm-mm.

11 Q Where did you dispose of that white  
12 powder?

13 A That got -- 'cause we saved the  
14 barrels, the little barrel. They came pretty handy  
15 to put copper and stuff in. We dumped it over the  
16 edge like Tier 1 or Tier 2. It pretty much got  
17 buried.

18 Q Do you recall the types of vehicles  
19 that were being used from Dayton lab to transport  
20 to South Dayton Dump?

21 A No.

22 Q Do you have an idea on the Dayton  
23 lab how many drums would be transported at any  
24 given time?

25 A Couple dozen. Maybe a dozen.

1                   Q     Was that pretty consistent or did it  
2 vary?

3                   A     It varied. We would like to have  
4 had more because they were real handy, like I said,  
5 to store stuff in.

6                   Q     So if it varied, can you give me a  
7 sense per year on how many drums we're talking  
8 about from the Dayton lab?

9                   A     A hundred maybe. Somewhere in that  
10 --

11                  Q     And switching to Miamisburg to the  
12 Mound lab, do you have a sense of how many skids or  
13 truckloads we're talking about?

14                  A     No, because my remembering was that  
15 one time with the guy that drove, and he said --  
16 and why I remember, we talked I think earlier about  
17 the five things of transportation that was through  
18 Miamisburg, and we also talked about a wagon where  
19 you could get hamburgers down in Miamisburg that  
20 were really good. Then we talked about South  
21 Dixie. I think I talked about earlier how that was  
22 old 25. But the other times being dumped, I was  
23 just speculating how many times I saw skids.  
24 Whether or not they were yours or not from  
25 Monsanto, you know -- but that would be the only

1 time that I really remember.

2 Q Fair enough. Consistent with what's  
3 been asked of you already, knowing that we're all  
4 tired and you are especially tired, I'm sure, if  
5 you have any other recollections as to Monsanto,  
6 please let Mr. Silver know --

7 A Okay.

8 Q -- so that we can address those.

9 A Sure.

10 Q I only have one other question for  
11 you, and it may be kind of a hard one to answer.  
12 You've talked about spending time with Mr. Walsh  
13 prior to your deposition. Do you have an idea of  
14 how many hours total you've talked with him?

15 A First time two hours -- about two  
16 hours. Maybe ten hours, 15 at the most.

17 MS. WRIGHT: Okay. Fair enough. That's  
18 all I have. I'll turn it over to Mr. Lewis who's  
19 on the phone.

20 THE WITNESS: Thank you.

21 CROSS EXAMINATION

22 BY MR. LEWIS:

23 Q Hello, sir. Can you hear me okay?

24 A Yes, I can.

25 Q Oh, good. My name is Marty Lewis,

1 and I only have a couple of questions. You okay to  
2 go forward?

3 A Yes, Marty. Go ahead.

4 MR. SILVER: Marty, you're really loud  
5 and clear, so you can even turn it down just a  
6 little bit and everybody will be able to hear you  
7 really well.

8 (Whereupon, a brief discussion was held  
9 off the record.)

10 BY MR. LEWIS (Continuing):

11 Q Sir, I represent Valley Asphalt. I  
12 just have a couple of questions.

13 A Sure.

14 Q To your knowledge, is Valley Asphalt  
15 a neighbor of the South Dayton Dump?

16 A Yes.

17 Q Are they directly adjacent to the  
18 dump; is that correct?

19 A What's "adjacent" mean?

20 Q I'm sorry. Do they abut it? Are  
21 they right next to it?

22 A Yes, they're actually -- yeah.

23 Q What direction if you know?

24 A The very northwest corner.

25 Q Okay. Northwest corner. To your

1 knowledge, was Valley Asphalt ever a customer of  
2 South Dayton Dump?

3 A I think your products came in, but  
4 it was through other companies like Zeiler, Mr.  
5 Zeiler, all I can remember at this time.

6 Q Do you know that for a fact?

7 A For a fact?

8 Q I mean, do you know that Mr. Zeiler  
9 brought in any products from Valley Asphalt?

10 A Yes.

11 Q Okay. And how do you know that?

12 A 'Cause Mr. -- I knew Mr. Zeiler  
13 personally.

14 Q Is he still alive do you know?

15 A I'm -- I would say no, but --

16 Q And is Zeiler, Z-E-I-L-E-R?

17 A Mm-hmm.

18 Q And what did Mr. Zeiler tell you  
19 about Valley Asphalt?

20 A Tom Zeiler was his name. I think  
21 he's got a brother that was in business with him.

22 Q And what did he tell you about  
23 Valley Asphalt?

24 A Just that it was a known fact he got  
25 blacktop from you guys, and when they would get

1     done they'd have leftover blacktop and stuff like  
2     that. A big load I remember got dumped behind the  
3     office, and I remember Dad being so mad 'cause it  
4     got hard there, and it could still be there today.

5                 Q     Okay. So just so I understand, and  
6     tell me if I'm incorrect. I'm just trying to  
7     understand your testimony.

8                 A     Okay.

9                 Q     That Mr. Zeiler told you that he  
10    brought some blacktop from Valley Asphalt to South  
11    Dayton Dump?

12                A     Correct.

13                Q     Do you know what year this was?

14                A     I remember the shuttle coming down  
15    because I was over at his house doing some work for  
16    him. Whenever the shuttle went down. It was that  
17    year.

18                MR. SILVER: It was 1986.

19    BY MR. LEWIS (Continuing):

20                Q     And was that the only load that you  
21    know of from Valley Asphalt that was ever brought  
22    there to South Dayton Dump?

23                A     No, because I'm sure there was a lot  
24    more. 'Cause he parked all of his equipment back  
25    there between Doyle's Auto Parts, which would be

1 Office Number 2. So --

2 Q When you said "he parked his  
3 equipment," who is "he"?

4 A Mr. Zeiler, Tom. The machine that  
5 shifts the blacktop to be put on the roads, so it  
6 dropped from that machine onto the ground there.  
7 Like I said, one of the guys dropped a load, a  
8 pickup truckload of that back there. So --

9 Q Where was Mr. Zeiler's company  
10 located?

11 A I don't know in the beginning, but  
12 he ended up -- I think I said earlier he moved into  
13 my father's offices there at 2011 Springboro Pike.

14 Q Okay. And how far is that from  
15 South Dayton Dump?

16 A It's on the dump.

17 Q Okay. So Mr. Zeiler ran his  
18 operations from the dump?

19 A Yes. In that time frame when the  
20 shuttle went down, yes.

21 Q And what was his business, Mr.  
22 Zeiler's business?

23 A Blacktop. Blacktop resurfacing.

24 Q Okay. Blacktop resurfacing. And he  
25 did business, if I understand your testimony, from

1 Valley -- with Valley Asphalt?

2 A Correct.

3 Q Okay. I understand. Now, this  
4 blacktop that was taken or that you saw Mr. Zeiler  
5 or you were told Mr. Zeiler came from Valley  
6 Asphalt --

7 A Yes.

8 Q -- do you know if this blacktop was  
9 on Mr. Zeiler's property, Valley Asphalt's  
10 property, or South Dayton Dump's property?

11 A Well, it would be on South Dayton  
12 Dump's property.

13 Q And how do you know that?

14 A 'Cause I just mentioned the load  
15 being behind the office and his trucks being parked  
16 in front of Office Number 2 and Doyle's Auto Parts.

17 Q Okay. And just so I'm oriented,  
18 'cause I don't have the maps in front of me --

19 A Sure.

20 Q -- how far is the office from Valley  
21 Asphalt?

22 A Well, you're right up against 'em  
23 right now with the blacktop, but the office -- or  
24 where your mixer or foundry or whatever you want to  
25 call it probably a couple thousand feet maybe, a

1 thousand.

2 Q Do you know exactly where the  
3 property lines are?

4 A At this point, no. I could only  
5 tell you what's fenced off at this time. I saw the  
6 pile of old asphalt up to Doyle's Auto Parts and  
7 Office Number 2 and then from the south rim up to  
8 Tier Number 1.

9 Q Right. But my question is, do you  
10 know the blacktop you're referring to whose  
11 property that is on now?

12 A After the sale I think it would be  
13 Valley Asphalt.

14 Q Okay. And whose property was it on  
15 previously if you know?

16 A South Dayton Dump.

17 Q And how do you know that?

18 A Again, it was knowledgeable that on  
19 Tier 4 some of the solid waste would go there and  
20 that I saw personally a load come and be dumped  
21 behind the office like I said.

22 Q Okay. Other than -- that one load  
23 that you saw being dumped by Mr. Zeiler; is that  
24 correct?

25 A Yes.

1           Q     Okay. Other than that one load you  
2 saw being dumped by Mr. Zeiler, are you aware of  
3 any other materials from Valley Asphalt being  
4 placed or stored on the South Dayton Dump property?

5           A     On Tier Number 4.

6           Q     Okay. Where is Tier Number 4?

7           A     It would be the furthest south rim  
8 close to -- between the pit and the lake, the  
9 gravel lake.

10          Q     Between the pit and the gravel lake?

11          A     Yes.

12          Q     And when did that occur?

13          A     Early '80s. Now, whether he was  
14 dumping there previous, I didn't know because I  
15 didn't get personally to know that it came from  
16 Zeiler because I didn't -- I wasn't introduced to  
17 Zeiler until, like I said, around the early '80s.

18          Q     Right. But this was from Mr.  
19 Zeiler?

20          A     Yes, mm-hmm.

21          Q     Okay. So any -- your testimony, if  
22 I understand it, is any blacktop that was placed in  
23 South Dayton Dump's property to your knowledge  
24 would be dumped by Mr. Zeiler; is that correct?

25          A     Well, since you mention it -- and I

1 can only go by what I was told -- but a lot of  
2 loads that came from various companies that did  
3 patch work or resurfacing work from almost every  
4 company that ever dumped there could have come from  
5 your foundry because I believe the south part of  
6 Dayton you were the only supplier of blacktop at  
7 the time. I'm not a hundred percent sure, but --

8 Q And who told you that?

9 A Uncle Kenny.

10 Q Okay. But you don't have personal  
11 knowledge of that. Your only personal knowledge is  
12 what Mr. Zeiler told you or you observed; is that  
13 correct?

14 A Correct.

15 Q Okay. And the load that you saw Mr.  
16 Zeiler dump, that was around the time the shuttle  
17 went down; is that correct?

18 A Yeah, mm-hmm.

19 Q And what was the volume, if you  
20 know?

21 A Half a pickup truckload, or could  
22 have been a bed. Four by four by 18 inches high.

23 Q Now, other than what we've testified  
24 today, and I know we're all really tired, do you  
25 have a personal knowledge -- not what someone might

1 have told you, but do you have personal knowledge  
2 of any other materials from South -- I'm sorry --  
3 from Valley Asphalt being stored or disposed on the  
4 South Dayton Dump other than what you've already  
5 told me?

6 A No.

7 MR. LEWIS: Okay. That's all the  
8 questions I have, sir. Thank you for your time and  
9 your patience.

10 THE WITNESS: Thank you.

11 MR. SILVER: Thanks, Marty.

12 I don't have any further questions. I  
13 think we're ready to shut down here. Thank  
14 goodness. All right, Ed. Thanks so much.
